

Reading Sufficiency Act Study

**Prepared By Oklahoma State Department
of Education 2022-2023 School Year**

In fulfillment of Section 1210.508C of Title 70 of the Oklahoma Statutes. This study provides data on third grade reading achievement by socio-economic status, learning disability status, English learner status and race. It also provides evidence on reading instructional practices and remediation efforts currently being used by districts in Oklahoma and explores the potential efficacy of these practices.

Background

The Reading Sufficiency Act (RSA) was originally passed in 1997 to improve Oklahoma children's reading skills before the end of third grade. The law required that all kindergarten through third-grade students be assessed¹ at the beginning and end of each school year for the acquisition of reading skills. In 2012,² the law was amended to require that beginning in the 2013-2014 school year, third-grade students show proficiency on grade-level reading skills or meet one of the good-cause exemptions³ to be promoted to fourth grade. In 2014, HB 2625 was passed with emergency status and was in effect for the 2013-2014 academic year. This allowed a "probationary promotion" for third graders through the recommendation of a Student Reading Proficiency Team (SRPT), a partnership of the student's parents and educators. HB 1760 was passed in 2017 and made the SRPT a permanent option.⁴ In 2020, SB 601 was passed to amend some of the good-cause exemption requirements, to add a mid-year screening assessment for kindergarten through third-grade students, and to clarify language around the expectations for kindergarten students.⁵

Purpose

Section 1210.508C of Title 70 of the Oklahoma Statutes requires that the State Department of Education (SDE) conduct a study on reading instruction and the retention of students in the third grade based on reading assessments. The purpose of the study is to identify trends in assessment data for students in kindergarten through third grade, as well as trends in promotion and retention decisions for third-grade students. Through this report, data is also collected on the instructional practices utilized by schools and the research literature regarding the effectiveness of those practices is discussed.

The purpose of the Reading Sufficiency Act is to identify areas of difficulty early and intervene before a student falls too far behind his or her peers. As such, the Reading Sufficiency Act (RSA) follows the Multi-Tiered Systems of Support (MTSS) model. Third grade is the transition year in which students apply the foundational skills they have been learning in the early grades to begin to focus on more critical analysis and understanding of text. Current legislation mandates that the major determinant in assessing a third-grader's reading proficiency is the student's score on the reading portion of the Oklahoma School Testing Program (OSTP). A student must either meet RSA criteria on the reading and vocabulary portions of the assessment, show reading proficiency

¹ See *K-3 Screening and Assessments* (70 O.S. §1210.508C (B-C))

² See *Retention - No Social Promotion* (70 O.S. §1210.508C (H))

³ See *Good Cause Exemptions* (70 O.S. § 1210.508C (J-K))

⁴ See *Probationary Promotion* (70 O.S. § 1210.508C (H)(4))

⁵ See *K-3 Screening and Assessments* (70 O.S. §1210.508C (A)(3))

through one of the approved screening assessments, qualify for any of the good-cause exemptions, be promoted with probation by the Student Reading Proficiency Team (SRPT), or be retained. It is through the dissemination of reports such as this one that Oklahomans are able to take an informed glance at the progress in continually improving literacy in our schools, our communities, and our state.

Key Findings

- In 2022-23 94,723 (47.8%) K-3 students were identified as at-risk of reading difficulties through beginning of year screening processes. By the end of the school year 69,450 (35.1%) students were identified as at-risk through end of year screening processes and on a reading plan for intervention.
- There was a 12.7% decrease in the number of students needing reading interventions from the beginning of the school year to the end of the school year.
- There was an increase of total students meeting RSA criteria as determined by the Oklahoma State Testing (OST) Program with 69.6% of third graders achieving this goal. Although not yet equal to pre-COVID numbers, the trajectory is positive for increasing the number of students meeting RSA criteria.
- Hispanic, Black, and Pacific Islander subgroups did not meet RSA criteria at the same rate as other subgroups.
- Hispanic/Latino students who met RSA criteria increased from 44.1% in SY2022 to 59.1% in SY2023, which is a 15% increase. This is the largest increase in any subgroup population. In SY2023, 5,916 Hispanic/Latino students met RSA criteria, 4,102 did not meet RSA criteria.

