OKLAHOMA TURNPIKE AUTHORITY

3500 Martin Luther King Avenue - P.O. Box 11357 - Oklahoma City, Oklahoma 73136-0357 - 405-427-8331

M E M O RA N D U M

Date: November 4, 2025

From: Wendy Smith

Subject: Adopted 2026 Annual Budget

To: Authority Members

On November 4, 2025, the Authority adopted the calendar year 2026 Annual Budget. The 2026 Annual Budget totals \$165,056,062 for operations and maintenance of the Turnpike System. A detailed Capital Plan covering the years 2026-2030 can also be found.

The Construction Budget contains details regarding the Authority's progress in its planned ACCESS program. The ACCESS Oklahoma Program focuses on improving highway safety for motorists, increasing travel time reliability, easing congestion in metropolitan areas, moving freight across the State, and adding access to communities that previously were not connected to turnpikes. The new turnpike corridors in the ACCESS Oklahoma Program will connect Oklahoma's existing highway system and provide reliever routes for Oklahoma's most congested highways, especially for commercial truck traffic.

Additional details regarding the adopted budget and each division with its associated branches is provided in the budget document.

This budget has been prepared based on criteria established by the Government Finance Officers Association (GFOA).

Sincerely,

Director of Finance

OKLAHOMA TURNPIKE AUTHORITY

3500 Martin Luther King Avenue - P.O. Box 11357 - Oklahoma City, Oklahoma 73136-0357 - 405-427-8331

MEMORANDUM

Date: November 4, 2025

From: Wendy Smith

Subject: Adopted 2026 Annual Budget

To: Authority Members

ACCESS Oklahoma Program

The Authority's work on the ACCESS Program continues. Following months of study, public input and initial design work, a revised South Extension Turnpike alignment to the west of the 2022 proposed alignment was shared with the public on September 23. OTA scheduled three Homeowner Open Houses in the days following the announcement. Although the OTA has communicated with a wide range of people in the area up to this point, OTA will prioritize its focus to those property owners who may be impacted. As engineering design progresses, property owners will be kept up to date about the parcels needed. The final design that will determine property acquisition is more than a year away, but OTA will continue to be available to those property owners to answer questions throughout the process.

The ACCESS Oklahoma access improvements and expansion program known as "ACCESS Oklahoma: Advancing and Connecting Communities and Economies Safely Statewide" was announced in early 2022. This ACCESS Oklahoma Program, to be undertaken in cooperation with ODOT, includes plans to make major investments in the Turnpike System to improve traffic safety, and facilitate better movement of products and people, in urban and rural areas of Oklahoma.

The ACCESS Oklahoma Program focuses on improving highway safety for motorists, increasing travel time reliability, easing congestion in metropolitan areas, moving freight across the State and adding access to communities that previously were not connected to turnpikes. The new turnpike corridors in the ACCESS Oklahoma Program will connect Oklahoma's existing highway system and provide reliever routes for Oklahoma's most congested highways, especially for commercial truck traffic.

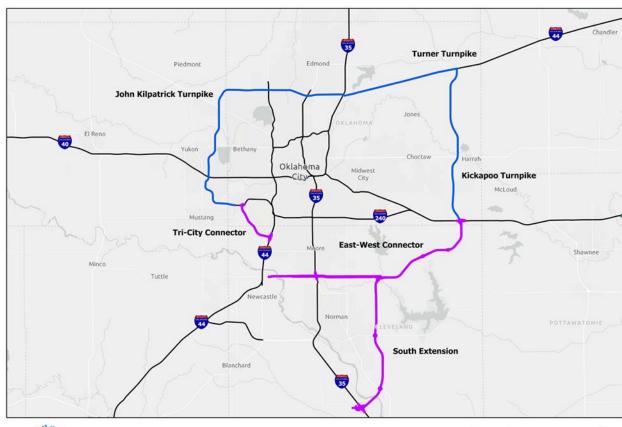

The ACCESS Program continues to have support from many Oklahoma communities, chambers of commerce, local businesses and community members, the Governor and Oklahoma Legislature, among other community advocates across Oklahoma. Following the completion of recent projects such as the Kickapoo, the Gilcrease Expressway and the John Kilpatrick extension, many communities have offered tremendous feedback on the future of the Turnpike System and are seeking opportunities to coordinate infrastructure planning with their ongoing community development efforts.

Although the ACCESS Program has support for communities across Oklahoma, it is not unusual for the Authority, pursuant to the Enabling Act, to seek a judicial determination of the validity of a proposed issuance of turnpike revenue bonds. The Authority from time to time has sought such judicial determinations, especially with respect to new turnpike financings and initiatives of the Authority. On thirteen prior occasions, the Oklahoma Supreme Court has issued opinions affirming the validity of the Authority's bonds.

To that end, on August 10, 2022, the Authority filed a petition with the Oklahoma Supreme Court seeking a judicial determination of the validity of the Second Senior Bonds (including the Series 2023 Bonds) proposed to be issued by the Authority for the ACCESS Oklahoma Program. After approximately one year, the Oklahoma Supreme Court ultimately ruled in favor of the Authority and approved the issuance of the Second Senior Bonds, including the Series 2023 Bonds and all the additional issuances of Second Senior Revenue Bonds necessary for financing the ACCESS Program.

With that approval, studies continue for the projects included in the ACCESS Oklahoma Program. These projects are to be financed from proceeds of the Series 2023 Bonds, the Series 2025A Bonds and additional issuances of Second Senior Revenue Bonds over the next decade.

The ACCESS Oklahoma Program includes both new Turnpikes and improvements to existing Turnpikes described on the next few pages. The current planned alignments of the new Turnpike are shown on the map on the following page:

ACCESS - Outer Loop

New Turnpikes

<u>Outer Loop – East-West Connector</u>. The East-West Connector is planned as a new high-speed expressway facility constituting the southern section of the "Outer Loop" expressway system that the Authority intends to complete around the Oklahoma City area. The East-West Connector is planned to extend from west to east from I 44 in the Tri-City area (Newcastle, Blanchard and Tuttle) at SH 37, crossing the South Canadian River, east to I 35, then continuing east along the alignment of the existing Indian Hills Road, and then northeast to I 40, connecting to the Kickapoo Turnpike. The project is intended to expand mobility within the south Oklahoma City metropolitan area by providing greater access to the cities of Moore and Norman.

<u>Outer Loop – Tri-City Connector</u>. A high-speed expressway facility constituting a portion of the southwestern section of the planned Outer Loop around the Oklahoma City area. The project is expected to extend from the John Kilpatrick Turnpike terminus at SH-152 (Airport Rd), around the southwestern side of Will Rogers World Airport, to I-44 north of the South Canadian River. The Authority's purpose in constructing the Tri-City Connector is to connect the southwest Oklahoma City area to the rest of the metropolitan area and complete a portion of the Outer Loop. It is intended to increase access and offer an alternative route from I-40 west of Oklahoma City to I-44 and (via I-44 and the East-West Connector) I-35 on the south side of the city.

South Extension Turnpike. The South Extension is planned as a new high-speed expressway facility starting from a point on the East-West Connector near the current intersection of E. Indian Hills Road and between 48th Ave and 60th Ave NE east of Norman and extending south and southwest to I-35 near Purcell. The project is intended to expand mobility within the southeast sector of the Oklahoma City metropolitan area by providing greater access to communities in the area. The South Extension is anticipated to be a vital corridor for the transportation network of central Oklahoma by providing an alternate route connecting I-44 east of Oklahoma City (via the East-West Connector) and I-35 south of Norman, serving traffic between southern, eastern and northeastern Oklahoma.

The ACCESS Oklahoma Program is expected to include a north extension of the newly completed Gilcrease Expressway, but like the rest of the Gilcrease Expressway, the new extension is not expected to become part of the Oklahoma Turnpike System.

In addition to the new Turnpikes, the ACCESS Oklahoma Program includes improvements to existing Turnpikes.

Improvements

Turner Turnpike: Projects are expected to consist primarily of reconstruction and safety upgrades, including the continuation and completion of reconstruction and widening of the section between I-35 in Oklahoma City and SH-66, east of Bristow, adding lanes, improving and adding interchanges and completing other safety features. These projects are intended to create an "urban turnpike corridor" allowing for the potential future addition of truck-specific and high-occupancy vehicle (HOV) lanes for quick and safe access through the corridor.

John Kilpatrick Turnpike: Projects are expected to include continuation and completion of planned improvements that began in 2012 between I-40 west of the city and I-35 north of the city, including the addition of new driving lanes, safety enhancements, and greater access on and off the turnpike. In addition, the addition of a new interchange at County Line Road, new eastbound on ramp at Council, and modification of the existing interchange at SH-74 are intended to provide for more efficient mobility between the municipal and State highway systems and the Turnpike System.

Will Rogers Turnpike: Projects include reconstruction and widening to add additional lanes and enhanced safety features for travel between US-412 in Catoosa and SH-20 in Claremore, as well as improved access at Pine Street in Tulsa. The projects are intended to allow for the future creation of truck-specific and HOV lanes for quick and safe access throughout the corridor.

In addition to the preceding improvements, the ACCESS Oklahoma Program is expected to include new and improved interchanges and other facility updates throughout the remainder of the Turnpike System, including new interchanges on the Cimarron Turnpike, the H.E. Bailey Turnpike and the Indian Nation Turnpike, as well as improvements to bridges and interchanges on the Creek Turnpike, the H.E Bailey Turnpike, the Muskogee Turnpike and the Indian Nation Turnpike.

During 2026, the Oklahoma Turnpike Authority will continue to hire consultants and additional professional services to confirm details and continue conceptual design plans for this comprehensive long-range plan. These consultants involve traffic modeling, financial planning, engineering, and working with community partners. More information pertaining to the program is available at www.ACCESSOklahoma.com. The website is updated regularly with new information.

Driving Forward Program

As a part of the Driving Forward Program, two new alignments, the Kickapoo Turnpike and the Southwest John Kilpatrick Turnpike Extension, were completed and open to traffic by late 2020, slightly earlier than the projected opening dates. The final Driving Forward project on the east end of the Turner Turnpike was completed in late 2023. This project also completed the Driving Forward portion of the widening to six lanes of the Turner Turnpike between Tulsa and Kellyville.

"With the I-44/Turner Turnpike Rt. 66 bridge on the east end in Tulsa, we have now completed all facets of the Driving Forward Program," former director of the Oklahoma Turnpike Authority, Tim Gatz said. "If you will remember, that was a fracture critical bridge, (it was a) very unusual and uniquely designed bridge. It was somewhat challenging to get to and from Route 66 and did not serve our citizenry very well. That partnership project with the Oklahoma Department of Transportation has changed that dynamic; we enhanced safety and made a critical investment in Oklahoma's transportation infrastructure and our future."

Gatz mentioned this is another recognition of Route 66 ahead of the state's celebration of the upcoming centennial for Route 66 in 2026. "Once again, the Turnpike Authority has participated in and developed iconic recognition of Route 66 as well as enhanced safety," he said.

While the Driving Forward Program started the widening process of the I-44/Turner Turnpike, the remaining 70 miles of the corridor connecting Tulsa with Oklahoma City is slated for reconstruction and widening in the ACCESS Oklahoma long-range plan,

Financial Health

Misconceptions regarding the Authority's finances continue to be purported, rather, the facts indicate strong financial health. An audit of the Authority's financial statements must be performed annually in accordance with generally accepted auditing standards in compliance with Oklahoma State Statute and the requirements of Section 711 of the OTA's Trust Agreement. Under the covenants of the trust indenture, the audit must be performed by an independent firm of certified public accountants of recognized ability and national standing. The OTA's external auditor, as selected through a competitive process and as approved by the Turnpike Authority Board, completed the annual audit for the year ended December 31, 2024. It is available on the OTA's website.

In conjunction with the second bond funding for the ACCESS Program, on December 17 & 18, 2024, the Oklahoma Turnpike Authority, along with its Consulting Engineer, Traffic Engineer, and General Counsel, did two-hour conference calls with all three rating agencies, including Moody's Investors Service, S&P Global Ratings, and Fitch Ratings. These calls serve as a review of the Authority's current financial position, future traffic levels, pavement and bridge ratings, as well as future long-term capital spending.

Investors utilize credit information from either a single agency or multiple rating agencies. Investors expect credit rating agencies to provide objective information based on sound analytical methods and accurate statistical measurements. These ratings affect borrowing costs, interest rates, investment decisions, and risk management strategies. Entities with higher ratings ultimately get easier access to capital at more favorable terms. All three rating agencies affirmed the Authority's AA-or equivalent rating ahead of the second ACCESS Oklahoma related bond sale.

