Introduction

On September 1, 1973, the OSBI assumed the statewide administration of the UCR Program in Oklahoma. When the OSBI began administering the program, approximately 260 agencies were reporting their crime statistics to the OSBI. As of December 31, 2024, there are 461 local law enforcement agencies reporting crime statistics, and the OSBI subsequently submits this crime data to the Federal Bureau of Investigation (FBI).

Traditionally, the FBI's UCR Program accepted data via the Summary Reporting System (SRS). However, as of January 1, 2021, the FBI began the transition to only accepting incident-based reporting data compatible with the National Incident-Based Reporting System (NIBRS). The FBI continues to accept SRS data, but only from agencies that are currently transitioning to incident-based reporting. With the changes at the federal level, local law enforcement agencies in Oklahoma transitioned from submitting their crime data to the OSBI via SRS to submitting data into Oklahoma's State Incident-Based Reporting System (SIBRS), which the OSBI maintains in addition to the SRS.

In the SRS data collection, data was collected for only eight crimes and included a Hierarchy Rule to determine which offense was reported when an incident involved more than one offense. For example, if a Murder and an Aggravated Assault occurred in a single incident, the Hierarchy Rule determines that only the Murder is reported into the SRS database. In contrast, the incident-based reporting system collects data for 52 unique Group A offenses and 11 Group B offenses, and instead of using a Hierarchy Rule, NIBRS/SIBRS allows reporting of up to 10 offenses in a single incident. Additionally, the SIBRS data collection is capable of linking an arrest directly to an incident, and the reporting agency can specify if the crime was attempted or completed. Overall, the SIBRS data collection gathers more detailed information on each incident's victim(s), offense(s), and offender(s). Examples of more detailed information include but are not limited to victim-to-offender relationships, drug types, premise types, and property stolen and/or damaged.

Beginning with [*Crime in Oklahoma, 2021*](#), this annual report uses data reported to the SIBRS database. This report includes data reported for 52 Group A offenses and 11 Group B offenses. If you would like more information, please contact the SAC at okcrimestats@osbi.ok.gov.

For more information or to provide feedback, please email the Statistical Analysis Center okcrimestats@osbi.ok.gov.

Legislative Mandate

The *Crime in Oklahoma* report includes information provided by law enforcement agencies for known offenses. The Oklahoma Legislature mandated the responsibility and authority for data collection and dissemination to the Oklahoma State Bureau of Investigation. Requirements established through [Title 74 O.S. § 150.10](#) are as follows:

- A. A uniform crime reporting system shall be established by the Oklahoma State Bureau of Investigation. The Director shall have the power and duty, when directed by the Commission, to collect and gather such information from such state agencies as may be prescribed in Section 150.1, et seq. of this title.
- B. The Oklahoma State Bureau of Investigation is hereby designated as the agency which shall collect, gather, assemble, and collate such information as is prescribed by this section.
- C.
 1. All state, county, city and town law enforcement agencies shall submit reports to the Oklahoma State Bureau of Investigation on form prescribed by the Bureau. The reports shall contain the number and nature of offenses committed within their respective jurisdictions, the disposition of such matters, and such other information as the Bureau may require, respecting information relating to the cause and prevention of crime, recidivism, the rehabilitation of criminals and the proper administration of criminal justice.
 2. Any information taken from such information, data, records or reports submitted to the uniform crime reporting system and used to prepare the Uniform Crime Report shall be an open record pursuant to the Oklahoma Open Records Act. Requests for such information shall be submitted to the Bureau.
 3. Any request under the Oklahoma Open Records Act for any other information, data, records or reports submitted to the uniform crime reporting system by the Oklahoma State Bureau of Investigation shall be directed to the Bureau pursuant to Section 24A.20 of Title 51 of the Oklahoma Statutes. Such information, data, records or reports shall be considered investigative records of the Bureau and shall be subject to discovery and disclosure only in compliance with Section 150.5 of this title or other applicable statute.

For more information or to provide feedback, please email the Statistical Analysis Center okcrimestats@osbi.ok.gov.

4. Any requests under the Oklahoma Open Records Act for more information, data, records or reports submitted by a law enforcement agency other than the Oklahoma State Bureau of Investigation to the uniform crime reporting system shall be directed to the law enforcement agency submitting the information, data, records or reports to the Bureau unit pursuant to Section 24A.20 of Title 51 of the Oklahoma Statutes. Such information, data records or reports shall be considered law enforcement records and shall be subject to discovery and disclosure only in compliance with Section 24A.8 of Title 51 of the Oklahoma Statutes or other applicable statute.

