

OKLAHOMA STATE USE PROGRAM

Providing employment and job training
for people with disabilities.

WHAT IS STATE USE?

The State Use program, established by Oklahoma statute and administered by the Office of Management and Enterprise Services (OMES), aims to provide long-term employment opportunities and job training for individuals with disabilities. The program partners with qualified nonprofit agencies (QNAs) to supply a range of products and services to state agencies.

WHAT ARE THE PROGRAM BENEFITS?

The State Use program reduces reliance on state and federal assistance by creating employment opportunities for Oklahomans with disabilities. Purchasing through the program offers numerous benefits to state agencies and entities, including:

STREAMLINED PROCUREMENT

- State agencies can purchase from State Use vendors without undergoing an extensive competitive bidding process, allowing agencies to efficiently meet their procurement needs while conserving time and administrative resources.

GUARANTEED BEST VALUE

- OMES evaluates all products and services offered through the State Use program to ensure they meet fair pricing and quality standards, guaranteeing the best value for the state.

POSITIVE COMMUNITY IMPACT

- When state agencies purchase through the State Use program, they support the well-being and workforce integration of Oklahomans with disabilities.
