

Package is in Metrc, but test results are not.

When the package is ready to be transferred or sold, testing will show “Not Submitted” in Metrc.

In the package “Notes” inside Metrc, the grower or processor lists the testing laboratory, the sample number and the tests passed.

OMMA reviews transfers with “Not Submitted” status.

OMMA cross-checks package “Notes” with lab results, and investigates discrepancies.

Once a package is correctly transferred or sold to a dispensary, there is no time limit on when it must be sold or disposed of.