Organization

As outlined in 70 O.S. § 1210.508C, this report is organized around eleven (11) central questions:

1. How many students (number and percent) in kindergarten through third grade have been determined as at-risk for reading difficulties as compared to the total number of students enrolled in each grade?
2. How many students (number and percent) in kindergarten continue to be at-risk for reading difficulties as determined by the year-end measurement of reading progress? How many students (number and percent) in kindergarten through third grade have successfully completed their program of reading instruction and are reading on grade level as determined by the results of approved reading assessments? How many students (number and percent) in kindergarten through

third grade have successfully completed their program of reading instruction and are reading on grade level as determined by the results of approved reading assessments?

3. How many third-grade students (number and percent) met the performance criteria for the RSA as determined by the Commission for Educational Quality and Accountability on the reading portion of the statewide third-grade assessment?
4. How many third-grade students participated in the Oklahoma State Testing Program (OSTP) and, of that number, how many met reading proficiency on a screening instrument, how many were promoted through each of the good-cause exemptions, how many were retained, and how many were promoted through probationary promotion?
5. What funding was appropriated to each district for reading remediation?
6. What screening instruments are being used to identify reading deficiencies and monitor reading progress?
7. What types of reading instructional practices, instructional methods and remediation efforts are currently being used by districts?
8. What types of reading resources do students have access to outside of school?

The data sources used to answer the questions are provided. The results are presented in tables and graphs.

Limitations

This report provides information that, when placed in the proper context, can help Oklahomans better understand the implementation and effectiveness of programs of reading instruction for kindergarten through third grade classrooms across the state. Current data reporting methods include self-reported data from districts, and thus, limit the conclusions which can be confidently drawn from this report. Data is reported at the site level rather than by student level. Therefore, it is difficult to know if data changed due to student improvement or movement to another school. Data show if students met a set target. However, it does not show the rate of improvement to determine if students made reasonable progress through the year.

Because data is not collected at the student level, it cannot be determined which students on a reading plan might also be receiving additional instructional supports, such as English learner instruction or special services, or if the student was referred for additional services during the year. Districts report the number of students retained in grade three. However, this report does not show how many students might have been retained for academic reasons in grades K-2.

Results and Analysis

This section of the study will provide the critical data, tables, and narrative as outlined in 70 O.S. § 1210.508C. The Data Sources and Survey Results sections will provide the background for how the data was collected for the subsequent sections. The questions were also grouped into categories and include evaluative information based on the tables and figures provided.

Data Sources

To determine the number and percentage of students considered at-risk for reading difficulties at the beginning of the year as compared to the total number of students enrolled, we used district-reported data which delineated the number of students who were considered at-risk based on their enrollment in a program of reading instruction and the number of students enrolled. These numbers were directly reported to the OSDE by districts.

This study used data from the following sources:

- Reading Sufficiency Act Survey, including Beginning-of-Year and End-of-Year reports
- Third-Grade Promotion and Retention Report
- RSA district funding data
- State-developed survey on instructional practices, instructional methods, remediation efforts, and reading resource access
- Student information data
- Literature on instructional practices, instructional methods, remediation efforts, and reading resources.

Any student data contained in the report was reported only in the aggregate so that individual students could not be identified, except for promotion and retention decisions for third grade students who did not meet RSA criteria on the state test. In this case, districts were asked to report the final retention decision, as well as the method that was used for a student who was promoted.

To gather information on reading instruction, a survey was sent to district personnel, administrators, and teachers who work with kindergarten through third-grade students. There were 567 responses to the survey. The respondents represented 67 (87%) counties in Oklahoma and 198 (37%) of the 532 school districts. The majority of the respondents (44.6%) were classroom teachers. Responses to the survey do not represent all districts and reflect a limited number of educators.

Question 1

How many students (number and percent) in kindergarten through third grade have been determined as at-risk for reading difficulties as compared to the total number of students enrolled in each grade?

The following table showcases the percent of students who are identified as at-risk of not achieving reading proficiency as determined by a beginning-of-year screening assessment administered within the first few weeks of the school year. The data provided does not indicate the progress made in that grade level throughout the year.

