Mobile Device Passcode Self-reset User Guide

Overview
This user guide provides steps to self-reset mobile device passcodes. Note, this procedure only works with mobile devices enrolled in Intune.

Procedure
Step 1: Log in to https://portal.manage.microsoft.com/ using your state-issued email account. Select Next, when prompted.

Step 2: Select Work or school account.
**Step 3:** Log in with your state-issued credentials.

**Step 4:** Select the hamburger menu on the blue banner next to OMES, once logged in.

a. **Select Devices** from the hamburger menu.
b. Select your mobile device.

c. Select the **Reset Passcode** option.

d. Select **Sign out**, when prompted.

**Step 5:** Log back into [https://portal.manage.microsoft.com/](https://portal.manage.microsoft.com/) using your state-issued email account. Select **Next**, when prompted.

**Step 6:** Log back into your account, using state-issued credentials.

**Step 7:** **Reset passcode** should display.

a. Select **Reset passcode**.

b. Note, it may take a few seconds to communicate with the device. Once communication with the device is established, you should be able to swipe up without a passcode.
c. If the device does not open, select the **Check status** option on the **Reset Passcode** screen.
