

OK SPA 20-0003 Diabetes Self-Management Training (DSMT) Comments

09/26/2019	Marlene Snow	I noted in the DSMT proposal that authorized providers are RD, RN or Phamacists who have a CDE. Current Medicare ruling allows those with a CDE to provide diabetes education. This is an updated ruling from 2018. Will those who have a CDE and not and RD, RN, or Pharmacy degree be eligible to bill for DSMT in Oklahoma?
10/04/2019	Katherine O'Neal	Thank you for this proposed rule. It is much needed; however, I do have a few recommendations for consideration:1) For eligible providers - include BD-ADM certification as an available certification; 2) For training, consider more than 1 hour for individuals. Additionally, as an FYI, the terminology for individuals that have a CDE certification is not 'DCES or Diabetes Care and Education Specialist'. Thank you!