Table 1. Students Identified as At-Risk for Reading Difficulty at Beginning of Year Compared to Total Enrollment

	Grade	At-Risk BOY	Total Enrolled	Percent At-Risk BOY
2021	Kindergarten	18,950	47,680	39.7%
	Grade 1	24,815	49,223	50.4%
	Grade 2	24,180	48,045	50.3%
	Grade 3	21,519	47,591	45.2%
	All Grades	89,464	192,539	46.5%
2022	Kindergarten	22,073	49,857	44.3%
	Grade 1	25,867	50,185	51.5%
	Grade 2	26,386	49,356	53.5%
	Grade 3	23,582	49,834	47.3%
	All Grades	97,908	199,232	49.1%
2023	Kindergarten	19,930	48,424	41.2%
	Grade 1	25,044	50,826	49.3%
	Grade 2	25,645	49,215	52.1%
	Grade 3	24,104	49,517	48.7%
	All Grades	94,723	197,982	47.8%

Figure 1. Students Identified as At-Risk for Reading Difficulty at Beginning Of Year Compared To Total Enrollment

Data Points of Interest

- Enrollment for SY2022-2023 decreased by 1,250 students from SY 2021-2022.
- The number of students identified as at-risk for meeting proficiency decreased from 49.1% for all K-3rd grade students to 47.8% for all K-3rd grade students.
- In SY2022-2023, 52.1% of all 2nd grade students were at-risk for meeting grade level proficiency, making them the only grade with above 50% at risk.

Question 2

How many students (number and percent) in kindergarten through third grade continue to be at-risk for reading difficulties as determined by the year-end measurement of reading progress? How many students (number and percent) in kindergarten through third grade have successfully completed their program of reading instruction and are reading on grade level as determined by the results of approved reading assessments?

To determine the number and percentage of students considered at-risk for reading difficulties at the end of the year, a calculation was made using the number of students not meeting grade-level reading targets on an Individualized Program of Reading Instruction (IPRI) at the end of the year as compared to the number of students not meeting grade-level reading targets on an IPRI at the beginning of the year. These data were directly reported to the OSDE by districts.

End-of-year data reflect the effectiveness of instruction for students over the course of that school year. It does not reflect the influence (if any) of a summer break. The data do not differentiate between students who have made progress but have not quite reached the goal, students who have maintained growth at the same rate as their peers but have not closed the learning gap, or students who continue to struggle and have fallen further behind their peers.

Table 2. Students Remaining as At-Risk for Reading Difficulty at End of Year Compared to Total Enrollment

	Grade	At-Risk EOY	Total Enrolled	Percent At-Risk EOY
2021	Kindergarten	14,064	47,680	29.5%
	Grade 1	17,932	49,223	36.4%
	Grade 2	18,535	48,045	38.6%
	Grade 3	14,924	47,591	31.4%
	All Grades	65,455	192,539	34.0%
2022	Kindergarten	15,464	49,857	31.0%
	Grade 1	18,229	50,185	36.3%
	Grade 2	18,677	49,356	37.8%
	Grade 3	15,551	49,834	31.2%
	All Grades	67,921	199,232	34.1%
2023	Kindergarten	13,889	48,424	28.7%
	Grade 1	18,651	50,826	36.7%
	Grade 2	19,587	49,215	39.8%
	Grade 3	17,323	49,517	35.0%
	All Grades	69,450	197,982	35.1%

Figure 2. Students Remaining as At-Risk for Reading Difficulty at End of Year as Compared to Total Enrollment

Table 3. Students Completing Individualized Program of Reading Instruction (IPRI) by Meeting Grade-Level Target Prior to End of Year

	Grade	Number of Students on Plan	Number of Students Completed Plan	Percent of Students Completed Plan
2021	Kindergarten	21,835	7,618	34.9%
	Grade 1	27,478	9,221	33.6%
	Grade 2	26,647	7,888	29.6%
	Grade 3	23,605	8,370	35.5%
	All Grades	99,565	33,097	33.2%
2022	Kindergarten	24,221	8,697	35.9%
	Grade 1	26,946	8,640	32.1%
	Grade 2	27,039	8,291	30.7%
	Grade 3	24,057	8,425	35.0%
	All Grades	102,263	34,053	33.3%
2023	Kindergarten	22,723	8,827	38.8%
	Grade 1	27,579	8,918	32.3%
	Grade 2	27,219	7,619	28.0%
	Grade 3	25,756	8,420	32.7%
	All Grades	103,277	33,784	32.7%

Figure 3. Students At-Risk for Reading Difficulty at Beginning of Year Compared to Students who Completed Individualized Program of Reading Instruction (IPRI) by Meeting Grade-Level Target by End of Year

