Close Requisition through WorkBench Overview

The Purchase Order, (PO) must be closed and budget checked before the Requisition.

Closing the Requisition will complete the PO process and release available Pre-encumbrances. Once a Requisition has been closed it cannot be opened again.

NOTE: DO NOT CLOSE A REQUISITION IF YOU EVER INTEND TO USE IT AGAIN.

If the Requisition is associated with a Purchase Order, the Purchase Order will need to be closed first. If the Purchase Order is not finalized any available encumbrance will be reinstated on the Requisition (pre-encumbrance). This is not a problem, as long as you intend to close the Requisition.

Closing the Requisition resets your Requisition Header status to Complete, your line status to complete and your budget status to 'Not Checked'. The benefit of this status change is that completed requisitions no longer appear in your list of available requisitions when you access requisition pages in update or display mode. These completed requisitions are also removed from the view in many other situations in which the available options have been set to exclude completed or canceled requisitions. Removing these requisitions from these prompts improves system performance and decreases the time required to find requisitions that you must modify.

Search [Return to Requester's Workbench](#)

Above is the Filter Option Page. This page allows the user to enter selection criteria for the Requisitions to display on the Requisitions Reconciliation WorkBench Page.

One Requisition can be selected by entering the Requisition number in the **Requisition ID** field or entering the **Requisition Name**.

Enter the selection criteria.

Filter Option Definitions

Requisition Name: Range of requisitions to close.

Req Date: The date entered on the Requisition.

Activity Date: The system updates this date on the requisition when you last save your Requisition.

Due Date: Date the product is due defined on the Requisition.

Supplier ID: Supplier defined on the Requisition.

Item ID: If an Item ID is defined on the Requisition, it can be searched for using this field.

Requester: The user who created the Requisition.

Status: Requisition Status. Options are *Open, Approved, Lines Approved, Pending Approval, Canceled, and Denied.*

Sourcing: The sourcing status of the requisition. This status can be found on the Requisition's sourcing control tab. If the status is **sourcing complete**, then the "Radio Box" must be checked.

Open Pre-encumbrances: This check box allows you to search for requisitions that are tied to purchase orders with an open balance.

Chartfields: The user can enter multiple Chartfield combinations as search criteria

Once you have selected your criteria, **click** the **Search** button located in the bottom left-hand corner of the page.

If Budget Checking errors occur, run the Requisition Budget Checking Report to identify the errors.

Criteria for Closing Requisition

Purchase Order must be closed and budget checked first
Requisition must have a valid budget checking status

Additional Notes

1. Do not close Requisition if you will need to use the Requisition again.
2. Closing the Requisition will remove it from the Maintain Requisition list.

Close Purchase Order through WorkBench

Overview

The Purchase Order, (PO) must be closed before the Requisition. This rule was introduced in the 8.9 release.

Closing the PO will complete the PO process and release available encumbrances. Once a PO has been closed it cannot be opened again.

NOTE: DO NOT CLOSE A PURCHASE ORDER IF YOU EVER INTEND TO USE IT AGAIN.

If the PO is associated with a Requisition and is not finalized, any available encumbrance will be reinstated on the Requisition (pre-encumbrance). This is not a problem, as long as you intend to close the Requisition. If for some reason you are not going to close the Requisition then Final the Purchase Order.

The PO status will change to *complete*, the line status will change to *complete*, and the budget status will change to *not checked*. The benefit of this status change is that completed purchase orders no longer appear in your list of available purchase orders when you access purchase order pages in update and display mode. These completed purchase orders are also removed from the view in many of the other situations in which the available options have been set to exclude completed or canceled purchase orders. Removing these purchase orders improves system performance and decreases the time required to find purchase orders that you need to modify.

NOTE: Prior to closing a PO, the PO Accounting Page should be reconciled to the PO Activity Page. This will help ensure that all vouchers associated with the PO have been budget checked and matched. However, this action will not identify outstanding invoices that have not been entered into People Soft.

Buyer's WorkBench

The screenshot shows the Buyer's WorkBench interface. At the top, there are fields for Business Unit (09000) and WorkBench ID (PO_RECON). Below these is a search field for Description. The main area is titled "List of Purchase Orders" and contains a table with the following columns: Purchase Order, Doc Status, Hold, PO Status, PO Date, Last Activity, Supplier ID, Buyer, Match Action, Change Order, Blanket PO, and Lines. A single row is visible with PO number 0909023458, Doc Status (document icon), Hold (N), PO Status (Dispatched), PO Date (10/01/2024), Last Activity (10/01/2024), Supplier ID (0000067919), Buyer (Bosten Benn), Match Action (Standard), and Lines (document icon). Below the table are checkboxes for "Select All" (checked) and "Clear All". At the bottom, there are several action buttons: Approve, Unapprove, Cancel, Close, Dispatch, Preview, and Budget Check. There is also a "Go To:" section with links for "Set filter options", "Process Monitor", "Process Request Options", and "View Processing Results". A "Save" button is located at the bottom left.

