RE: Prenatal Vitamins

The Oklahoma Health Care Authority is engaged in an effort to improve the quality of prenatal care for our members. A recent review of pharmacy claims between 2012 and 2017 showed the following:

- The percentage of members **utilizing a prenatal vitamin has dropped from 76% to 61%**.
- Most pregnant members only had **two paid claims** for prenatal vitamins.

The goal is to improve the utilization of prenatal vitamins in pregnant members receiving SoonerCare services. Maternal nutrition, including adequate vitamin and mineral intake before and during pregnancy, can improve the chances of having a healthy pregnancy. Additionally, it can reduce the baby's risk of developing health issues later in life, including diabetes, obesity, and heart disease. Prenatal vitamins also can assist mothers-to-be in meeting the required daily nutrient intake for a healthy pregnancy.

It is important to note the following regarding coverage of prenatal vitamins:

- **Preferred** prenatal vitamins **do not require a prior authorization**; and
- All preferred prenatal vitamins have a **\$0 copay** when filled as a prescription.

Attached is a list of prenatal vitamins that are covered without a prior authorization. To simplify the prescribing process, you can simply write the prescription for "**prenatal vitamins with folic acid 1mg**" and include other desired ingredients such as "plus DHA." Due to frequent shifts in the availability of these products, this allows pharmacies to fill the prescription promptly with the appropriate prenatal vitamin they have in stock that meets the patient's needs. If no products on the preferred list meet the specific needs of your patient, a prior authorization may be submitted for consideration, along with supporting information for use of the non-preferred product.

Please note that a prior authorization is required for most brand-name prenatal vitamins. However, the **Citranatal® line of products are preferred and do not require prior authorization.** Updated versions of the preferred prenatal vitamin list can be accessed at <http://www.okhca.org/rx>, by clicking on "Prenatal Vitamin List." This list may change from time to time based on market conditions.

If you have any questions, please contact the Pharmacy Help Desk at (800) 522-0114, option 4.

Thank you for your continued service to Oklahoma's SoonerCare members.

Sincerely,

A handwritten signature in cursive script that reads "Rebecca Pasternik-Ikard".