Table 4. Students At-Risk for Reading Difficulty at Beginning Versus End of Year

	Grade	Percent At-Risk BOY	Percent At-Risk EOY	Percent Decreased from BOY
2021	Kindergarten	39.7%	29.5%	-10.2%
	Grade 1	50.4%	36.4%	-14%
	Grade 2	50.3%	38.6%	-11.7%
	Grade 3	45.2%	31.4%	-11.8%
	All Grades	46.5%	34.0%	-12.5%
2022	Kindergarten	44.3%	31.0%	-13.3%
	Grade 1	51.5%	36.3%	-15.2%
	Grade 2	53.5%	37.8%	-15.7%
	Grade 3	47.3%	31.2%	-16.1%
	All Grades	49.1%	34.1%	-15.0%
2023	Kindergarten	41.2%	28.7%	-12.5%
	Grade 1	49.3%	36.7%	-12.6%
	Grade 2	52.1%	39.8%	-12.3%
	Grade 3	48.7%	35.0%	13.7%
	All Grades	47.8%	35.1%	-12.7%

Figure 4. Students At-Risk for Reading Difficulty at Beginning Versus End of Year

Data Points of Interest

- The number of students identified as at-risk for reading difficulties in the beginning of the SY2022-2023 was 94,723 (47.8%). At the end of the year, 69,450 (35.1%) students were identified as at-risk and on a reading plan for intervention. The decrease throughout the year was 12.7% of students needing reading interventions.
- For SY2021-2023, second grade students consistently had the largest percentage of students remaining at-risk at the end of the year. This could be due in part to being expected to perform tasks more independently and having less supports in place than in the earlier grades. Students with foundational gaps may no longer be able to keep up with grade level expectations.

Question 3

How many third-grade students (number and percent) met the performance criteria for the RSA as determined by the Commission for Educational Quality and Accountability on the reading portion of the statewide third-grade assessment?

To determine the number and percentage of students meeting the performance criteria for the RSA on the reading portion of the statewide third-grade assessment, OSTP reading scores were analyzed. The performance levels for the reading portion of the third-grade test identified by the Commission for Educational Quality and Accountability are “Meets RSA Criteria” and “Does Not Meet RSA Criteria.” These scores are determined by using only questions that address Standard 2: Reading and Writing Process and Standard 4: Vocabulary. Additionally, demographic data were analyzed to provide descriptive statistics on reading proficiency and retention by free- and reduced-lunch (FRL), individualized education program (IEP), English learner (EL) status, and race/ethnicity.

Table 5. 2021 Oklahoma State Testing Program (OSTP) Data

Subgroup		Met RSA Criteria		Did Not Meet RSA Criteria		Total	
IEP	IEP – Yes	3,249	38.6%	5,178	61.4%	8,427	17.2%

Data Points of Interest

- The data for SY2021-SY2023 show consistent results for students within the IEP subgroup. Students in this subgroup meeting RSA criteria on the OSTP have remained near 39% for three years.
- The EL and FRL subgroups have made increases in the last three years with the largest increase in the SY2023. EL students that met RSA criteria increased from 48.3% in SY2021 to 48.9% in SY2022, and 51.1% in SY2023. Students in the FRL subgroup that met RSA criteria increased from 57.3% in SY2021 to 58.6% in SY2022 and then 61.3% in SY2023.
- White and Asian subgroups are at least 4.6% more likely to meet RSA criteria than any other subgroup with the greatest disparity being between the Pacific Islander (47.7% met RSA criteria) and White (76.9% met RSA criteria) subgroups. The disparity between the Pacific Islander and White subgroups is 29.2%, while the disparity between the Pacific Islander and Asian subgroups is 27.6%.
- In SY2023, all subgroups for race/ethnicity demonstrated an increase in the number of students who met RSA Criteria except for Asian students.
- Hispanic students who met RSA Criteria increased from 44.1% in SY2022 to 59.1% in SY2023, which is a 15% increase, the largest increase in any subgroup population.

Question 4

How many third-grade students participated in the Oklahoma State Testing Program (OSTP) and, of that number, how many met reading proficiency on a screening instrument, how many were promoted through each of the good-cause exemptions, how many were retained, and how many were promoted through probationary promotion? How does reading proficiency vary by socioeconomic status, learning disability status, English learner (EL) status and race/ethnicity?