Moody's Ratings stated that OTA's Aa3 rating and stable outlook reflects the recent toll rate increases implemented Jan. 1 that will strengthen debt service coverage ratios during the ramp-up of the ACCESS Oklahoma long-range plan. Moody's also cited OTA's history of strong project and toll rate management as well as strong financial metrics in the early part of the long-range plan.

Fitch Ratings cited the OTA's healthy financial position due to stable traffic and revenue growth in maintaining their AA- level rating and stable outlook.

In maintaining its AA- rating, S&P Global Ratings cites a mature Turnpike System that has shown resilient demand through different economic cycles along with strong management with the ability to adjust operating expenses and its debt issuance schedule, when necessary.

These ratings are among the highest ratings available to toll authorities. Ratings in the AA category are judged to be of high quality and subject to very low credit risk.

All three pointed out the Authority's strong management. Those comments are a credit to every staff member in the organization, from those people that keep the toll system operating--to the maintenance workers that keep the roads clear and safe--to

the Customer Service Representatives who work the phones along with everyone else who keeps this agency up and running.

This strong management served the Authority well during the COVID-19 Pandemic in which it took significant measures to ensure that it could continue servicing its customers and bondholders despite the negative impact on the Authority's toll revenues. With those measures in place, the Authority ultimately was one of the fastest toll entities to return to pre-COVID financial conditions.

Ultimately, with this strong management history, the Authority has proven its capacity to balance the pace of the debt over the life of the ACCESS Oklahoma Program while also closely monitoring the timing of the revenue stream. OTA is proud to continue to keep these well-earned ratings through the first two ACCESS bond issuances, the first being the Series 2023 bonds, with the second bond issue, the Series 2025A Bonds, being the biggest issuance in the Authority's history.

The Authority posted its Preliminary Official Statement 15 days prior to the date of pricing, with in-person investor presentations in several cities following shortly, thereafter, giving investors the opportunity to meet with Authority officials and adequate time to review the ACCESS Program, the plan of finance, and other key updates of the Authority. Several one-on-one meetings were also held with investors via videoconference. The feedback was positive, and no investors expressed concerns regarding litigation, the investigative audit or any other matters to either the Authority, the underwriting syndicate, or the sales force.

OTA ended up leading the market on that date and ultimately, the strength of the credit and management team, as well as the investor roadshow and syndicate's premarketing initiatives, resulted in a very successful pricing. The transaction garnered over \$9 billion in orders in the original pricing, resulting in an almost 9X oversubscription. This allowed the underwriter to significantly lower yields, which ultimately led to a lower borrowing cost for the Authority.

On February 4, 2025, the Authority closed on the delivery of \$1.11 billion in Series 2025A Second Senior Revenue Bonds, its second bond issue of the program. The OTA's total all-in cost of capital for this transaction was just under 4.55%.

Future Turnpike System Capital Concerns

With the System's two oldest turnpikes, the Turner and Will Rogers, opening to traffic in the 1950's and three more, the H.E. Bailey, Muskogee, and Indian Nation, opening to traffic in the 1960's, the Oklahoma Turnpike System's biggest challenge is aging infrastructure with some of the Authority's most notable capital challenges. As Oklahoma grows and traffic volumes increase, this becomes even more relevant, with some of the heaviest used turnpikes being the ones that make up the I-44 corridor. This corridor carries some of the highest out-of-state traffic across the Turnpike System. These capital challenges can be found below:

- a. Safety Improvements
- b. Pavements
- c. Bridges
- d. Capacity

In order to address these needs, the Authority prioritizes its capital needs by:

- Identifying the maintenance, rehabilitation and improvement needs of its existing system for the next 20 to 30 years; and
- Instituting a five-year maintenance and rehabilitation program designed to keep existing turnpikes in good condition thereby maintaining traffic flows and extending the useful life of the turnpikes

The maintenance, rehabilitation and improvement projects included in the five-year program are designed to significantly increase the functionality and condition of the entire Turnpike System. The five-year maintenance program is reviewed and updated on an annual basis.

The Capital Plan for the years 2026-2030 totals \$808,733,177 and includes \$307.9 million for Paving Rehabilitation, \$40.1 million for DBR Resurfacing, \$121.4 million for Bridge Rehabilitation, \$34.6 million in Shoulder and Guardrail improvements, \$12.5 million in Concrete Panel Lifting, \$8.0 million in Safety, Surface Treatment and Striping, \$15.0 million in Message Boards and Cameras, \$11.5 million in Maintenance Facility Upgrades, \$12.1 million for Highway Patrol related items, \$13,5 million in Maintenance Equipment, \$27.5 million set aside for the Gilcrease Turnpike, \$9.5 million in Interchange improvements, \$176.5 million in IT and Tolling related items and \$18.6 million in other capital projects.

A New Era for Tolling

PlatePay, the system replacing cash toll booths, helps create a free flow of traffic and eliminates sudden speed changes when motorists maneuver lanes to stop at a toll booth and then re-enter high-speed traffic. Eliminating these conflict points significantly increases safety on Oklahoma's Turnpike System, which saw more than 500 crashes at tolling booths in the six years prior to cashless conversion starting in 2021. This change also offers customers the ability to conveniently pay their tolls online and never be distracted by reaching for cash while driving.

The Authority began working on cashless tolling with a pilot project at one interchange on the Creek Turnpike in Tulsa in January 2017. In July 2021, the John

Kilpatrick Turnpike corridor in Oklahoma City was the first full turnpike to convert to cashless tolling. Following the model of the John Kilpatrick Turnpike, the Authority converted the Kickapoo Turnpike, the H.E. Bailey Turnpike, the Chickasaw Turnpike and the Cimarron Turnpike to cashless tolling over the course of 2022. The Gilcrease Turnpike also opened as a cashless tolling facility in November 2022. In 2023, the Creek, Cherokee, and Muskogee Turnpikes converted to cashless tolling, and in 2024, the Turner Turnpike, the Will Rogers Turnpike, and the Indian Nation Turnpike converted, with the entire Oklahoma Turnpike System being converted to cashless as of November 21, 2024. The Authority effectively accelerated its initial cashless conversion plan from 10 years to just more than four years due to safety concerns for both motorists and employees.

Motorists may now keep on rolling with cashless tolling on all 12 Oklahoma turnpikes. The last turnpikes to switch to open road tolling occurred in November 2024 on the I-44/Will Rogers Turnpike corridor between Tulsa and the Missouri state line as well as the Indian Nation Turnpike.

This completes the conversion to cashless and allows traffic for non-stop travel to accommodate the larger volume of vehicles traveling through Oklahoma. Motorists may now travel more safely and conveniently, allowing them to pay online.

PlatePay cameras photograph a vehicle's license plate, enabling the Authority to send the vehicle's registered owner an invoice for their turnpike travel. Motorists without a PIKEPASS will receive a bill in the mail or they may look up and pay their toll amount online at www.platepay.com about five days after traveling a turnpike.

PIKEPASS remains the most cost-effective way to travel Oklahoma turnpikes, providing customers with the lowest toll rate. The toll tag also offers seamless travel on turnpikes within our partner states, including Kansas, Texas as well as some toll roads in Colorado and Florida.

PIKEPASS Brand Refresh

As part of the move to cashless tolling with PIKEPASS and PlatePay, the Oklahoma Turnpike Authority also launched a brand refresh of the PIKEPASS logo and of pikepass.com. Those visiting the website will find the updated logo, new colors enhancing the look and feel, improved navigation and content. The website platform is built on enhanced technology and is mobile responsive.

The PIKEPASS logo debuted in 1991 when the Authority first launched all electronic tolling on the Turnpike System. This is the first update to the PIKEPASS brand in 33 years. The most striking change to the refreshed logo is its color scheme. Gone is the red that so many identified as vehicles stopping at cash toll booths. The logo is now a deep blue that transitions to green to convey to customers that they now will enjoy non-stop travel across the Turnpike System. A secondary use of the new logo provides an updated tagline as well emphasizing that Oklahoma's turnpikes are Safe. Efficient. Reliable.

The new logo has been updated in phases across the Authority's communications. It will be updated on turnpike signage as signs need replacing for age or condition.

Interoperability

PIKEPASS continues to work to be interoperable with various agencies around the country and is currently interoperable with a number of toll agencies listed below:

- North Texas Tollway Authority which became officially functional on August 10, 2014:
- Kansas Turnpike Authority which became officially functional on November 1, 2014; and
- Central United States Interoperability HUB ("CUSIOP Hub") went live May 2017 and is complete with the addition of the Texas Department of Transportation, the Central Texas Regional Mobility Authority, the Harris County Toll Road Authority and the Fort Bend County Toll Road Authority to the network of toll agencies interoperable with PIKEPASS.
- In early March of 2023, four agencies of the CUSIOP Hub including the Authority, became interoperable with the Florida entities of the Southeastern Interoperability (SEIOP) Hub comprised of Florida Turnpike Enterprise; Lee County; Miami-Dade Expressway Authority; and Tampa Hillsborough Expressway Authority.
- The CUSIOP Hub welcomed its first Colorado Agency, E-470 in June 2024.

Gilcrease Expressway Project

The OTA is the owner and operator of the Gilcrease Expressway West after working and completing a funding partnership with the City of Tulsa, Indian Nation Council of Governments, Tulsa County, ODOT, the U.S. Department of Transportation (USDOT) and a competitively selected Project Company to each partially finance the construction of the Gilcrease Turnpike.

Contemplated as a Driving Forward Project, the Oklahoma Turnpike Authority established this funding partnership for the construction of the Gilcrease Expressway West Project. This project delivery method is the first of its kind in the State of Oklahoma and fulfills a critical transportation need for the western Tulsa Metropolitan Area.

The five-mile, four-lane roadway includes an adjacent multi-use trail and features 22 bridges, including the two most expensive Arkansas River crossings. This extension from I-44 to West Edison Street is a toll road owned and operated by the Oklahoma Turnpike Authority, utilizing cashless toll collection including PIKEPASS and PlatePay.

The OTA Board passed several resolutions to facilitate the finance, construction and ultimately the maintenance and operations of the Gilcrease Expressway. No single entity was able to finance and construct the Gilcrease Project, thus the need to form the partnership among the various entities to leverage available resources. The Authority received 22 responses from interested parties after issuing a Request for Information to the private sector, which helped form the project delivery method. In May 2018, a Public Sector Comparator was completed that determined a Build-Finance delivery method was the most cost effective for the OTA. In June 2018, the Authority issued a Request for Qualifications. These responses were received on August 22, 2018 and the Authority shortlisted potential private collaborates on September 25, 2018. A Request for Proposals was issued to shortlisted respondents on April 17, 2019, and the OTA Board awarded the

contract to AECOM-Duit Joint Venture team on July 23, 2019, eventually becoming Gilcrease Developers, LLC.

The project relied on several sources of funding. In late May 2018, the ODOT Grant Anticipation Revenue Vehicle (GARVEE) bonds were issued as an additional funding source for the project in the amount of \$71.4 million. The OTA provided cash contributions and the Project Company provided \$125 million in interim financing during the construction period. The Authority also sought access to a low-interest federal Transportation Infrastructure Finance and Innovation Act (TIFIA) loan from the USDOT, which allowed the OTA to take out the Project Company's interim financing. The OTA cash contributions, GARVEE proceeds, and short-term private sector financing completed the cost to complete the project. The Oklahoma Development Finance Authority issued \$125 million of limited obligation revenue bonds on behalf of the Project Company and reached financial close on January 30, 2020. The OTA reached financial close on the roughly \$120 million TIFIA loan in May 2020. Construction began in early February 2020 and opened to traffic in mid-November 2022.

The Gilcrease's transactions have continued to climb throughout 2025. The public continues to discover this route and with that popularity continuing to increase, the Gilcrease Expressway project recently received a ratings upgrade from Moody's Investor Services, which improved the rating from Baa3 to Baa2.

Moody's Investor Services, an independent company that provides financial research and credit ratings on bonds/loans issued by government entities. The Gilcrease Expressway is a stand-alone facility without the support of the OTA System toll revenue and receives a separate rating from the OTA System. A portion of the project was financed with a loan from TIFIA at a rate of 1.35%. One of the terms of that loan agreement is that the project requires a ratings review annually prior to June 30, and the following reasons led to the upgrade:

- Moody's analysts reviewed the performance of the facility, projected operating results and management practices of the OTA to make its determination.
- The higher-than-expected performance, higher future projected traffic and revenue during the ramp-up period of a start-up facility, annual Assistance Payments and conservative management were key factors in their review.
- Although OTA is the owner & operator of this project, there were multiple partners for this project, including ODOT. OTA provides additional support for the Gilcrease, with ODOT serving as a passthrough of the payments to the Trustee from the OTA General Fund as the source of the payments pursuant to the Assistance Agreement.