To select an individual Purchase Order to be closed, **click** the check box located to the left of the Purchase Order.

If more than one Purchase Order matches the search criteria, the user can use the Select All option to select all Purchase Orders that match the criteria.

Reconciliation Definitions

Approve: Not available. Requisition must be approved in workflow.

Un-Approve: Click this button to change the status of the selected purchase orders to Open.

Cancel: Cancels the selected purchase orders. When you cancel a purchase order that is in a Dispatched status, the status changes to Pend Cncl (pending cancel).

Close: Closes the selected purchase orders to further processing.

Dispatch: Dispatches the selected purchase orders, including all lines on the purchase order. Only purchase orders with approved or pending cancel statuses can be dispatched. If commitment control is enabled, the purchase order must also have a valid budget check status before it can be dispatched.

Preview: Previews the selected purchase orders.

[Process Request Options:](#) Click this link to access the Reconciliation WorkBench - Process Request Options page. Use this page to define process request options for use by the dispatch process.

0909023458			<input type="button" value="-"/>

Proceed: [Return to Buyer's WorkBench](#)

If the PO is Qualified, **click the Yes** button to close.

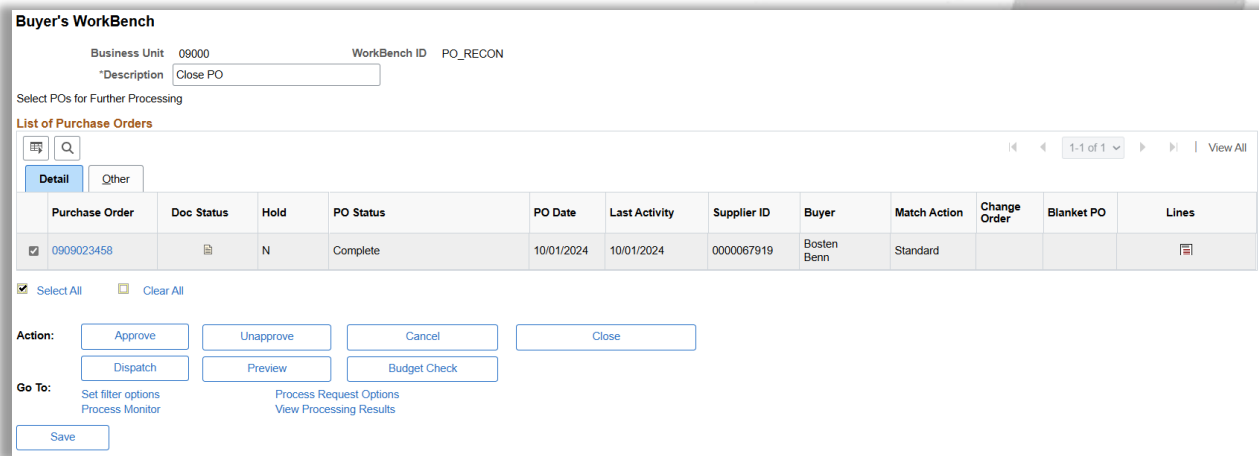

NOTE: If not qualified, go to page 43 of this manual.

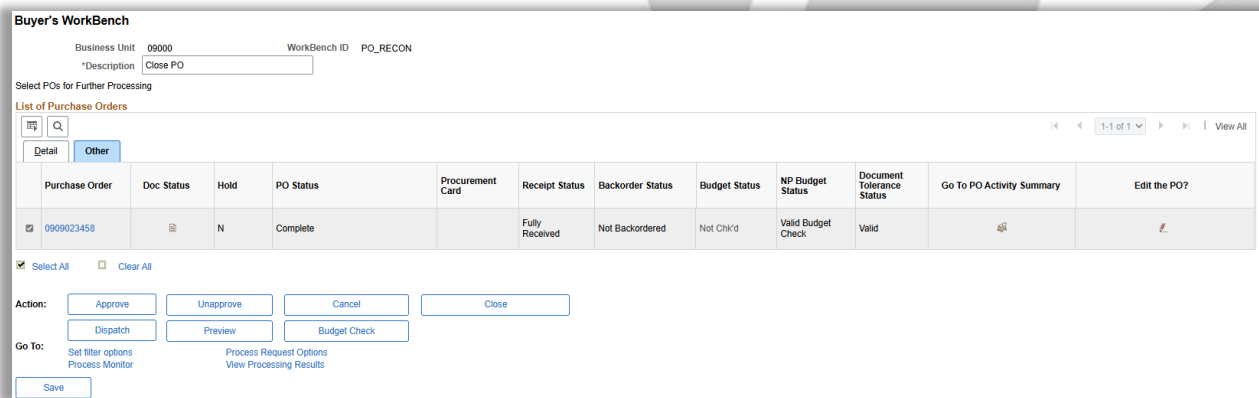

To continue **click** the Yes button.

