## Data Notes and Definitions

A dropout is defined as an individual who:

- 1.) was enrolled in school for some time during the previous school year; and
- 2.) was not enrolled at the beginning of the current school year (Oct. 1); and
- 3.) has not graduated from high school or completed a state- or district- approved educational program (e.g., high school equivalency); and
- 4.) does not meet any of the following exclusionary conditions:
  - a) transfer to another public school district, private school, or state- or district- approved educational program (including correctional or health facility programs);
  - b) temporary absence due to suspension or school-excused illness; or
  - c) death.

\* The High School State Dropout Rate excludes students over 18 as of Oct. 1 of the previous school year.

The \*\*\* symbol indicates data that have been redacted to protect student privacy.

### Special Note for SY 2020 - 2021

The state level dropout rates for SY 2021 are significantly higher than previous years. There are two primary reasons that contribute to this marked difference:

- 1) The COVID-19 pandemic resulted in the majority of districts shifting to remote learning for a significant period of time. At the end of SY 2021 and beginning of SY 2022, students had to transition back to brick-and-mortar classrooms after spending most of the previous year in remote learning, which may have increased the likelihood of dropping out by students already at risk.
- 2) Beginning with SY 2020, the state's longitudinal data system was utilized to assist districts with confirming in-state transfers. This significantly improved the accuracy of exit status reported to the state.