Through the Reading Sufficiency Act, students have four pathways to promotion to fourth grade:

- *Pathway 1:* Meet RSA criteria on the reading and vocabulary portions of the OSTP;⁶
- *Pathway 2:* Demonstrate reading proficiency through one of the approved screening assessments;⁷
- *Pathway 3:* Meet the requirements for one of the seven good-cause exemptions;⁸ and
- *Pathway 4:* Obtain a unanimous decision by the Student Reading Proficiency Team (SRPT) to be promoted with probation.⁹

To determine the number of students promoted by each of the pathways or retained, districts reported the data to OSDE. Any discrepancies between the data in this section and that in the previous section may be due to the variations in reporting structures. When reporting promotion decisions, districts often indicate all promotion options that a student may be eligible for. In this case, those data are reported here as a hierarchy. Students with multiple promotion pathways are tallied in the order of the pathways. For example, if a student qualified for promotion through both a screening assessment (Pathway 2) and good-cause exemption 5 (Pathway 3), the student was included in the data for Pathway 2 only.

⁶ See *Third Grade Reading Proficiency* (70 O.S.§1210.508C (I)(4))

⁷ See *Third Grade Reading Proficiency* (70 O.S.§1210.508C (I)(1))

⁸ See *Good Cause Exemptions* (70 O.S.§1210.508C (L))

⁹ See *Probationary Promotion* (70 O.S.§1210.508C (I)(5))

Data Points of Interest

- Table 8 shows that in SY2023 34,702 (70.0%) of students were promoted by meeting RSA Criteria on OSTP assessments, an increase from 33,755 students (67.7%) in SY2022.
- Due to the other pathway options such as screeners, good-cause exemptions, and school reading proficiency teams (SRPTs), the actual percentage retained remained fairly consistent with years prior at 1.9%, decreasing only slightly from 2.0% in SY2022 and 2.4% in SY2021.
- Table 9 shows that good-cause exemption 5, Making Progress on IEP Goals, was most commonly used at 60.4%.
- In SY2021, 5,680 students met RSA criteria through a screener compared to 3,552 in SY2022, and 2,598 in SY2023. This number has decreased as the number of students passing the RSA criteria on the OSTP assessment has increased.

RSA Funding Allocations

Question 5

What funding was appropriated to each district for reading remediation?

The State Department of Education Office of State Aid maintains records of funding allocated to each district. Those amounts are reported here.

Since Fiscal Year 2014, RSA funds have been allocated and paid without districts submitting claims for reimbursement. Instead, the total allocation has been disbursed to districts for their use throughout the year. Funds are disbursed after every school site serving kindergarten through third-grade students has certified their Beginning of Year data report and has submitted an Annual District Reading Plan that has been approved by the Oklahoma State Department of Education. Funds are generally received by districts in December of each year.

RSA funds may be used for the following:

- Salaries for teachers and teaching assistants for before-school and after-school programs
- Summer school teachers and during-school reading interventionists
- Data processing services, software services and internet services
- Printing and binding, copy supplies and office supplies
- Instructional materials for students identified and placed on a program of reading instruction
- Approved screening assessments, academic student assessment supplies and materials
- Books, state-adopted textbooks, supplemental non-state-adopted textbooks, workbooks, magazines, approved technology-related equipment and reading software
- Contracted services (non-payroll personnel) for offsite, onsite or online professional development training
- Travel and registration fees for teachers, paraprofessionals and interventionists to attend approved RSA professional development training
- Salaries for bus drivers providing student transportation for before- and after-school programs or the Summer Academy Reading Program for RSA

STATE	ALL DISTRICTS	\$10,999,810.50	\$12,000,106.74	\$13,000,283.52

Data Points of Interest

- The per-student funding allocation for SY2022-2023 was \$133.88, while SY2021-2022 was \$121.93. To be considered fully-funded, the RSA allocation should be \$150 per student.
- The total amount of RSA funding distributed to schools was \$13,000,283.52 for SY2022-2023. This is the highest overall allocation, however due to the larger number of students at-risk, the per-student allocation was slightly below the per-student amount in SY2020.

Screening Instruments, Instructional Practices, and Remediation Efforts

Question 6

What screening instruments are being used to identify reading deficiencies and monitor reading progress?

Screening assessments are brief tests that are valid, reliable, and evidence-based. They are used with all students to measure their skills in each of the five components of reading: phonemic awareness, vocabulary, phonics, reading fluency and comprehension. These tests help teachers identify students with reading deficiencies and, together with diagnostic assessments, drive instruction toward the specific needs of their students. The assessments on this list meet criteria for reliability and validity, as well as alignment to the Oklahoma Academic Standards. Districts were able to choose which of the screening assessments best fit their needs.

