

CPO Announcement

PeopleSoft upgrade and code freeze

PeopleSoft Financials will be going through a PeopleSoft Update Manager 48 upgrade. The new release will be available to financial users on Monday, May 19. PeopleSoft will be inaccessible during that prior weekend.

With this upgrade, your financial and purchasing teams will have an improved, new mobile user experience including additional fluid features, enhanced dashboards, added navigation search functionality and more.

In preparation for the upgrade, OMES will place a code freeze in the PeopleSoft system on any modifications that require application development or any design changes. The freeze will go into effect Monday, April 24. Submissions received via ServiceNow will be notified of the code freeze; however, if deemed an emergency, proper justification can be submitted by OMES Finance Center of Excellence, IS, or Central Purchasing for review.

If you have any questions regarding the freeze, contact servicedesk@omes.ok.gov.
