

DATA PRIVACY DAY

Data Privacy Day is an international effort held annually on Jan. 28 to create awareness about the importance of respecting privacy, safeguarding data and enabling trust.

Year-round, the National Cyber Security Alliance educates consumers on how they can own their online presence and shows organizations how privacy is good for business.

DATA PRIVACY DAY 2021

In 2021, NCSA is encouraging individuals to “Own Your Privacy” by learning how to protect your valuable data online. NCSA also encourages businesses to “Respect Privacy,” which advocates for holding organizations responsible for keeping individuals’ personal information safe from unauthorized access and ensuring fair, relevant and legitimate data collection and processing.