Operating & Maintenance

System Revenue Projections

Revenues through July 31, 2025, are approximately 8.8% over budgeted projections. Revenues from non-passenger vehicles constituted just over 42% of the Authority's toll revenues in 2024. The increases of heavy truck traffic have continued throughout 2025, a good indicator of a thriving economy.

Projections of operating revenue generated for the Oklahoma Turnpike System are performed by the Authority's traffic engineer, CDM-Smith. CDM-Smith was retained by the Oklahoma Turnpike Authority to conduct a system traffic and revenue study for the Oklahoma Turnpike System in conjunction with the ACCESS Program's long-term financing plan.

The study took into account socio-economic factors such as population growth and employment trends, current turnpike performance data, recently collected data on the congestion characteristics along the anticipated ACCESS Program projects, and a revised and updated macroeconomic and toll revenue-forecasting methodology to estimate the long-term growth potential of the respective turnpikes. Future year demand for the OTA System was also estimated using a series of these analyses including multivariate regression analysis of historical traffic and toll revenue trends, and analysis of Oklahoma City and Tulsa area travel demand using local metropolitan planning organization (MPO) models.

More information regarding the System's Traffic and Revenue Study can be found in the Financial Budget Summary Section under Revenue Projections.

O&M Expense Budget

OTA has begun ramping up its work on the ACCESS Oklahoma Program following the issuance of the Series 2025A bonds. Along with additional costs associated with that program, the Authority continues to change its toll collection model, which ultimately will give our customers more choice and convenience. These initiatives and others have increased the 2026 Operating and Maintenance Budget to a level of \$165,056,062, a 5.62% increase over 2025. The most significant changes to the budget are highlighted on the following page:

Significant Impacts to the Operating Budget

Increase due to a change in funding source

\$6.9 million

Regularly, projects are reviewed to determine if they continue to be "in development" and therefore eligible for funding from the General Fund or "in production" where they would more appropriately be funded from O&M. This increase represents a transfer of funding from the General Fund to operations to reflect that certain projects such as cashless tolling were put into production. The entire system became cashless as of November 24, 2024.

Increase funding related to tolling

\$1.7 million

This increase reflects adjustments made as revenue transactions and the Authority's customer base continues to grow. Additional resources are being allocated to manage that expected growth as well as anticipating new partners for interoperability and tag fulfillment. These adjustments are necessary to ensure seamless operations and maintain customer service standards.

Other significant changes

\$0.1 million

This increase reflects funding to meet increased bond market obligations, and expenses related to the oversight and continued implementation of the ACCESS Program and other programs. These investments are necessary to sustain the long-term success of ACCESS Oklahoma and to maintain the safety, efficiency, and reliability of the system.

Details of the 2026 budget for the Oklahoma Turnpike Authority are contained within this document. The budget contains a summary of expected revenues and expenditures, debt service coverage, and division summaries. There are four major budgets presented within this document: the General Fund Budget and Reserve Maintenance Budget, which fund the Capital Plan, as well as the Construction Fund and the Operating & Maintenance Budget. Within the Operating and Maintenance Budget, there is a summary for each division as well as each branch's total operating expenditure types (personnel services, contractual services, and commodities). Each division and branch has a detail of expenditures by account and a detail of employees by position. Some divisions also show a detail of the proposed budget by location (turnpike). There are also various graphs throughout this document to better illustrate past achievements through previous budgeted programs.

The following contains the highlights of each division's 2026 Annual Budget.

Division Budget Highlights

Authority

The Authority consists of the Governor (member ex-officio) and six members serving without pay for eight-year terms from districts established in the State statute. The 2026 budget for this division remains the same, with a budget of \$5,000.

Comptroller

The Comptroller Division is organized into three branches to achieve the following goals:

Administration: This branch provides supervision and oversight to the Comptroller Division. Included in this branch are OTA's Comptroller and Assistant Comptrollers. Responsibilities of this branch of the Comptroller Division include: providing advice to Executive Management on fiscal policies and issues; overseeing all work within the division, as well as the preparation of interim and annual financial reports; assuring that the financial requirements of OTA's Trust Indenture are met; and carrying out all other general administrative functions for the division.

Cash Management: This branch is responsible for timely and accurate recording and reconciliation of OTA's revenue transactions that are processed through its *PIKEPASS* and PlatePay subsidiary ledgers; supports the revenue reporting activity performed within the Accounting branch. This branch will be combined with the Accounting branch for the Budget Year 2026 forward.

Accounting: This branch is responsible for maintaining appropriate financial record-keeping for the Authority. The responsibilities of the employees in this branch include: preparing monthly, quarterly and annual financial reports; coordinating the annual audit of the Authority's financial records and preparing audit schedules for the external auditors; recording all revenue transactions, including those collected by the *PIKEPASS*, PlatePay, and Interoperability Systems; processing all payables and receivables; developing policy and procedures related to all areas of responsibility; processing the organization's payroll; accounting for all OTA fixed assets by maintaining a database of all fixed assets owned by OTA, coordinating physical inventories of fixed assets and calculating depreciation expense on all fixed assets.

The total budget for the Comptroller Division decreased 73.24% from 2025 to 2026 due to reclassifying certain customer-related expenses to the Customer Service Division. The current budget is \$3,214,233.

Maintenance

The Maintenance Division is responsible for maintaining the road surface, bridges, overpasses, building structures and right-of-way. In addition to these day-to-day items, maintenance employees respond as dispatched to emergency situations throughout the year. These emergencies include, but are not limited to, snow and ice removal, motorist accidents and assists, fires, chemical spills, occasional livestock on roadways, severe storms, etc.

The Maintenance Division has proposed a budget of \$30,525,912 for 2026. This is a decrease of 0.53% from the 2025 budgeted amount.

The Maintenance Division has proposed \$2,678,400 in Capital Vehicle and Equipment purchases for 2026. A large majority of these purchases include replacement machinery and building equipment, as well as vehicles that have reached the end of their service life.

<u>Customer Service</u>

The benefits of having a PIKEPASS extend far beyond the driving experience. Our knowledgeable and friendly Customer Service staff are trained to support the public in meaningful ways—whether it's a daily commute, a trip across Oklahoma, or ensuring the safety of loved ones. PIKEPASS not only delivers travel savings and convenience but also provides a customer service experience that sets the standard. Customer Service plays a critical role in supporting PIKEPASS and PlatePay users by ensuring consistent, reliable, and high-quality service that strengthens public confidence in the Turnpike System and makes the experience easier, friendlier, and more reliable—because exceptional service is just as important as the drive itself.

The budget allocation for customer service goals reflects a commitment to continuously improving the customer experience for PIKEPASS and PlatePay users. By investing in staff training, technology, diverse support channels, feedback mechanisms, and adequate staffing, the staff aims to provide timely and effective assistance to OTA's valued customers.

The Customer Service Division's 2026 requested budget of \$31,625,578 increased approximately 54.41% from the 2025 Adopted Budget of \$20,481,400. This is due to reclassifying certain customer-related expenses from the Comptroller Division to better align with customer support.

Highway Patrol

The Oklahoma Highway Patrol is responsible for enforcing traffic laws of the State of Oklahoma, apprehending criminals and assisting in the preparation of cases for prosecution. Specific activities include patrolling and policing the turnpikes, enforcing laws, regulating and directing the movement of traffic, assisting the citizens and motoring public, and cooperating with other law enforcement officers and public officials in enforcing the laws of the State on the Oklahoma Turnpike System.

The 2026 OHP Budget increased from \$22,151,981 in 2025 to \$22,905,836. This is primarily due to increased expenses related to the need for additional troopers and supplies.

Executive

The Executive Division consists of seven branches: Administration, General Counsel, Maintenance, Engineering & Construction, Finance & Administration, Internal Audit, Chief Security, OTA Communications & Marketing. Each branch responsibilities are as follows:

Administration: The Executive Director and the Deputy Director facilitate the development of policies, which will provide assurances to bondholders, convenience to patrons, and efficiency of operations. The Deputy Director also directly oversees the Human Resources, Customer Service and Information Technology Divisions.

General Counsel: The General Counsel is responsible for acting as legal advisor to the Authority, the Executive Director and division administrators in relation to their duties. The General Counsel attends meetings of the Authority, reviews all agenda items for legality and form, reviews all contracts, and financing for all bond-funded expenditures.

Finance & Administration: This branch encompasses the Chief Financial Officer and oversees the Finance, Revenue Assurance, Business Operations, and Comptroller Divisions and also the staff of the Internal Audit branch of the Executive Division.

Maintenance, Engineering & Construction: This branch includes the Chief Engineer

and the Maintenance, Engineering, Construction, ROW & Utilities, and Access Program Manager.

Internal Audit: The Internal Audit Branch is responsible for conducting audit activities of the OTA. This includes conducting internal audits and performing certain activities to support the external audit function. This function evaluates the effectiveness of the organization's system of internal controls and the efficiency of the organization's processes. Internal Audit develops an audit plan addressing the areas of risk and concern within the organization.

Chief Security: This branch is charged with Cybersecurity and Incident Response, Internal Audit and Review for compliance and risk, internal investigations for potential information and cybersecurity-related events, along with internal OTA information security, compliance, and awareness training programs. This branch also does executive-level reporting and collaboration on cyber risk, information security risk, program risk, and current control effectiveness to reduce risk.

Public Relations: The Public Relations Branch works to improve customer and public opinions about the Oklahoma Turnpike Authority. This branch is responsible for providing information to the general public and handles the growing public relations needs for the organization.

The Executive Division decreased from \$6,113,679 in 2025 to \$5,795,913 in 2026, a decrease of 5.20%.

Finance

The Finance Division consists of two branches, the Budgeting and Financial Analysis Branch and the Debt Administration Branch.

Budgeting and Financial Analysis: is responsible for preparing an annual Operating and Maintenance, Reserve Maintenance, General Fund and Construction Fund Budget; periodic review of actual expenses versus budgeted expenditures; estimating potential revenues; analyzing revenue trends and recommendations for improvements; financial planning; financial management; cash flow projections; investment administration; establishment of toll rates; overseeing the consulting traffic engineers' preparation of traffic and revenue estimates for existing and new projects; and preparation of various reports containing financial information and management used by the Authority and the Director for making policy and operating decisions of the Authority.

Debt Administration: is responsible for payments of principal and interest from tolls and other revenues generated from the operation of the Oklahoma Turnpike System.

The total budget for the Finance and Revenue Division increased by 14.90%,

increasing the total budget from \$957,615 in 2025 to \$1,100,263 in 2026. This was largely due to an increase in expenses related to the bonding for the ACCESS Program.

<u>Information Technology Division</u>

The Information Technology (IT) Division consists budgetarily of four branches, Data Processing, Telecommunications, Traffic Technology Operations and Document Imaging. For business management purposes, the IT Division has separated these functions into two management teams of Information Business Enterprise Services and Network and Operation Services, with further differentiation under each team.

Data Processing: is responsible for delivering enterprise level services with a focus on promoting a culture of innovation, transformation and self-service for our customers, ensuring they have access to the tools and data they need to support their initiatives. IT continues to expand the functionality of in-house created software and support 3rd party software, as well as create and maintain reports and dashboards.

Telecommunications: maintains connectivity and operations of the OTA's turnpike network and infrastructure. This team ensures IT's services run on current operating systems and with the latest patches and security measures in place. As well as creating redundancy and secure optimal performance.

Traffic Technology Operations: provides efficient collection of tolls, ensures proper implementation, operation, and maintenance of the toll equipment on all the OTA's turnpikes while looking for more efficient alternatives in managing toll collection operations.

Document Imaging: provides the centralized repository for all critical documents while maintaining regulatory compliance by provisioning standard repositories, automated solutions, and informational hubs.

The Information Technology Division 2026 budget is \$30,274,781, an increase of 25.07% compared to 2025. This represents a transfer of funding from the General Fund to operations to reflect that certain IT projects such as cashless tolling have been put into production. The entire Turnpike System became cashless as of November 24, 2024.

Human Resources

The Human Resources (HR) Division is committed to providing a wide range of comprehensive and supportive HR services. To accomplish this, the HR Division is composed of two branches.

Personnel: is responsible for the initial stages of recruitment to the eventual transition into retirement; they diligently guide and support employees throughout every aspect of their employment journey. In addition to managing employee benefits, the HR team takes the lead in developing and implementing personnel policies and

programs to guarantee adherence to both organizational and legal regulations. They are always available to offer valuable advice and support to employees. Through their meticulous management of the state's Human Resources Information System, Workday, they ensure that all operations run seamlessly. With their unwavering dedication and expertise, employees can feel reassured and well-supported throughout their tenure at OTA.

Safety is responsible for the development of programs to ensure the health and safety of all employees. The Safety Branch ensures that the agency complies with all federal and state safety and health regulations. OTA employee safety has been and remains a critical component of OTA's mission. The Workers' Compensation program is also administered through this branch.

