

OKLAHOMA STATE
DEPARTMENT of EDUCATION

NOTICE TO DISTRICTS:

HB 4073, Alyssa’s Law, was effective July 1, 2024. This bill requires school districts implement a mobile panic alert system. Additionally, the bill requires OSDE Board to adopt a list of approved vendors that met, at minimum, the requirements outlined in the law.

The Oklahoma State Department of Education (OSDE) Board has approved the eleven (11) agencies listed below as qualified suppliers with whom school districts may negotiate contracts for mobile panic button services.

The suppliers will provide services and resources that include, connecting emergency service technologies to ensure real-time coordination among multiple first responder agencies; integrating with public safety answering point infrastructure to transmit 9-1-1 calls and mobile activations; automatically alerting designated school personnel when an emergency response is initiated on-site by smartphone application, phone call, text message, or other technology; providing emergency responders with floor plans, caller location, and other information to assist emergency responders during a 9-1-1 call; and integrating designated school personnel with emergency responders to provide real-time situational updates during an emergency. *These entities meet the mandatory qualifications and have satisfactorily responded to all the requests within the RFI.*

Qualified Suppliers:

22nd Century
911 Inform
AT&T Enterprise
Atlas Sound LP

CrisisGo
Everbridge
Hey HQ
Inspirit Group/StopIt Solutions

Intrado Life & Safety
Raptor Technologies
Rave Wireless

Reasons for Recommending Above Suppliers.

Mandatory Requirements:

- Must connect emergency service technologies to ensure real-time coordination among multiple first responder agencies within the district boundaries or neighboring district if not available.
- Must integrate with public safety answering point infrastructure to transmit 9-1-1 calls and mobile activations. Must currently have the Common Alerting Protocol Application Programming Interface (CAP API) available. Must list all 911 public safety software solutions the supplier has integrated with using the CAP API. These applications may include Computer Aided Dispatch, 911 Call Handling Equipment or 911 Mapping equipment used in a Call Center to show the location of the 911 caller. The interface must provide two-way communication to fulfill the items listed in 2.5, 2.6 and 2.7 of this section. Must indicate the preferred monitoring system, software or web application that will be used to monitor the alerts by the 911 Emergency Communicators.

OKLAHOMA STATE
DEPARTMENT *of* EDUCATION

- Must automatically alert designated school personnel when an emergency response is initiated on-site by smartphone application, phone call, text message, or other technology. The alert must indicate the emergency type that has been activated (i.e. police, fire, medical, active shooter, etc).
- Must provide emergency responders with floor plans, caller location, and other information to assist emergency responders during a 9-1-1 call.
- Must integrate designated school personnel with emergency responders to provide real time situational updates during an emergency. This includes the ability, based on security preferences, to communicate between the emergency responders, 911 emergency communications, school officials or the person that activated the emergency button.
