OMES OK-ISAC

# Educators! Raspberry Pi Opportunity

Could your classroom benefit from a free Raspberry Pi?

One of the OK-ISAC missions is to combat the cybersecurity workforce shortage by assisting improvement and advancement of a well-trained cybersecurity labor pool in Oklahoma. We encourage pursuit of cybersecurity careers and wish to help create hands-on opportunities for K-12 and higher education students to experience. If you need a Raspberry Pi to assist your school's STEM lessons, we want to help.

Limited opportunity. Apply by April 5, 2023.