The budget proposed by the Human Resources Division has increased from \$1,695,350 in 2025 to \$1,824,372 for 2026. This is an increase of 7.61% resulting from a reclassification of insurance costs from the ROW & Utilities Division to the Safety branch of the HR Division.

Engineering

The Engineering Division will continue to provide a high level of service in 2026 with continuing implementation and oversight of the 5-year Capital Plan and the ACCESS Bond Program, which includes oversight of the overall program manager contract, consultant design, design process review program, and cost reporting. The Engineering Division, in cooperation with the General Consulting Engineer, Maintenance, Construction, Executive Divisions, and ROW & Utilities, is also responsible for planning and prioritizing long-range capital projects, both new and rehabilitative.

The engineering staff is continually discovering improved solutions to every challenge in large part because of their diligence in the design effort as well as a thorough inspection program. The teamwork between the Engineering, Construction, and Maintenance Divisions during the planning and design effort for capital projects will lead to an efficient, effective, and constructible set of construction plans.

The Engineering Division's 2026 requested budget of \$1,364,420 increased approximately 6.28% from the 2025 adopted Budget of \$1,283,834. The total overall increase is primarily related to personnel costs and training.

Construction

The Construction Division will continue to provide a high level of service in 2026, as Driving Forward is near completion and the focus returns to the Capital Program projects, along with the ACCESS Oklahoma Program. The staff will work closely with the Engineering, Maintenance, Right-of-Way & Utilities Divisions during the planning and construction phases so that all the projects are consistent in standards and specifications. The Construction Division will also work closely with stakeholders, such as cities, county commissioners, and other State agencies, to ensure high-quality

Oklahoma Infrastructure.

The Division works closely with the Right-of-Way & Utilities Division to help facilitate relocations and right-of-way acquisitions, as well as entities and partners during construction. The Construction Division also works closely with the Engineering Division to assist in the execution of pre-construction planning specifications.

The overall 2026 budget request for the Construction Division is \$689,042, which represents a 0.99% decrease compared to 2025.

Right-of-Way & Utilities

The Right-of-Way (ROW) & Utilities Division works in tandem with the Construction, Engineering, and Maintenance Divisions to coordinate projects across the Turnpike System. There are six branches within the division.

ROW & Utility Admin: oversees all branches to make sure all requirements are followed and meet OTA policy and procedures.

ROW Management: is responsible for overseeing the consultants in the acquisition of all property needed for construction projects. It also manages the contracts for asbestos testing, remediation, and demolition, as well as reasonably acquiring any excess property back on the tax rolls through the surplus process.

Asset Management: oversees maintenance and repairs of the OTA headquarters as well as the Customer Service buildings.

Utility Management: is responsible for overseeing the consultants in relocating utilities that conflict with an OTA construction project. It also oversees all requests from utility companies to cross OTA's right-of-way through a utility license.

ROW & Utility Printing: is responsible for handling all international mailing, supplies, and printing for OTA headquarters.

ROW & Utility Concession: is responsible for managing all leases for the OTA travel plazas, which include inspecting all facilities to ensure that the leases follow all requirements.

The ROW & Utilities Division is responsible for overseeing the delivery of right-of-way projects to meet construction schedules, funding agreements, and administration of professional service contracts, eminent domain process, the coordination of utility adjustments, and the conveyance of surplus property no longer needed for turnpike projects. The Division purchases the right-of-way needed and manages the extensive review and approval processes for timely utility relocations.

The budget proposed by ROW & Utilities Division is \$1,711,215 for 2026, representing a 0.71% decrease from 2025.

Business Operations

The Business Operations Division was created in 2023 and consists of two branches, the Business Operations Branch and the Procurement Branch.

Business Operations: This branch manages the business contracts related to the PIKEPASS and PlatePay revenue processes. This includes contracts for printing and mail services, manual image review, registered owner of vehicle look-ups, and collections, along with any other contracts that affect costs associated with tolls collected via PIKEPASS and PlatePay. It is responsible for providing support to the Customer Service and Comptroller Divisions to ensure OTA's various contracts with outside providers are prepared, negotiated, and meet defined Key Performance Indicators (KPI).

Procurement: This branch is responsible for supporting the procurement of goods and services for the entire OTA. This includes issuing Requests for Proposals, receiving bids for services and issuing purchase orders. This branch ensures that the purchases of the OTA are performed according to the OTA's Purchasing Policy which has been reviewed and approved by the Central Purchasing Office of the State.

The Business Operations Division budget is \$29,195,692. A decrease of 1.83%.

Revenue Assurance

The Revenue Assurance Division was established in 2023 to focus on identifying and eliminating the inherent revenue risks associated with cashless tolling.

The Revenue Assurance Division has several goals, including establishing a data-driven focus on revenue assurance and maintaining a plan detailing each initiative and the associated progress of each to ensure revenue is collected and reported in the most cost-effective manner. Other goals include creating a business intelligence system with a team to oversee the revenue assurance plan. A business intelligence system is the foundation for data-driven decision-making to inform business rule enhancements and process improvements.

The Revenue Assurance Division budget is \$798,049. The increased budget amount from 2025 of 13.97% includes personnel and associated costs.

DESCRIPTION OF THE OKLAHOMA TURNPIKE AUTHORITY

What is the Oklahoma Turnpike Authority?

Mission

Mission Statement: Partnering with others, we provide our customers with a choice of a safe, convenient, efficient, user-funded transportation network focusing on fiscal responsibility and promoting economic development.

The OTA is a non-tax supported instrumentality of the State of Oklahoma and a body corporate and politic, created by statute in 1947 to provide an alternative means of constructing necessary State roadways without further straining limited State highway funds. The OTA is authorized to construct, maintain, repair and operate the Turnpike System, which presently consists of twelve turnpikes covering approximately 630.1 miles with the completion of the Kickapoo in early 2021. No tax appropriations are received by the OTA; operations and debt service are funded by toll and concession revenues. Only patrons that drive on the road pay for the road through tolling and over 50% of toll revenues come from out-of-state drivers.

Turnpikes serve Oklahoma as a mechanism for building and using roads now but gradually paying for the roads as they are used. The OTA is similar to a public utility, providing a needed basic service at a fee that yields a return to its bondholders (investors). The OTA must generate sufficient revenues to operate and maintain its roads at a high quality, as well as provide for debt service payments to its bondholders. Toll rates for the Oklahoma Turnpike System are over 50% below the national average for similar turnpike systems. The OTA also pays for all salaries, benefits, equipment and operating costs for the Highway Patrol Officers that patrol the Turnpike System.

The Oklahoma Legislature has sole discretion to authorize new turnpike projects considered for construction by OTA, with approval from the Oklahoma Department of Transportation. Turnpike Revenue Bonds or Refunding Bonds may be issued for the purpose of paying the costs of turnpike projects or refunding any bonds of the Authority then outstanding. Turnpike bond sales must be approved by the Council of Bond Oversight and must comply with all rules and regulations of the United States Treasury Department and the United States Securities and Exchange Commission. All OTA debt is issued in accordance with the Trust Agreement dated February 1, 1989, as amended. Turnpike Revenue Bonds are payable solely from the tolls and other OTA revenues and do not constitute indebtedness of the State.

Financial Structure

The financial structure of the Turnpike System is based on "cross-pledging". Costs incurred and revenues received are combined across the System. The total debt is based on the entire system and not on an individual turnpike within the system. "Cross-pledging" was approved by a referendum vote of the people in 1954 for the purpose of financing the construction of other key turnpikes. As stated previously, no tax appropriations are received by the OTA; operations and debt service are funded by toll and concession revenues.

DESCRIPTION OF THE OKLAHOMA TURNPIKE AUTHORITY

The Authority's bonds are rated annually by the three Rating Agencies. The OTA carries the highest rating of any Toll Authority from Moody's Investor Services –Aa3. This Aa3 rating (which is equivalent of AA- rating) is based on a stable, well-established turnpike system that serves as an essential inter and intrastate connector. The Authority is also rated AA- by both Fitch and Standard and Poor's. These ratings help the Authority continue to have access to capital in the bond markets at the best possible rates.

Currently, the Oklahoma Turnpike System is comprised of the individual toll roads described below:

The **Turner Turnpike**, authorized by the State Legislature in 1947 and opened in 1953. Fourlane, limited access highway extending 86.0 miles from Tulsa to Oklahoma City. Interchanges at Sapulpa, Kellyville, Bristow, Stroud, Chandler, Wellston and Luther. Service station and/or restaurant with free restrooms at Stroud and Chandler.

The **Will Rogers Turnpike**, authorized by the State Legislature in 1953 and opened in 1957. Four-lane, limited access highway extending 88.5 miles from Tulsa to the Oklahoma-Missouri state line about 1,000 feet south of the southeast corner of Kansas. Interchanges at Claremore, Adair (S.H. 28), Big Cabin, Vinita, Afton and Miami. Service station and restaurant with free restrooms at Vinita.

The **H.E. Bailey Turnpike**, authorized by the State Legislature in 1953, the original 86.4 miles opened in 1964, and the 8.2-mile extension authorized in 1987 opened in 2001. The original four-lane, limited access highway extending 86.4 miles opened in two sections: north section (61.4 miles) from Oklahoma City to U.S. 277 north of Lawton; south section (25.0 miles) from U.S. 277 south of Lawton to U.S. 70, 5.2 miles north of the Texas state line. Interchanges at Chickasha, Cyril, Elgin and Walters. Service station and/or restaurant with free restrooms at Chickasha and Walters. The four-lane, limited access extension runs 8.2 miles within Grady County from an interchange of the original H.E. Bailey Turnpike to S.H. 9. The route generally extends east and west through a rural area west of Norman.

The **Indian Nation Turnpike** authorized by the State Legislature in 1955, the north 41.1 miles opened in 1966, and the south 64.1 miles opened in 1970. Four-lane, limited access highway extending 105.2 miles from U.S. 75/I-40 near Henryetta to U.S. 70 near Hugo. Interchanges at Eufaula, Ulan, McAlester, Daisy and Antlers. Service station and restaurant with free restrooms at McAlester.

The **Muskogee Turnpike**, authorized by the State Legislature in 1965 and opened in 1969. Four-lane, limited access highway extending 53.1 miles from Tulsa to I-40 near Webbers Falls. Interchanges at Coweta, Muskogee and U.S. 64 near Webbers Falls. Service station and restaurant with free restrooms at Muskogee.

The **Cimarron Turnpike**, authorized by the State Legislature in 1965 and opened in 1975. Four-lane, limited access highway extending 59.2 miles on main route from I-35/U.S. 64 east of Enid to Tulsa, and 8.5 miles on a spur connecting the main route with Stillwater and Oklahoma State University. Interchanges at U.S. 77, U.S. 177, Stillwater, Morrison, S.H.18, Hallett and S.H. 48. Service station and restaurant with free restrooms at Lone Chimney.

The **John Kilpatrick Turnpike/Southwest JKT**, authorized by the State Legislature in 1987, the original 9.5 miles opened in 1991, and the 15.8-mile extension opened in sections during 2000 and 2001. Four-lane, limited access, urban highway extending 30.3 miles from the Oklahoma City interchange of the Turner Turnpike and I-35 to I-40 between

DESCRIPTION OF THE OKLAHOMA TURNPIKE AUTHORITY

Mustang and Sara Road. The route is generally along Memorial Road on the north, turning south parallel to Sara Road just west of County Line Road, passing by Lake Overholser on its west side parallel to Morgan Road to an interchange at I-40, giving access to traffic traveling east and west on the interstate system. Interchanges at Eastern Ave., U.S. 77/Broadway Extension, Western Ave., Pennsylvania Ave., May Ave., Portland Ave./Lake Hefner Parkway, Meridian Ave., MacArthur Blvd., Rockwell Ave., NW Expressway, Wilshire Blvd., S.H. 66 and N.W. 10th.

The **Cherokee Turnpike**, authorized by the State Legislature in 1987 and opened in 1991. Four-lane, limited access highway extending 32.8 miles from U.S. 412 at Locust Grove to U.S. 412 west of West Siloam Springs. Interchanges at Locust Grove, U.S. 412 and S.H. 10.

The **Creek Turnpike**, authorized by the State Legislature in 1987, the original 7.4 miles opened in 1992, the 4.9-mile Creek West Extension opened in 2000, the 13.1-mile Broken Arrow South Loop opened in sections during 2001 and 2002 and the 9.0-mile Creek East Extension opened in 2002. Four-lane, limited access, urban highway extending 34.4 miles from the Turner Turnpike at S.H. 66 to the I-44 interchange of the Will Rogers Turnpike, providing access to traffic traveling east into Tulsa and south to Okmulgee; continues generally through the city of Broken Arrow to the Muskogee Turnpike; then north to the Will Rogers Turnpike. Interchanges at South 49th West Avenue, U.S. 75, Peoria Avenue, Riverside Drive, Yale Avenue, U.S. 64/Memorial Drive, U.S. 169, South 129th East Avenue, South 145th East Avenue, South 161st East Avenue, South 193rd East Avenue, East 101st Street, S.H. 51, Muskogee Turnpike, 71st Street, 51st Street, 31st Street, 11th Street, Highway 412 and Pine Street.