- D. Upon receipt of such information the Director shall have such data collated and formulated and shall compile statistics as the Director may deem necessary in order to present a proper classification and analysis of the volume and nature of crime and the administration of criminal justice within this state.
- E. Refusal or persistent failure of any law enforcement agency to submit reports required by this section may result in discontinued access to Bureau information and assistance.

For more information or to provide feedback, please email the Statistical Analysis Center
okcrimestats@osbi.ok.gov.

Statement of Policy

The following regulations will be observed by this agency concerning the release of statistical information. Employees of the agency will observe these procedures and will not deviate from this policy without the express consent of the Director of the Oklahoma State Bureau of Investigation. All information to be released will originate from the Field Services Unit of the Oklahoma State Bureau of Investigation.

Policy:

1. This agency will publish an annual report reflecting crime in Oklahoma. This report will be distributed to the Governor, members of the Legislature, the Attorney General, law enforcement agencies, the State Library System, and to any agency or committee dedicated to law enforcement or criminal justice work. An electronic copy of the report will be made available on the OSBI website.
2. Published annual reports will be released to the above-named agencies at no charge. They will then be released to individuals or agencies extraneous to the criminal justice community who shall pay a fee of five dollars (\$5.00) for every copy received.
3. Data Requests
 - a. Information contained in the published annual report may be released via telephone, letter, etc. to any interested party.
 - b. All requests for unpublished information from the agencies or individuals extraneous to the criminal justice community should be submitted to the Statistical Analysis Center (SAC). In accordance with the Oklahoma Open Records Act, all requests may be subject to a charge. Standard practice is to provide data in a PDF or hard copy format to prevent manipulation of data. Exceptions to this practice can be submitted to the director of the SAC for consideration.
 - c. Law enforcement agencies may receive interim, unpublished, specialized reports identifying their agency only, provided the request is reasonable. Law enforcement agencies may also receive their respective county totals along with other state or regional totals. All requests should be directed to the supervisor of the Field Services Unit.

For more information or to provide feedback, please email the Statistical Analysis Center
okcrimestats@osbi.ok.gov.

Reporting and Collection Procedures

As described in the [Legislative Mandate](#) section, all state, county, city and town law enforcement agencies are required to submit crime data to the OSBI. Law enforcement agencies report the number of known offenses for Crimes Against Persons, Crimes Against Property, Crimes Against Society, and Group B offenses. Crime counts include “actual offenses known” without regard to (1) whether anyone is arrested for the crime; (2) whether the stolen property is recovered; (3) the local prosecution policy; and (4) any other restrictive considerations. Law enforcement agencies also report clearance data either by an arrest or by exceptional means (a crime solution or clearance is recorded when some element beyond law enforcement control precludes the placing of formal charges against the offender(s)). This report contains demographic information for victims (where applicable) and arrestees.

Objectives:

The fundamental objectives of the Oklahoma UCR/SIBRS Program are:

1. Inform the Governor, Legislature, other governmental officials, and the public as to the nature, magnitude, and trends of crime in Oklahoma.
2. Provide law enforcement administrators with statistics for administrative and operational use.
3. Provide offender demographics in order to find the proper focus for crime prevention and law enforcement.
4. Provide data and statistics for research to improve the efficiency, effectiveness, and performance of criminal justice agencies.
5. Provide the FBI with complete incident-based reporting data to be included in the national publication *Crime in the United States*.

Verification:

A primary consideration in the collection of criminal statistics in Oklahoma is the uniformity and accuracy of crime data. While the Field Services Unit (FSU) at OSBI provides training and technical assistance to local law enforcement, the accuracy of crime data included in this report cannot be guaranteed. Incident reports uploaded from external records management systems must meet the state’s minimum requirements for submission before being accepted into the state repository. Incident reports that are not validated are not included in this report. Throughout the year, FSU representatives work with reporting agencies to correct reporting errors. Ongoing communication (phone, email, and in person) with reporting agencies is essential to ensure the accuracy and quality of reporting.

For more information or to provide feedback, please email the Statistical Analysis Center okcrimestats@osbi.ok.gov.

Crime Factors:

This report includes data reported to the OSBI through the State Incident-Based Reporting System (SIBRS) as of April 8, 2024. Due to SIBRS being a live database, data could be subject to change if queried after April 8, 2024. Data provided in this report is based on offenses known to law enforcement; however, victims do not always report crime to law enforcement. For that reason, the OSBI cautions against using the data reported to make direct comparisons among jurisdictions in the State or Nation. Data is reported for an event which may include several offenses, multiple offenders, and/or multiple victims. As a result, direct comparisons between offense, arrest, and victim data may be misleading. Individuals involved in an incident could be linked to multiple crimes as well. Additionally, other factors may influence the amount of crime reported across jurisdictions, including:

- Population density and urbanization
- Compositions of the population, particularly in reference to age
- Relative stability of population, especially concerning commuting patterns
- Transportation and highways
- Socioeconomic conditions, such as median household income, poverty, and unemployment
- Cultural factors: education, recreational, and religious makeup
- Family dynamics and structure
- Climate
- Effective strength of local law enforcement
- The administrative and investigative efficiency of the local law enforcement agency
- Policies of the prosecuting officials and the courts
- Public opinion toward crime
- Crime reporting practices of victims and citizens.

