

DoD Information Network Standard

Introduction

The Oklahoma Military Department (OMD) is the administrative component of the Oklahoma Army and Air National Guard. As National Guard services, the OMD utilizes the Defense Information Systems Agency (DISA) as their primary Information Network. DISA is a separate agency that does not integrate with Oklahoma's information network.

Purpose

This standard outlines the separation of Information Networks (IN) between the OMD and OMES/State of Oklahoma Information Network.

Definitions

DISA – Defense Information Systems Agency.

DODIN – Department of Defense Information Network.

IN – Information Network.

OMD – Oklahoma Military Department.

OKARNG – Oklahoma Air National Guard.

OKAIRNG – Oklahoma Air National Guard.

Standard

The Office of Management and Enterprise Services (OMES) has no access to, or authority over, the primary Information Network used by OMD. National Guard components are members of the United States Department of Defense and use the DODIN rather than State of Oklahoma provided IN services.

Compliance

This standard shall take effect upon publication and is made pursuant to Title 62 O.S. §§ 34.11.1 and 34.12 and Title 62 O.S. § 35.8. OMES IS may amend and publish the amended standards policies and standards at any time. Compliance is expected with all published policies and standards, and any published amendments thereof. Employees found in violation of this standard may be subject to disciplinary action, up to and including termination.

Rationale

To ensure compliance with Federal and State Information Network separation requirements. To coordinate and require central approval of state agency information technology purchases and projects to enable the chief information officer to assess the needs and capabilities of state agencies as well as streamline and consolidate systems to ensure that the state delivers essential public services to its citizens in the most efficient manner at the lowest possible cost to taxpayers.

Revision history

This standard is subject to periodic review to ensure relevancy.
