**TO:** Agency directors, CPOs, P-card administrators and P-card holders

**FROM:** Office of Management and Enterprise Services

**SUBJECT:** New statewide contract search site now available

**CONTACT:** [Lesli Bajema](#)

OMES Central Purchasing is excited to announce that **the modernized statewide contract search site is officially live today.**

This significant upgrade to our contract visibility and management tools is a critical step in our commitment to enhancing data integrity, providing consistency, and streamlining the procurement process across all state agencies, political subdivisions and eligible entities.

The new site features an intuitive design and updated technical foundation, providing a superior user experience and significantly improving our ability to accurately track contract data and ensure compliance. Select the button below to access the new statewide contract search site, and **update all saved bookmarks to the new link.**

### Key strategic highlights:

- **Data clarity and accuracy:** We have prioritized cleaning the contract database. Search results and document lists are no longer cluttered with obsolete or irrelevant files, ensuring that only current, active contract documents are available.
- **Clear contact roles:** Contract managers and their contact information are clearly identified and linked to their respective contracts, ensuring that performance and scope questions go directly to the correct subject matter expert.
- **Clear supplier and contact information:** The search results now prominently feature supplier information and contact details directly on the contract card, greatly simplifying the process of obtaining quotes and initiating a purchase.
- **Powerful search functionality:** Users can now perform precise searches by category code, brand name, supplier ID, contract origin and more, providing immediate access to contract information.

Please begin using this new resource immediately. This platform represents a substantial investment in modernizing our procurement infrastructure, designed to make your job easier and more efficient.

Select the button below to review the statewide contract search user guide and learn more about navigating the new site. If you encounter any problems with the new site, please contact Category Management Director [Lesli Bajema](#).