For more information or to provide feedback, please email the Statistical Analysis Center
okcrimestats@osbi.ok.gov.

Counting Methodology

As previously mentioned, SIBRS is a complex data collection, and as a result, there are a multitude of ways to count data submitted. For that reason, the SAC has outlined the methodology below for how data in this report was counted.

For crime reporting purposes, the total number of crimes is counted in the following way:

- Crimes Against Persons are counted by the number of **unique** victims of a crime against a person.
- Crimes Against Property are counted by the number of **unique** crimes against property offense types, with the exception of Motor Vehicle Theft. Motor Vehicle Theft is counted by the number of **attempted** Motor Vehicle Thefts **plus** the number of unique motor vehicles stolen.
- Crimes Against Society are counted by the number of **unique** crimes against society offense types.
- Group B offenses are counted by the number of **unique** offenders of a Group B offense who had an arrest date in the calendar year of 2024. While the individual may have been arrested in 2024, the incident could have occurred in a previous year.

The numbers in each section may differ depending on the data element. Below are brief descriptions for how specific data element were counted:

- Month, Day of Week, and Time of Day are counted in the same manner as listed above for each crime category.
- Victim specific information such as victim type, demographics, relationship types, and injury types are counted by the unique victim.
- Arrestee information (i.e., demographics) is counted in the same manner as described above for Group B crimes.
- Offense specific information such as weapon type, premise type, and criminal/gang activity are counted by each unique offense type regardless of the crime category.
- Property loss, value, and type are counted by the unique property item.

If you have any questions regarding data, methodology, etc. please submit them to: okcrimestats@osbi.ok.gov.

Crimes by Contributor

There were 461 law enforcement agencies in 2024 that provided data to Oklahoma’s SIBRS Program. The table beginning on page 91 is a listing of law enforcement agencies that reported data to SIBRS. The table includes the number of crimes reported for Crimes Against Persons, Property, and Society, the population (where) applicable, and the crime rate (where applicable) per agency. The table is sorted alphabetically by county first, then by the Originating Agency Identifier (ORI) assigned to the law enforcement agency by the FBI. The Statistical Analysis Center does not estimate any data for an agency who was not consistent and/or did not report data for that calendar year. As previously mentioned, the data provided in this report is what was reported as of April 7, 2025. For these reasons, there may be discrepancies when comparing data in this publication with data in *Crime in the United States*.

The following is a list of agencies that failed to report data during all of calendar year 2024.

[^]Justifiable Homicide (09C) is not considered a crime, and as a result, it is not included in the total number of Crimes Against Persons, Total SIBRS Crimes, or crime rates.

Figures for 2023 are from *Crime in Oklahoma, 2023*, and were queried April 8, 2024.

It is important to note that the number of crimes reported for the Oklahoma State Bureau of Investigation (OSBI) does not reflect the total number of investigations conducted in 2021 and 2022. Per Title [74 O.S. § 150.2](#) and [74 O.S. § 150.5](#), the OSBI serves primarily to assist other agencies and conducts investigations upon the request from other agencies. In order to prevent counting the same incident twice, the OSBI does not report incidents where they assisted another agency as these incidents should be reported by the original requesting agency.

Law Enforcement Employment

Definition: Persons employed as full-time sworn officers and full-time civilian employees.

Annually, the OSBI sends a survey to all reporting law enforcement agencies throughout the state to determine the number of individuals employed in law enforcement. With the exception of persons who perform guard or protection duties and who are not paid from police funds (i.e., school crossing guards, special officers, and merchant police), these figures reflect the number of full-time sworn personnel with full arrest power, including the chief, sheriff, commissioner, and superintendent. The figures do not include employees of law enforcement agencies that do not contribute to the SIBRS program.

Civilian includes clerks, radio dispatchers, meter maids, stenographers, mechanics, etc., provided these persons are full-time employees of the agency. Neither employees who are compensated from a source other than police funds, nor those receiving salaries from federal grants are included.

In 2024, Oklahoma law enforcement employment rate was 3.3 per 1,000 inhabitants.
