OHEMOK
cyber Command called to tell you a hacker broke into your laptop and is stealing. Use a crayon or pencil and draw a line through the maze to get to the hacker before he steals it all. You caught him! Great job!
Glossary

BOT
An Internet robot pretending to be human.

CLOAKING
Hiding under real company names or websites to trick users.

CYBER PREDATORS
People who search online for other people in order to use, control or harm them in some way.

CYBERSECURITY
Protecting and defending users’ computers, servers, mobile devices, networks, and data from online attacks.

CYBERSPACE
A virtual world where devices and people talk on the Internet.

ENCRYPTION
Encoding a message or information to make it unreadable and secretive.

MALWARE
A software program designed by hackers to hijack computer systems or steal private information.

MULTI-FACTOR AUTHENTICATION (MFA)
A method of identity and access management that requires a user to provide multiple factors of authentication as part of the login process. Factors include something you know (e.g., PIN, password), something you have (e.g., hardware token, phone), and something you are (e.g., fingerprint, facial ID).

NETIQUETTE
Principles of behaving ethically online.

NETWORK
Multiple computers connected to one another.

PASSWORD
A string of characters that helps with authenticating a user during a login process.

PHISHING
A trick to get people to visit websites that steal personal information such as passwords and credit card information.

PIRACY
Illegally copying or using copyrighted digital material.

PRIVATE SETTINGS
Rules on devices and social media accounts to keep information, photos and posts protected from others.

RANSOMWARE
A type of malware that locks a victim’s information or system and demands a payment to unlock it.

SCAM
A trick to cheat someone out of something like money or private information.

SMISHING
A form of phishing that uses text messages. (Read Phishing.)

SPAM
A message sent to people without asking, that sales or promotes a product or in some cases floods a text thread.

TROLL
Someone who posts on social media to get a negative reaction.

VIRUS
A type of computer code that infects other computers allowing it to delete or steal files.

VULNERABILITY
A flaw in a piece of hardware, a piece of software, or a security system. Attackers can exploit a vulnerability for malicious purposes.
Cyber Command wants to teach kids how to protect themselves from cyber criminals. First, you need to set up your computer.

Use a crayon or pencil and draw a line from the computer part to its matching vocabulary word.

- MONITOR
- KEYBOARD
- PRINTER
- COMPUTER TOWER
- MOUSE

OH, NO!

Cyber Command called to tell you a hacker broke into your laptop and is stealing data!

Use a crayon or pencil and draw a line from start to finish through the maze to get to the hacker before he steals it all.

YOU CAUGHT HIM! GREAT JOB!

Need help? Answer key on the back cover.
IT’S OFFICIAL!

Now that you stopped your first hacker, Cyber Command is ready to make you an official badge!

Color the team and complete your own badge! Draw your photo and write your name.

NAME:
Someone hacked into the school’s cafeteria computer and stole everyone’s lunch money!

They want double the amount of money to give it back. Cyber Command never makes deals with bad guys, so we need to hunt for their ransomware program to stop them!

Draw a line from start to finish to shut down their attack and get back everyone’s lunch money!

YOU FOUND IT!
GREAT JOB!
Search in the letters from left to right and up and down to find the hidden words. Use a crayon or pencil to cross them out. We found one to help get you started.