The approved screening assessments from which districts could choose for SY2022-2023 are shown below in Table 16. Most districts identify one screening assessment that will be used for students in kindergarten through grade 3. Some districts choose to use one assessment for some grades and a different for other grades. For this report, those districts have been identified as “mixed use” of assessments.

Table 15. Screening Assessments Approved for SY2022-2023

Approved Screening Assessment	Publisher
Acadience	Acadience Learning, Inc.
AimswebPlus	Pearson
Amira	Amira Learning
FastBridge	Illuminate Education
Istation	Imagination Station
MAP Reading Fluency	NWEA
mCLASS DIBELS 8th Edition	Amplify Education, Inc.
Star Early Learning Suite	Renaissance Learning, Inc.

Figure 6. Screening Assessments Used by School Sites in SY2022-2023

Data Points of Interest

- 442 of 902 school sites (49%) reported using Star Early Learning as their screening assessment for SY2022-2023.
- Of the approved screening assessments for SY2022-20223, 4 assessments fell under 5% of use by school sites (73 sites total).
- 122 school sites (14%) reported mixed use, using unique screeners for different grade levels.

Question 7

What types of reading instructional practices, instructional methods and remediation efforts are currently being used by districts?

A survey was sent to Oklahoma teachers and administrators to gain feedback on the types of instructional practices and methods being used for both core and supplemental instruction in kindergarten through third grade, as well as supplemental practices to aid students after third grade who were promoted through a good-cause exemption or the Student Reading Proficiency Team (SRPT). Responses to the survey do not represent all districts and reflect a limited number of educators.

For this question, respondents were asked to identify the instructional practices or methods regularly used as part of on-grade-level core instruction for all kindergarten through third-grade students.

Table 16. Instructional Practices and Methods for Tier 1 (Core Instruction) for Students in Grades K-3

Table 17. Instructional Practices and Methods for Students in Grades K-3 Who Are Not Meeting Grade-Level Targets

Table 18. Instructional Methods and Practices for Students After Grade 3 Who Were Promoted with Good-Cause Exemptions or with Probation by the Student Reading Proficiency Team

Data Points of Interest

- 91.4% of schools who responded to the survey report implementation of the required 90-minute reading instruction time allocation.
- 80- 88% of schools reported explicit, direct instruction in phonemic awareness, vocabulary, and phonics as shown in Table 16. Explicit and direct instruction in these areas is proven to support reading proficiency for all students.
- As shown in Table 16, guided reading with leveled books, listening to the teacher read aloud, and sight word memorization are being used by more than 60% of survey respondents. However, some of these instructional methods are not supported by evidence or research in the ability for all students to meet grade level targets.
- For students who are promoted through a good cause exemption, a varied list of supports and interventions are reported. Regular monitoring of student progress was reported at 82%, although 100% of students promoted should be regularly monitored.

Question 8

What types of reading resources do students have access to outside of school?

This question asked respondents to identify the reading resources available to students outside of school. This could include resources used after school, on weekends during the school year or over the summer. Several respondents indicated they were not aware of the resources available to students. It is important to note that while respondents report that these resources are available to students, it does not mean that all students have equitable access to reading resources dependent on factors outside of the responsibility or control of the school or student.

Table 19. Reading Resources Accessible to Students Outside of School

Data Points of Interest

- As Table 19 shows, electronic or online reading programs and resources and public library access are reported as the top resources offered to students outside of school at 66.8% and 80.4%, respectively.
- All other resources, except for the use of the school library, are reported as being made available under 30% of the time.
- Many of the responses listed in this table and in the “other” category are based on specific school and community program availability.

Conclusion

Data shows that Oklahoma students are continuing to make gains since the pandemic that disrupted learning. While not yet reaching pre-Covid levels, data is showing improvement, demonstrating that recovery efforts are having a positive effect. To help student achievement continue to improve, Oklahoma continues to focus on three primary goals: selection and implementation of high-quality instruction materials, teacher supports to implement the science of reading, and ongoing intervention support and training. These goals work to provide for a comprehensive approach to reading instruction that ensures students receive needed instructional support to be proficient in reading by the end of grade 3.