The **Chickasaw Turnpike**, authorized by the State Legislature in 1987 and opened in 1991. Two-lane, limited access highway extending 27.1 miles from S.H. 7 west of Sulphur to S.H. 1 near Ada. Only 13.3 miles are tolled with interchanges at U.S. 177 and Roff.

The **Kickapoo Turnpike**, authorized by the State Legislature in 1987 and opened in 2021. This four-lane divided highway extends 18.5 miles to connect I-40 to I-44 on the eastern side of Oklahoma County. This Turnpike was Oklahoma's first newly constructed 80 mph facility. Access provided at 89th Street, 29th Street, Reno Avenue, US-62, and Britton Road.

The **Gilcrease Expressway**, authorized by the State Legislature in 2010 and opened in 2022. This 5.7-mile corridor is an extension of an existing expressway and transportation system in the Tulsa region. This expressway completes a segment of the network between 1-44 and U.S. 412.

DESCRIPTION OF THE OKLAHOMA TURNPIKE AUTHORITY

Why Tolling?

Fuel taxes have been the primary source of highway funding in America since 1919, with the first state enacting the tax and 47 more states following suit by 1930. The federal government first enacted a tax in 1956, creating the federal Highway Trust Fund at the same time, to pay for building the Interstate highway system. Over the years, due to an unwillingness to increase the volumetric fuel tax rate, inflation, improved fuel efficiency, and slowed population growth, these state and federal taxes are increasingly inadequate to maintain the nation's tax supported transportation system. Today, motor fuel tax deposits to the federal Highway Trust Fund fall far short of keeping pace with outlays and it must be periodically infused with general revenue.

While tolling cannot address all infrastructure needs, it does serve Oklahoma and the rest of the country as an investment revenue stream to implement certain, well-defined and critically needed transportation system improvements. This concept is further evident in the fact that forty-two states have tolling entities today and that number grows with each passing year.

Since the Turnpike Authority was created in 1947, turnpikes have allowed the construction of safer, efficient transportation routes for drivers. These roads also provide an opportunity for local development and an economic boost to the surrounding communities, as well as the entire state of Oklahoma. Financing and construction of the Turnpike System has likewise provided infrastructure that would not be possible otherwise. Traditional transportation revenues historically directed to ODOT simply will not support the construction of these types of new roadways.

Per-mile tolling is a direct, rather than indirect, user fee wherein only those who use the road actually pay for it. Traditional motor fuel and income tax-based revenue mechanisms are unable to effectively assess out of state travelers for the use of Oklahoma's tax supported highways unless they stop for fuel; however, over 50% of tolls paid on the Oklahoma Turnpike System come from patrons from out of state.

Does any toll revenue generated from the Turnpikes go to the State of Oklahoma?

Besides being an alternative to state funded roads, state-maintained roads receive motor fuel tax money generated by those who drive on the turnpikes.

In 1992, legislation was enacted that made available additional motor fuel excise taxes, if necessary, for payment of debt service requirements on the Authority's bonds. Each month, if motor fuel excise taxes apportioned to the Authority are not necessary to meet debt requirements, these motor fuel excise taxes are paid to the Oklahoma Department of Transportation. Since that legislation was put in place in July 1992, the Authority has received and immediately remitted 100% of those receipts to the Department of Transportation. Today, those transferred funds are estimated at more than \$60 million per year and have amounted to over \$1.3 billion since 1992.

This motor fuel tax "flow through" serves as a "credit enhancement" to the Turnpike bonds which ultimately helps the Authority's bond rating. That "flow through" motor fuel

DESCRIPTION OF THE OKLAHOMA TURNPIKE AUTHORITY

tax money is a LAST resort to pay bond debt. All other resources available to OTA would have to be exhausted. The State of Oklahoma considers the "flow through" a "win-win" for ODOT and OTA with OTA benefiting from the credit enhancement (which translates to lower toll rates for patrons), and the Department of Transportation benefiting from this cash funding source.

In addition to the Motor Fuel Taxes that the Turnpike System generates, the Turnpike Authority also contributes approximately \$25 million annually to the Oklahoma Highway Patrol by funding the patrolmen that are assigned to the Authority's roads. This funding not only pays for trooper salaries but also funds the patrol cars and equipment.

With the current statewide trooper staffing level at the Oklahoma Highway Patrol being down and the need to fund a Trooper Academy, the Authority used its General Fund to participate in the funding of the Trooper Academy. This funding is vital to avoid a reduction in Troopers currently assigned to patrol the existing turnpike network, address the unique challenges during network expansion activities as well as increase Trooper presence during the ACCESS Oklahoma expansion.

Turnpike Authority Audit and Oversight

An audit of the Authority's financial statements must be performed annually in accordance with generally accepted auditing standards in compliance with Oklahoma State Statute and the requirements of Section 711 of the OTA's Trust Agreement. Under the covenants of the trust indenture, the audit must be performed by an independent firm of certified public accountants of recognized ability and national standing. The external auditors, Forvis Mazars, LLP, was selected through a competitive process and as approved by the Turnpike Authority Board, is currently performing the annual audit and the latest audit to be completed was for the year ended December 31, 2024.

In addition, an Inspection of the Oklahoma Turnpike System must be performed annually in accordance with the requirements of Section 504 of the OTA's Trust Agreement. This report, due October 1st of each year, sets forth (a) their findings as to whether the Oklahoma Turnpike System has been maintained in good repair, working order and condition and (b) their recommendations as to (i) proper maintenance, repair and operation of the OTA System during the ensuing fiscal year and an estimate of the amount of money necessary for such purposes; (ii) the insurance to be carried on the system; and (iii) the amount that should be deposited monthly during the ensuing year to the credit of the Reserve Maintenance Fund.

Also, the Authority's bonds are rated annually by the three Rating Agencies. The OTA carries the highest rating of any Toll Authority from Moody's Investor Services –Aa3. This Aa3 rating (which is equivalent of AA- rating) is based on a stable, well-established turnpike system that serves as an essential inter and intrastate connector. The Authority is also rated AA- by both Fitch and Standard and Poor's. These ratings help the Authority continue to have access to capital in the bond markets at the best potential rates, which in turn assists in keeping Oklahoma's toll rates as low as possible.

Turnpike Revenue Bonds or Refunding Bonds may be issued for the purpose of paying the costs of turnpike projects that are defined in Statute by the Legislature or refunding outstanding bonds. Before any bonds are sold, the proposed and very specific turnpike

DESCRIPTION OF THE OKLAHOMA TURNPIKE AUTHORITY

activity targeted to utilize the bond proceeds is subjected to scrutiny by the Governor, the OTA Board, the Oklahoma Transportation Commission (unless there has been a previous route approval), the Council on Bond Oversight and the proposed bonds are often validated by the Oklahoma Supreme Court. After all approvals are obtained, the marketing and sale of the bonds is subjected to and must comply with all rules and regulations of the United States Treasury Department and the United States Securities and Exchange Commission. All OTA debt are allotted in accordance with the Trust Agreement. Turnpike Revenue Bonds are payable solely from the tolls and other OTA revenues and do not constitute indebtedness of the State.

Who owns the Turnpike Bonds?

As is common with most issues of bonds sold by public sector entities, the OTA issues bonds as "book-entry" through the Depository Trust Company (DTC). The use of DTC facilitates the settlement of, and subsequent trading in, bonds issued by public sector entities including the Oklahoma Turnpike Authority. DTC, through its nominee Cede & Co., is the registered owner of all of the securities making up a bond issue, routinely processing interest and principal payments on bonds, facilitating the distribution of notices by issuers of such bonds, and managing the electronic "book-entry" transfer of ownership interests in securities among DTC participants. These DTC participants are commercial banks and investment banks, which often hold and transfer ownership interest in the securities at the direction of their customers, which may be an institution or an individual, the ultimate owner of the bond.

After bonds are issued, the bond trustee, on behalf of the Authority, transfers payments of principal and interest to DTC who makes payment of such amounts to its participants that own the bonds of the Authority on the records of DTC. These DTC participants are typically banks and broker-dealers who receive the payments from DTC and then credit the account of their customers with the principal and interest received on a given payment date. DTC has a list of participants that hold the bonds, but these bondholders can change frequently, even daily, through trading in the bonds subsequent to their original issuance.

Neither DTC nor the DTC participants have an obligation to share the name of the beneficial owner of any certificate with transaction parties and further, this ownership information is likely protected under a confidentiality agreement with the DTC participant or brokerage firm who represents the investor. Therefore, the creation of a "master list" of specific bondholders is technically infeasible and not practical. If it were possible to do so, the exercise would be very expensive to develop and would only be valid for a short time, with it unlikely that a significant number of retail investors holding bonds directly, or through a professional money manager, could be identified. This condition and difficulty in identifying specific bondholders is not isolated to the Turnpike Authority, but common to all public sector entities nationwide.

While not required to disclose their ownership position in municipal bonds, institutional holders may elect to disclose such holdings. As a result, the Authority can and does on a periodic basis identify its largest holders of bonds. The amount of bonds held by such holders relative to the amount of bonds of the Authority outstanding indicates, and confirms the Authority's long-held belief, that many of the Authority's bonds are owned by individual retail investors.

DESCRIPTION OF THE OKLAHOMA TURNPIKE AUTHORITY

When the Authority issues bonds, it receives from the underwriters of its bonds the names of the institutional investors submitting orders and ultimately purchasing the bonds. Orders from individual retail investors submitted directly or on their behalf are not identified by the actual name of the individual submitting the order or purchasing the bonds. Based on the expressed interest in the most recent Authority bond sale, an intuitive snapshot of the holders of the Authority's bonds would include a broad base of investors ranging from individuals, directly and through a professional money manager, to large institutional entities like insurance companies, and bond funds.

Also, it is important to recognize that the Authority takes care to ensure Oklahoma residents have the opportunity to invest in the Oklahoma infrastructure through the purchase of its bonds and that their orders, whether submitted directly or through a money manager, are given the highest priority for being filled, ahead of national retail investors and institutional investors. In addition to allowing state residents to invest in the Authority, retail investors typically offer the Authority and other public sector issuers of tax-exempt debt an attractive cost of funds, making it in the financial interest of the Authority to seek out retail investors in its bonds. The Oklahoma State Bond Advisor and the financial advisor to the Authority review the proposed allotment of bonds before they are finalized, to among other things, ensure all orders submitted by or on behalf of Oklahoma residents are filled by the underwriters of the Authority's bonds.

Can turnpikes be returned to the State of Oklahoma to be maintained as taxpayer supported highways?

Unfortunately, Oklahoma's tax supported highway system bridge and pavement problems were well recognized and were a direct result of many decades of "deferred maintenance" due to a lack of funding. From 1985 to 2005, transportation investment was flat and as a result, the system experienced a consistent, downward spiral and decline in the condition of the infrastructure that will be difficult to reverse.

ODOT now has a strategy and a plan that wisely and transparently invests its available resources in a balanced manner. This strategy represents the beginning of a monumental effort to return not only Oklahoma's bridges, but also the highway system as a whole to a state of good repair. Oklahoma no longer leads the nation in bad bridges. The Department of Transportation reached its goal of being in the top 10 for Transportation in the United States.

However, there is no instant gratification when implementing improvements to infrastructure. It will take decades to address systemic problems that have developed over long periods of inadequate investment. Progress is evident, but much work and the need for continued investment remains. With Oklahoma being 44th in the country with respect to motor fuel tax rates, challenges remain to provide new and non-traditional transportation revenue streams that can provide consistent and increasing funding levels for transportation.

With the funding challenges ODOT already faces, acceptance of the responsibility for the Turnpike System's roads would pose an insurmountable hardship and spread scarce transportation resources even further. If tolls were eliminated, the State would

DESCRIPTION OF THE OKLAHOMA TURNPIKE AUTHORITY

have to repay the infrastructure investment debt and spend at least \$135 million per year to maintain existing turnpikes and provide law enforcement from the Oklahoma Highway Patrol, thereby diverting additional funds away from an already stretched state budget.

Oklahoma's successful infrastructure investment model has included both tax-supported highways managed and maintained by ODOT and toll supported turnpikes since 1947. The Oklahoma Turnpike Authority provides a network of roads that not only serve Oklahomans but also out-of-state travelers and that support hundreds of thousands of vehicles per day. The original focus of the Turnpike Authority remains largely unchanged today. OTA works closely with the ODOT to understand the critical infrastructure needs of the State of Oklahoma that are unable to be addressed with traditional resources and, as authorized in Statute by the Legislature, assess and evaluate the feasibility of implementing toll roads to meet those recognized needs, and construct, enhance, operate and maintain the Turnpike System effectively.

