

Self-Service Password Reset (MFA) Registration

OMES Oklahoma Cyber Command has implemented a Self-Service Password Reset registration policy to ensure all users are eligible for Self-Service Password Reset and are protected by Multi-Factor Authentication.

If you are not setup for Self-Service Password Reset, you will be presented with this prompt when logging in to web applications.

If you are unable to complete the enrollment process when the prompt is shown, select the "Skip for now" hyperlink.

By selecting the "Next" button, you will be taken to the security information registration wizard where you can enroll the Microsoft Authenticator, Phone/SMS, or Security Questions. If you can't complete the enrollment during this phase, you can exit the browser tab and login again.

If you primarily work in a secured location where cell phones are not allowed, we ask that you please enroll for Self-Service Password Reset at <https://aka.ms/mysecurityinfo> from home or another location to prevent the registration prompt from repeatedly appearing. Once the enrollment is complete, you will be eligible to reset your own password online at <https://passwordreset.microsoftonline.com>
