

SoonerCare Brand Name Required Drug List

In general, the SoonerCare program requires prior authorization (PA) for any brand name drug for which there is a U.S. Food and Drug Administration (FDA) A-rated generic equivalent. However, there are some products for which SoonerCare has determined greater cost-effectiveness in the use of the brand name product. This is a list of brand name formulations that SoonerCare prefers over their generic equivalents due to net cost.

In some instances, the cost of the brand name drug, when adjusted for rebates, is significantly lower than the net cost of the generic equivalents.

BRAND NAME	GENERIC NAME
Androgel	testosterone topical gel (1.62% pump)
Aptensio XR	methylphenidate hydrochloride extended release