(This page is intentionally left blank.)

Financial Description of Entity

The Oklahoma Turnpike Authority is an instrumentality of the State of Oklahoma (the State) and a body corporate and politic created by statute in 1947. The Authority is authorized to construct, maintain, repair and operate turnpike projects at locations authorized by the Legislature of the State of Oklahoma and approved by the State Department of Transportation. The Authority receives revenues from turnpike tolls and a percentage of the turnpike concession sales. The Authority may issue Turnpike Revenue Bonds for the purpose of paying the costs of turnpike projects and Turnpike Revenue Refunding Bonds for the purpose of refunding any bonds of the Authority then outstanding. Turnpike Revenue Bonds are payable solely from the tolls and other revenues of the Authority and do not constitute indebtedness of the State.

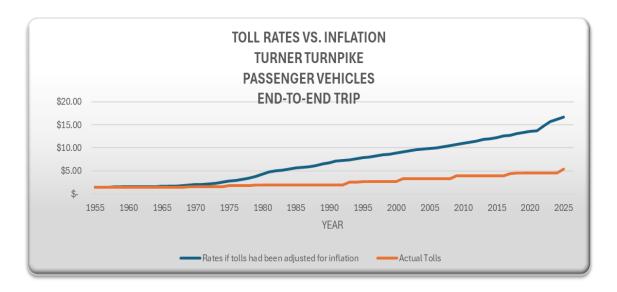

In evaluating how to define the Authority for financial reporting purposes, management has determined that there are no entities over which the Authority exercises significant influence. Significant influence or accountability is based primarily on operational or financial relationships with the Authority. Since the Authority does not exercise significant influence or accountability over other entities, it has no component units.

The operations of the Authority are accounted for as an enterprise fund on an accrual basis in order to recognize the flow of economic resources. Under this basis, revenues are recognized in the period in which they are earned, expenses are recognized in the period in which they are incurred, depreciation of assets is recognized, and all assets and liabilities associated with the operation of the Authority are included in the Authority's Statement of Net Position. The Trust Agreement and supplements thereto (the Trust Agreement) related to the Series 1989 Bonds requires that the Authority adopt generally accepted accounting principles for government entities, but it also requires that certain funds and accounts be established and maintained. The Authority consolidates these funds and accounts for the purpose of enterprise fund presentation in its external financial statements.

The Annual Budget is prepared on a modified accrual (non-GAAP) basis for Revenue Fund expenses, Reserve Maintenance Fund deposits and General Fund project expenditures. Project-length estimates are established for all Reserve Maintenance and General Fund projects and for all Construction Fund projects. All non-project-related, unexpended budget amounts lapse at calendar year end. For budgetary control purposes, expenditures are recognized in the period in which they are paid rather than the period in which they are incurred. Also, for budgetary control purposes, depreciation is not recognized as an expenditure, but capital outlays are recognized as expenditures.

The Oklahoma Turnpike Authority recognizes the importance of keeping operating costs as low as possible in order to reduce the need for increasing tolls. This policy has paid off. In the 72 years since the first turnpike on the Oklahoma Turnpike system opened, tolls have been increased only twelve times, most recently in January of 2025. As can be seen in the graph on the following page, the toll to

drive from Oklahoma City to Tulsa on the Turner Turnpike has increased from \$1.40 in 1953 to \$5.40 in 2025. However, if tolls had increased with the consumer price index (CPI-U), the toll would be almost \$17 today.

Page 56 contains the Summary of Operating Results. This contains historical and projected information on an income statement-type basis for the years 2018 through 2027, illustrated in the Financial Budget Summary Section.

In 2026, it is estimated that the toll, miscellaneous revenues such as Interoperability revenues, and concession revenues will be \$480,943,000 and interest income \$20,194,000 for a total of \$501,137,000. These monies are deposited to the Revenue Fund and are held for the payment of the estimated \$165,056,000 in 2026 Operating and Maintenance expenses. The remaining \$336,081,000 is distributed as follows: \$140,749,000 to the Second Lien Senior Bonds Service Account and \$36,070,000 to the Reserve Maintenance Fund. The estimated excess monies of \$159,062,000 are deposited to the General Fund and utilized to fund the 5-year Capital Plan. In 1994, the Authority began funding a capital plan program, which has been funded by the General Fund and the Reserve Maintenance Fund.

More information about the various funds held by the Authority as well as the flow of funds can be found on the following pages.

Description of Funds

The Oklahoma Turnpike Authority maintains four main funds. These funds are described below:

Revenue Fund - Monies flowing into and out of the Revenue Fund account for all tolls and other revenues and all operating expenses derived from the operation and maintenance of the Turnpike System.

Reserve Maintenance Fund - Monies held to the credit of the Reserve Maintenance Fund shall be disbursed by the Depository or, in the case of item "e", set aside in reserve, only for the purpose of paying the cost of:

- (a) resurfacing the Oklahoma Turnpike System or any part thereof,
- (b) unusual or extraordinary maintenance or repairs, maintenance or repairs not recurring annually, and renewals and replacements including major items of equipment,
- (c) repairs or replacements resulting from an emergency caused by some extraordinary occurrence,
- (d) engineering expenses incurred under the provisions of this Section, and
- (e) premiums on purchased insurance carried, or payments to be set aside in reserve for self insurance maintained, under the provisions of the 1989 Trust Agreement.

All expenses paid through this fund must have the approval of the Director of Finance and be reviewed and approved by the consulting engineer, in addition to other approval guidelines.

Construction Fund - Payments from the Construction Fund may be made for the cost of any new turnpike project or improvement. All payments from the Construction Fund shall be subject to the provisions and restrictions set forth in Article IV "Custody and Application of Proceeds of Bonds". All expenses paid through this fund must be reviewed and approved by the consulting engineer prior to payment.

General Fund - Monies held in the General Fund can be used by the Authority for the purpose of pledging such monies to the payment of junior obligation debt or for any other lawful purpose of the Authority. It may also transfer or deposit to the credit of any Fund or Account created under the provisions of the Trust Agreement monies held for the credit of the General Fund as directed in a Resolution duly adopted by the Authority. All expenses paid through this fund must have the approval of the Director of Finance, in addition to other approval guidelines, prior to payment in order to ensure that there is not an alternative funding source and that the appropriate approval by the Authority or the Director has been obtained.

Flow of Funds

Section 507 of the Trust Agreement dated February 1, 1989, establishes the flow of funds with which the Authority must comply. The Oklahoma Turnpike Authority must deposit toll and other revenues from its operations into the Revenue Fund on a daily basis. All monies in the Revenue Fund at the end of the month (less a reserve for current operating expenses shown in the Authority's latest budget) are transferred and deposited as follows:

- 1. bond service accounts in accordance with their respective lien hierarchy for the purpose of paying bond principal and interest;
- 2. bond reserves in accordance with their respective lien hierarchy for the purpose of ensuring sufficient monies are available to make bond principal and interest payments in the event that current revenues are insufficient;
- the Reserve Maintenance Fund for the purpose of paying special maintenance expenses to keep the turnpike system in good repair; and
- 4. the balance to the General Fund for the purpose of pledging such monies to the payment of junior obligation debt or any other lawful purpose.

Under the Authority's Enabling Act, and amendments thereto, a portion of the motor fuel excise taxes collected on fuels consumed on the turnpikes is made available to the Authority from the Oklahoma Tax Commission. Since July 1, 1992, the motor fuel taxes monies have been apportioned to the Authority in the first day of each calendar month. All motor fuel taxes apportioned to the Authority are available to fund debt service; to the extent monies are not otherwise available. If such motor fuel excise taxes apportioned to the Authority are not necessary in such month, the fuel tax monies shall be paid over immediately to the Oklahoma Department of Transportation (ODOT). Since July 1992, the Authority received, and immediately remitted to ODOT all of the motor fuel excise taxes apportioned to the Authority during each year amounting to over \$ 1.3 billion. All future projections anticipate the immediate remittance of such funds to ODOT. More about the Motor Fuel Tax Trust Fund is explained in the next section.

Motor Fuel Tax Trust Fund

By virtue of the "Enabling Act" of 1971 and amendments thereto, a portion of the motor fuel excise taxes collected on fuels consumed on the turnpikes is made available to the Authority from the Oklahoma Tax Commission. Prior to July 1, 1992, this amount was not to exceed \$3,000,000 during a fiscal year of the State. In 1992, Title 69, Section 1730 was amended. This amendment stated the motor fuel taxes due to the Authority would be apportioned to the Authority on the first day of each calendar month. Beginning July 1, 1992, the amount of cash and investments on deposit was frozen as security for the outstanding bonds. All motor fuel taxes apportioned to the Authority shall be available to fund debt service and reserves to the extent monies are not otherwise available to the Authority for such purpose. If such motor fuel excise taxes apportioned to the Authority are not necessary in such month, the motor fuel excise taxes shall be paid over to the ODOT.

The Motor Fuel Tax Trust Fund is invested in interest-bearing obligations and with the interest received thereon is used to eliminate deficiencies, if any, in available monies to meet revenue bond interest and principal requirements. No transfers from this account were required in 2024 nor are any anticipated in future projections.

Revenue Bonds

The Authority issues revenue bonds from time to time for the purpose of financing capital improvements and new projects. On February 1, 1989, the Authority issued \$385,400,000 of 1989 Series First Senior Revenue Bonds and \$173,000,000 of Series 1989 Subordinate Revenue Bonds. The purpose of the Series 1989 Revenue Bonds was (1) to finance the cost of constructing the John Kilpatrick, Creek, Cherokee, Chickasaw Turnpikes, (2) to finance the cost of making certain improvements to the existing turnpikes, and (3) to advance refund all of the outstanding Authority bonds from the 1966 and 1971 issues. The Series 1989 bonds' interest rates ranged from 6.0% to 7.875%.

The Series 1989 Revenue Bonds defeased all Authority revenue bonds from the 1966 and 1971 issues through the escrow deposit of approximately \$131,300,000 with two trustee banks. Consequently, the liability for the 1966 Series A, 1966 Series B, and the 1971 Series C Revenue Bonds were removed from the Authority's Statement of Net Position. This advance refunding was undertaken primarily to restructure the Authority's debt in order to enable the debt financing of the new projects in the most economically efficient manner. The Bank of Oklahoma served as the Escrow Trustee on the 1966 Series A and B Bonds. Final payment on the defeased 1966A and B Bonds was satisfied in 2006. Bank One Trust Company served as the Escrow Trustee on the 1971 Series C Bonds. Final payment on the defeased 1971 Series C Bonds was satisfied in 2003.

On October 1, 1991, the Authority issued \$22,000,000 of 6.6% 1991 Series First Senior Bonds and \$28,000,000 of 1991 Series Second Senior Revenue Bonds, \$13,000,000 which were at rates ranging from 4.50% to 6.30% and \$15,000,000 which were variable rate bonds. The Series 1991 bonds were issued to provide funds sufficient, together with other available funds of the authority, for the completion of the Portland Interchange on the Kilpatrick Turnpike and certain other improvements to the Oklahoma Turnpike System.

In May 1992, the Authority issued \$392,265,000 of Series 1992 First Senior Revenue Bonds, \$20,655,000 of Series 1992 Second Senior Revenue bonds and \$195,400,000 of Series 1992 Subordinated Revenue Bonds, with interest rates ranging from 4.35% to 6.30%, 4.25% to 6.25% and 4.25% to 6.25%, respectively. These Series 1992A-E Bonds were issued for the purpose of (a) refunding approximately 94% of the Authority's Oklahoma Turnpike System 1989 Revenue Bonds, (b) funding capital costs of certain turnpike projects, and (c) paying certain costs of issuance, including underwriters' discount of approximately \$4.7 million, and capitalized interest. The principal amount of the bonds advance refunded and considered defeased was \$526,440,000, and the liability for these bonds was removed from

the Authority's Statement of Net Position. Approximately 94% of the Series 1989 bonds were defeased through an escrow deposit with Liberty National Bank and Trust Company.

The Series 1992A-E Bonds were issued pursuant to provisions to the Trust Agreement dated February 1, 1989, including supplements thereto, with Bank of Oklahoma, N.A. as Trustee. Interest is payable semi-annually on January 1 and July 1 of each year, commencing on January 1, 1993.

On September 25, 1992, the Authority issued \$22,786,862 of Series 1992 first Senior Revenue Bonds and \$28,017,387 of 1992 Series Second Senior Revenue Bonds, both with interest rates ranging from 3.15% to 5.30%. These bonds were issued to (a) provide funds, combined with other available funds of the Authority, to refund the Authority's Oklahoma Turnpike System Series 1991 first and Second Senior Revenue Bonds, (b) pay costs of issuance, and (c) make a deposit to the Second Senior Revenue Reserve Account established under the Trust Agreement. The principal amount of the bonds advance refunded and paid in full in October 1992 was \$49,350,000, and the liability was removed from the Authority's Statement of Net Position.