NOTE: The PO is now being closed.

The status will change from Dispatched to Complete. **Click** the Other Tab.

If the PO has an available encumbrance the Budget Status will change to not checked. If you **click** “Edit the PO” icon you will get “No Matching Values Found”. Once the PO has been closed, the PO will no longer be available from the Maintain Purchase Order Page.

Close Multiple Purchase Orders

Above is the Filter Option Page. This page allows the user to enter selection criteria for the PO to display on the Purchase Order Buyer's WorkBench Page. One Purchase Order can be selected by entering the PO number in the Purchase Order field, or multiple Purchase Orders can be selected by using other fields such as PO status, Matching status, Receiving status, etc.

Enter the selection criteria and **click** the **Search** button.

For this example, all Canceled POs will be closed, **click** the "Cancelled" radio box located in the "Status" section and **click** on the **All** radio button located in the **Receiving** section.

NOTE: Be sure to clear unwanted criteria.

Go To:

[Set filter options](#) [Process Request Options](#)
[Process Monitor](#) [View Processing Results](#)

NOTE: The Budget Status and Document Tolerance Status did not change to “Not checked” because the PO(s) already had a zero encumbrance balance. Budget checking will not need to be completed.

Steps to Close a Purchase Order

1. Reconcile the Purchase Order Activity Page to the Purchase Order Accounting Page.
2. The Purchase Order Status must be **Dispatched** or **Cancelled**.
3. The Budget Status must be “**Valid**”.
4. The Document Tolerance Status must be **Valid**.

If the Purchase Order does meet any of the above criteria, de-select the check box located to the left of the Purchase Order line. This action will clear the check mark.

The user can delete a Qualified Purchase Order by selecting the Minus (-) icon, shown above.

Budget Check Close PO

The PO budget checking process is run at Noon and in the evening. If the user does not want to wait for the PO to budget check during those times, the PO can budget check from the Batch Budget Check process page.

Criteria for Closing PO

Appendix A

1. All vouchers associated with the Purchase Order must be posted.
2. The Purchase Order must be fully matched.
3. Fully Matched means:
 - The quantity ordered for each line on the PO is equal to the total quantity received and matched.
 - The quantity ordered is within the specified Close PO Under Quantity Percent Tolerance.
 - The PO is distributed by quantity and all quantities have been matched.
 - The PO is distributed by amount and the extended dollar amount has all been matched.
 - If a line item has been canceled and all other lines are fully matched, the Matching link on the PO header will never update to Fully Matched but the PO will be eligible to close.
4. If the Purchase Order is set up as No Match but Receiving is required, the receiving must either be turned off or the product must be received.

Purchase Orders Not Qualified Messages

MESSAGE	DEFINITION	RESOLUTION	OVERRIDE
The PO Line is tied to an active Voucher; therefore it may not be closed.	There is a voucher that has not been posted. Therefore it may not be matched or budget checked.	The voucher needs to be fully processed. (Budget check, matched and posted and if possible paid.)	No
POs with Receiving Required On though not received	The PO is usually an AO set up as No Match but the PO was set up as Receiving Required. Receiving was not done. When the voucher was created it was not required to go through matching so the voucher did not fail match.	You can either process a receiver or turn receiving off. We prefer agencies begin using the receiving.	Yes
The Purchase Order may not be closed because it has not been fully Matched.	1. The PO was not fully received and/or paid and will not be. 2. The PO will not fully match because the "Distribute By" selection (PO distribution page) was not fully utilized. If the "Distribute By" is AMOUNT then you must fully match on amount. If the "Distribute By" is QUANTITY then you must fully match on quantity.	If you are sure you will not be using this PO again then you can override the criteria. If you are not sure then you need to process a change order On #1 you may want to process a Change Order. On #2, if you have received all your quantities and the PO will not fully match it is probably because it is "Distributed By" AMOUNT and you have not fully utilized all of the PO line item(s) amount. You may want to override the criteria.	Yes

MESSAGE	DEFINITION	RESOLUTION	OVERRIDE
The Purchase Order's Activity Date is greater than the Calculate PO Close Date.			Yes
Cannot close PO with unchecked or error budget status on header.	The PO is in an error status.	The PO is in an error status and must be fixed before the system will close it.	No, if it is in an error status.