The Series 1992 F&G bonds were issued pursuant to provisions of the Trust Agreement dated February 1, 1989, including supplements thereto, with Bank of Oklahoma, N.A. as Trustee. The bonds were dated October 1, 1992 with interest payable on January 1 and July 1 of each year, commencing on January 1, 1993. The Series F&G Bonds maturing on January 1 in each of the years 2004-2008, inclusive were Capital Appreciation Bonds. They were issued in the initial amounts and accreted at interest rates set forth in the Official Statement dated October 1, 1992 to arrive at the Compound Accreted Value at maturity. With the issuance of the Series 2006 Bonds, the outstanding Series 1992F-G CABS were defeased to maturity as they are not subject to optional exemption. The final payment on the defeased Series 1992F&G was made January 1, 2008.

On May 12, 1998, the Authority issued \$350,000,000 of 1998A Second Senior Revenue Bonds. The Series 1998A Bonds were issued to provide funds which, when combined with other available funds of the Authority, would be used for the purpose of (1) funding a portion of the capital costs of Improvements to extend the H.E. Bailey Turnpike, the Creek Turnpike, and the John Kilpatrick Turnpike and for right-of-way acquisition for the Muskogee Turnpike; (2) funding the capitalized interest account for the Series 1998A Bonds and; (3) paying the costs of issuance. The Series 1998A Bonds' interest rates ranged from 4.125% to 6%.

On July 14, 1998, the Authority issued \$337,010,000 of 1998B Second Senior Revenue Bonds. The Series 1998B Bonds were issued to provide funds which when combined with other available funds of the Authority, would be used for the purpose of (1) funding a portion of the capital costs of Improvements to extend the H.E. Bailey Turnpike, the Creek Turnpike, and the John Kilpatrick Turnpike and for right-of-way acquisition for the Muskogee Turnpike; (2) funding the capitalized interest account for the Series 1998A Bonds and; (3) paying the costs of issuance. The Series 1998B Bonds' interest rates ranged from 5% to 5.5%.

The Series 1998A and 1998B Second Senior Revenue Bonds were issued pursuant to provisions of the Trust Agreement dated February 1, 1989, including supplements thereto, with Bank of Oklahoma, N.A. as Trustee.

With the issuance of the Series 2006 Bonds, \$308,105,000 of the 1998A maturities ranging from 2010-2028 and \$301,565,000 of the 1998B maturities ranging from 2010-2028 were refunded to redemption through an escrow deposit. Bank of Oklahoma, N.A. serves as the Escrow Trustee on the Series 1998A and B Bonds. No amounts remain outstanding for these bonds.

On May 14, 2002, the Authority issued \$314,065,000 of Series 2002A Refunding Second Senior Revenue Bonds, and \$255,575,000 of Series 2002B Refunding Second Senior Revenue Bonds. The Series 2002 Bonds were issued to provide funds which when combined with other available funds of the Authority, were issued for the purpose of (a) refunding the Series 1989 First Senior and Subordinate Lien Revenue Bonds; refunding the 1992A-E Revenue Bonds; refunding portions of the 1992F and 1992G Revenue Bonds; and (b) paying the costs of issuance. The portions of the Series 1992F and 1992G Revenue Bonds not refunded included Capital Appreciation Bonds which were not callable. No amount remain outstanding for these bonds. The Series 2002 Bonds interest rates ranged from 4.0% to 5.5%. The principal amount of the bonds refunded and paid in full on July 1, 2002 was \$577,810,000, and the liability was removed from the Authority's Statement of Net Position.

The Series 2002A and 2002B Refunding Second Senior Revenue Bonds were issued pursuant to provisions of the Trust Agreement dated February 1, 1989, including supplements thereto, with Bank of Oklahoma, N.A. as Trustee.

On August 24, 2006, the Authority issued \$635,590,000 in Second Senior Lien Revenue Bonds six separate series consisting of Series 2006A-F. The Series 2006 Revenue bonds consisted of one series of fixed rate bonds totaling \$104,790,000 (Series 2006A) and six series of variable rate bonds totaling \$530,800,000 (Series 2006 B-F). The fixed rate bonds interest rates ranged from 3.5% to 4%. The variable rate bonds were sold on August 23rd at an initial rate of 3.58% with a weekly reset. The \$530.8 million in variable rate bonds were being hedged with a swap with a fixed rate of 3.859% where the Authority paid the swap providers the fixed rate of 3.859% and the swap providers paid the Authority a rate equal to the Bond Market Association Index (BMA).

The Series 2006A-F Refunding Second Senior Revenue Bonds were issued pursuant to provisions of the Trust Agreement dated February 1, 1989, including supplements thereto, with Bank of Oklahoma, N.A. as Trustee.

On June 6th, 2007, the Oklahoma Turnpike Authority issued its 2007A Refunding Second Senior Revenue Bonds in the amount of \$45,680,000 which refunded portions of its Series 2002A and 2002B Bonds. These bonds were structured as taxexempt fixed rate "AAA" insured bonds. These fixed rate bonds interest rates ranged from 4.0% to 4.25%.

On October 13, 2011, the Authority closed on the delivery of Series 2011A Refunding Second Senior Revenue Bonds totaling \$524,010,000. The Series 2011A were issued for the purposes of refunding (a) the 2013-2022 maturities of the Series 2002A&B Refunding Second Senior Revenue Bonds and (b) the Series 2006C&D Refunding Second Senior Revenue Bonds. In conjunction with the defeasance of the Series 2006C&D Bonds, the Authority also terminated two of its swap agreements. Interest rates on these bonds ranged from 0.2% to 5.0%.

On December 15, 2011, the Authority closed on the delivery of the Series 2011B Second Senior Revenue Bonds totaling \$159,650,000. The Series 2011B Bonds were issued to provide funds for the purposes of (1) financing a portion of the capital costs of certain Turnpike projects including capacity improvements for the John Kilpatrick and Creek Turnpikes. Interest rates on these bonds ranged from 2.0% to 5.0%

On February 8, 2017, the Authority closed on the delivery of \$456.1 million in Series 2017A Second Senior Revenue Bonds and \$23.9 million in Series 2017B Second Senior Refunding Revenue Bonds. The Series 2017A&B were issued for the purpose of financing a portion of the capital costs of certain Turnpike projects and improvements and to refund the Series 2007A Bonds. These bonds were structured as tax-exempt fixed rate "AA-" bonds. The net present value savings recognized through the refunding was approximately \$1.5 million. the OTA's total all-in-cost of capital for this transaction was just under 4.0%.

On December 21, 2017, the Authority closed on the delivery of \$312.8 million in Series Second Senior Revenue Bonds, \$275.7 million in Series 2017D and \$95.8 million Series 2017E Second Senior Refunding Revenue Bonds. The Series 2017CDE Bonds were issued to finance a portion of the capital costs of certain Turnpike projects and improvements, to refund the Series 2006BEF Bonds and terminate the associated 2006 Swaps, and to partially refund the Series 2011B Bonds. These bonds were structured as tax-exempt fixed rate "AA-" bonds. The combined net present value savings recognized through the refunding was approximately \$9.4 million. The OTA's total all-in-cost of capital for this transaction was just over 3.75%.

On October 31, 2018, the Authority closed on the delivery of \$344,310,000 in Series 2018A Second Senior Revenue Bonds. The Series 2018A Bonds were issued to finance a portion of the capital costs of certain Turnpike projects and improvements for the Driving Forward Program. These bonds were structured as tax-exempt fixed rate "AA-" bonds. The OTA's total all-in-cost of capital for this transaction was just over 4.15%.

On October 14, 2020 the Authority issued its Oklahoma Turnpike System Second Senior Refunding Revenue Bonds Series 2020A and Series 2020B which closed on October 29, 2020. The Series 2020 Bonds have a final maturity of January 1, 2033 with respect to the Series 2020A, and January 1, 2028 with respect to the Series 2020B. Proceeds of the Series 2020 Bonds are being used to refund all or a part of the Authority's outstanding Oklahoma Turnpike System (a) Refunding Second Senior Revenue Bonds, Series 2011A, (b) Second Senior Revenue Bonds Series

2011B, and (c) the 2029 through and including 2033 maturities of the Second Senior Revenue Bonds Series 2017C. On an overall basis, there was no extension of the final maturity date of the refunded bonds.

On October 26, 2023, the Authority closed on the delivery of \$500 million in Series 2023 Second Senior Revenue Bonds. The Series 2023 Bonds were issued to finance a portion of the capital costs of certain Turnpike projects and improvements for the ACCESS Program. These bonds were structured as tax-exempt fixed rate "AA-" bonds. The OTA's total all-in-cost of capital for this transaction was just over 5.17%.

On Febuary 4, 2025, the Authority closed on the delivery of \$1,110,575,000 in Series 2025A Second Senior Revenue Bonds. The Series 2025A Bonds were issued to finance a portion of the capital costs of certain turnpike projects and improvements for the ACCESS Program. These bonds were structured as taxexempt fixed rate "AA-" bonds. The OTA's total all-in-cost of capital for this transaction was 4.45%.

On October 7, 2025, the Authority will close on the delivery of Series 2025B Refunding Second Senior Revenue Bonds totaling \$148,605,000. The Series 2025B bonds were issued for the purposes of refunding certain maturities of the Authority's outstanding Oklahoma Turnpike System Second Senior Revenue Bonds Series 2017A. The OTA's total all-in-cost of capital for this transaction was 4.11% and generated just under \$12 million in net present value savings.

The following page shows the Schedule of Annual Debt Service Requirements:

OKLAHOMA TURNPIKE AUTHORITY SCHEDULE OF ANNUAL DEBT SERVICE REQUIREMENTS SECOND SENIOR DEBT

| Fiscal Year End | Net Nev | Outstanding | | |
|-----------------|------------------|------------------|------------------|------------------|
| 1-Jan | Principal | Interest | Total P&I | Principal |
| 2026 | 74,575,000 | 60,201,255 | 134,776,255 | \$ 2,970,120,000 |
| 2027 | 77,715,000 | 63,034,083 | 140,749,083 | \$ 2,892,405,000 |
| 2028 | 81,005,000 | 81,815,449 | 162,820,449 | \$ 2,811,400,000 |
| 2029 | 58,815,000 | 129,883,639 | 188,698,639 | \$ 2,752,585,000 |

| 2055 | 186,320,000 | 7,918,600 | 194,238,600 | \$ - |
| Total | \$ 3,044,695,000 | \$ 2,553,141,654 | \$ 5,597,836,654 | |

Debt Service Coverage Ratios

One of the best indicators of the "financial health" of the Oklahoma Turnpike Authority can be found in its Debt Service Coverage Ratios. The Trust Indenture requires that the Authority meet two debt service coverage ratios. These can be found on the bottom of the Summary of Operating Results. The two ratios that must be met include:

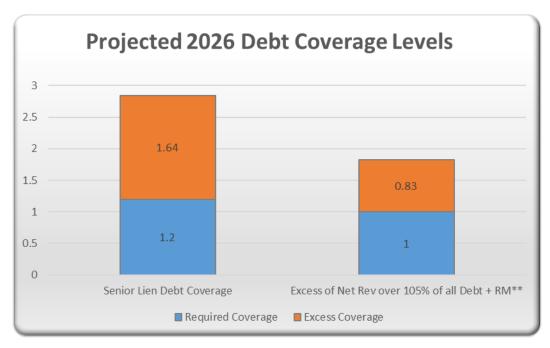

- (1) Senior Lien D/S Coverage which is equivalent to ((Net Revenues + Motor Fuel Taxes)/Senior Debt Service Costs) = 1.20 or greater
- (2) Excess of Net Revenues over 105% of all Debt + Reserve Maintenance Deposits

which is equivalent to (Net Revenues/(Reserve Maintenance Deposits + (Total Debt

Service Costs *1.05))) = 1.00 or greater.

If the schedules of tolls in effect for traffic using the Turnpike System are not producing Net Revenue sufficient to satisfy the above requirements, the Authority will request the Traffic Engineers to make recommendations as to a revision of the schedules of tolls in order to produce the maximum amount of Net Revenues possible. Upon receiving such recommendations, the Authority will revise such schedules of tolls in order to produce the maximum amount of Net Revenues possible.

The debt service ratios are expected to exceed the levels required by the Trust Indenture. As can be seen in the Summary of Operating Results and the graph below, the Senior Lien Debt Service Ratio which has a required level of 1.20 is projected to be a healthy 2.84. Also, the Excess of Net Revenues over 105% of all Debt + Reserve Maintenance Deposits Ratio which has a required level of 1.00 is projected to reach a healthy level of 1.83.

Revenue Projections

CDM Smith completed the Oklahoma Turnpike Authority System Comprehensive Traffic & Revenue Update report in August 2023 (the "August 2023 Study"). The study included a comprehensive assessment of economic conditions, demographic growth projections and other key factors influencing forecasted T&R on the OTA System facilities. The August 2023 Study also included an independent review of demographic projections in the Oklahoma City and Tulsa areas, as well as comprehensive traffic count and travel time data collection. In addition to updated long-term T&R forecasts for the OTA System, the August 2023 Study also included T&R forecasts for three new turnpikes currently under development as part of the ACCESS program, namely: the Tri-City Connector, the East-West Connector, and the South Extension Turnpike.

This analysis provides an update the long-term OTA System T&R forecasts from years 2024 through 2052 to incorporate recent and new information since the completion of the August 2023 Study to include:

- Incorporation of a planned systemwide toll increase expected to go into effect on January 1, 2025, with subsequent escalation increases every two years thereafter
- Incorporation of recent observed OTA System transaction and revenue data that has become available since the completion of the August 2023 Study
- Revision/update of the planned configurations and opening dates of ACCESS program turnpikes (Tri-City Connector, East-West Connector, and South Extension Turnpike)

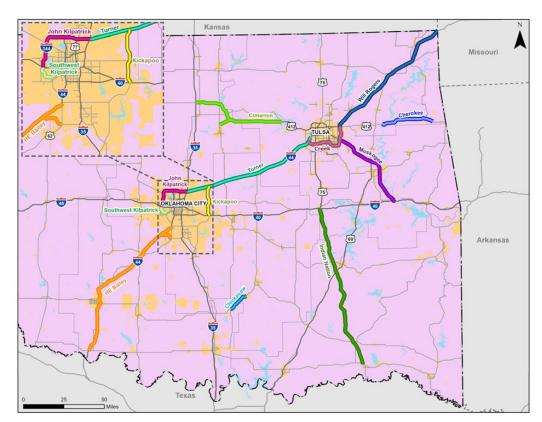

Figure 1. Oklahoma Turnpike Authority System

Revenue Growth Trends

One of the key driving factors in the development of long-term T&R forecasts for the OTA System is historical growth trends in toll revenue. Since the completion of the August 2023 Study, an additional year of turnpike data have become available, and the updated forecasts included in this report incorporate the most recent data available for the OTA System facilities.

Historical Revenue Growth

Figure 2 shows the historical revenue growth for the OTA System over the last twenty years. Since 2004, revenue on the OTA System has increased at an average annual rate of 3.7%, due in part to periodic toll rate increases and expansions of the turnpike system. Since the previous toll rate increase was implemented in 2019, toll revenue on the system has increased at an average annual rate of 3.3%.

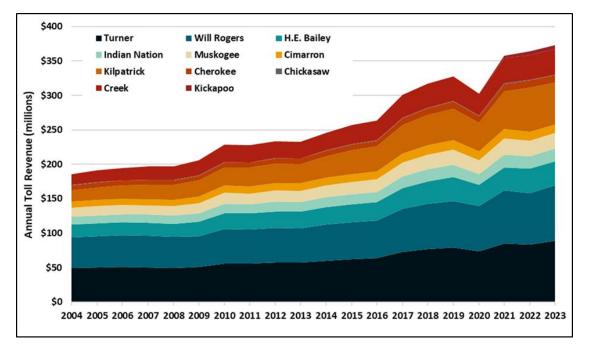

Figure 2. OTA System Historical Revenue Growth

Recent Net Revenue Growth by Turnpike

Figure 3 summarizes the recent revenue growth for the OTA System by turnpike since the most recent toll rate increase in 2019. The largest increases in revenue have been observed on the Turner Turnpike and Will Rogers Turnpike, which have increased by over \$10 million each since 2019. The John Kilpatrick Turnpike has also seen large growth, due primarily to the opening of the Southwest Extension. Overall system revenue has increased by 14% since 2019.

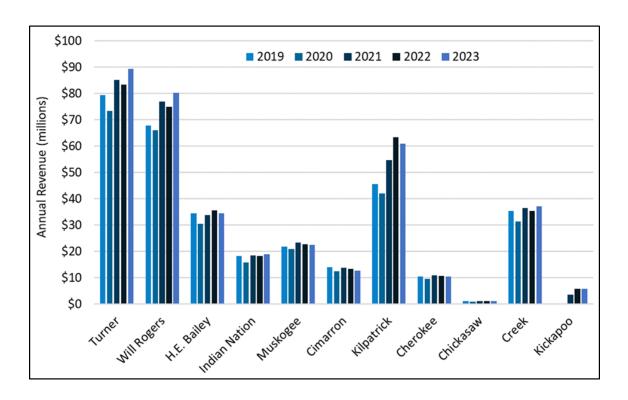

Figure 3. OTA System Recent Revenue Growth by Turnpike

Systemwide AET Conversion

The Oklahoma Turnpike Authority recently completed a multi-year conversion of the OTA System to an All-Electronic Tolling (AET) configuration. Prior to the conversion, payment of tolls was made by either cash or a PIKEPASS (or other interoperable) transponder. Under the AET configuration, all cash collection on the system has been replaced with the license plate-based PlatePay system, under which invoices for tolls are mailed to the registered owners of each vehicle. Over a period of just over three years, all turnpikes on the OTA System have converted to AET, as shown in Table 1. After adopting PlatePay at a single interchange on Creek Turnpike in 2017, OTA began the systemwide rollout of AET in 2021 beginning with the Kilpatrick Turnpike. The AET conversion process was completed in November 2024 with the conversion of the Indian Nation Turnpike and Will Rogers Turnpike. All tolls on the OTA System are now collected by either the PIKEPASS or PlatePay payment types.

Table 1. AET Conversion Timeline

| Turnpike | PlatePay Conversion |
|------------------------|---------------------|
| Kilpatrick Turnpike | July 2021 |
| Kickapoo Turnpike | January 2022 |
| HE Bailey Turnpike | June 2022 |
| Chickasaw Turnpike | August 2022 |
| Cimarron Turnpike | November 2022 |
| Cherokee Turnpike | February 2023 |
| Creek Turnpike* | February 2023 |
| Muskogee Turnpike | August 2023 |
| Turner Turnpike | April 2024 |
| Indian Nation Turnpike | November 2024 |
| Will Rogers Turnpike | November 2024 |

^{*}A single location on Creek Turnpike (Peoria-Elm ramps) converted to AET in January 2017

ACCESS Projects

On December 7, 2021, the OTA announced their Long Range Plan later named the ACCESS Oklahoma Program, which includes the widening of three existing turnpikes, a series of access and interchange improvements across the OTA System and three new turnpikes. The three new facilities (the Tri-City Connector, the East-West Connector, and the South Extension Turnpike) are all located in the southern Oklahoma City region and combined will add approximately 50 centerline miles to OTA's network of turnpikes. Since the completion of the August 2023 Study, multiple assumptions have changed related to the planned configurations and construction schedule of the new turnpikes. The forecasts in this update include the following modifications to the ACCESS program:

- The assumed opening date of East-West Connector (I-44 to I-35) was revised from September 1, 2027 to December 1, 2027
- The assumed opening date of East-West Connector (I-35 to I-40) was revised from September 1, 2030 to November 30, 2030
- The assumed opening date of Tri-City Connector was revised from August 1, 2032 to November 30, 2036
- The assumed opening date of South Extension Turnpike (E-W Connector to SH 9) was revised from October 1, 2034 to November 30, 2032
- The assumed opening date of South Extension Turnpike (SH 9 to I-35) was revised from January 1, 2037 to November 30, 2034
- The East-West Connector was assumed to open without frontage roads and with limited access through the City of Norman

Planned Toll Rate Increases

As shown in Table 2, the Oklahoma Turnpike Authority has implemented periodic rate increases throughout its history. Prior to January 1, 2025, the most recent rate increases were adopted in 2017 through 2019 in support of the Driving Forward program, and no additional escalation has occurred since that time. As part of the ACCESS program, the OTA implemented a toll rate increase on January 1,2025, pursuant to Board of Directors action on December 10, 2024, with biannual increases to be implemented on January 1 of every odd year thereafter. Additionally, the initial rate increase will vary by turnpike from 10 percent to 20 percent. The following rate increases on the OTA System were assumed as part of the current toll revenue forecast update:

- Effective January 1, 2025, a 20% rate increase will be implemented on the Turner Turnpike, Will Rogers Turnpike, John Kilpatrick Turnpike (including Southwest Extension), and Kickapoo Turnpike
- Effective January 1, 2025, a 15% rate increase will be implemented on the Creek Turnpike, Indian Nation Turnpike, Muskogee Turnpike, and H.E. Bailey Turnpike
- Effective January 1, 2025, a 10% rate increase will be implemented on the Cherokee Turnpike, Cimarron Turnpike, and Chickasaw Turnpike

A systemwide toll rate increase of 6% is to be implemented systemwide every two years thereafter, with the first of these increases occurring on January 1, 2027

Table 2. OTA System Historical Toll Rate Increases

| Veer | Rate II | ncrease |
|------|----------------|---------------------|
| Year | Passenger Cars | Commercial Vehicles |
| 1968 | 14% | 14% |
| 1975 | 13% | 13% |
| 1979 | 17% | 35% |
| 1991 | 25% | 30% |
| 1993 | 10% | 25% |
| 1995 | 10% | 4% |
| 2001 | 16% | 30% |
| 2009 | 16% | 16% |
| 2017 | 12% | 12% |
| 2018 | 2.5% | 2.5% |
| 2019 | 2.5% | 2.5% |

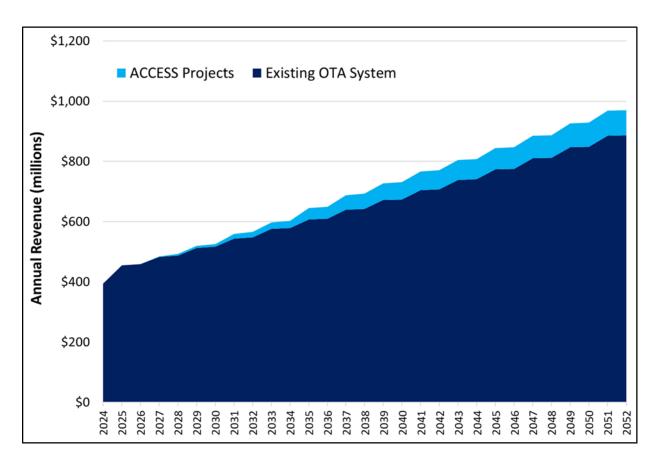

Updated Traffic and Revenue Forecasts

The updated long-term T&R forecasts for each OTA System facility from 2024 to 2052 are shown in Table 3 on the following page and graphically represented in the Updated OTA System Annual Toll Revenue Forecasts graphic following Table 3. The transaction projections have been updated based on the information available for the August 2023 Study and the recent transaction and revenue data and input assumptions provided by OTA since the completion of that study.

The projections extend from 2024 through 2052 and include revenue forecasts for each of the OTA's eleven turnpikes as well as the proposed ACCESS projects. As shown in Table 3, the estimated annual revenue generated by the OTA System is expected to increase from \$393.8 million in 2024 to \$525.8 million by 2030 and \$928.1 million by 2050. The Turner Turnpike is expected to continue to be the biggest revenue generating facility throughout the forecast period, providing approximately 23% of all anticipated toll revenues. The combined I-44 turnpikes (Turner, Will Rogers and H.E. Bailey) are expected to generate 52% of the revenues generated throughout the forecast period. The new ACCESS projects (East-West Connector, Tri-City Connector, and South Extension) are expected to grow from 1.7 percent of total system revenues in 2030 to 8.6% by 2050.

Table 3. Updated OTA System Annual Net Collected Toll Revenue Forecasts by Facility

| | Annual Turnpike Revenue (\$millions) | | | | | | | | | | | , | | | | |
|------|--------------------------------------|-------------|-------------|---------------|----------|----------|----------|-----------|-------|-----------------|---------------|----------|-----------|----------|-----------------|-------|
| Year | Turner | Will Rogers | H.E. Bailey | Indian Nation | Muskogee | Cimarron | Cherokee | Chickasaw | Creek | John Kilpatrick | SW Kilpatrick | Kickapoo | East-West | Tri-City | South Extension | TOTAL |
| 2024 | 95.1 | 87.6 | 36.5 | 18.9 | 23.2 | 13.1 | 11.0 | 1.0 | 38.2 | 58.5 | 4.9 | 5.8 | 0.0 | 0.0 | 0.0 | 393.8 |

Updated OTA System Annual Toll Revenue Forecasts

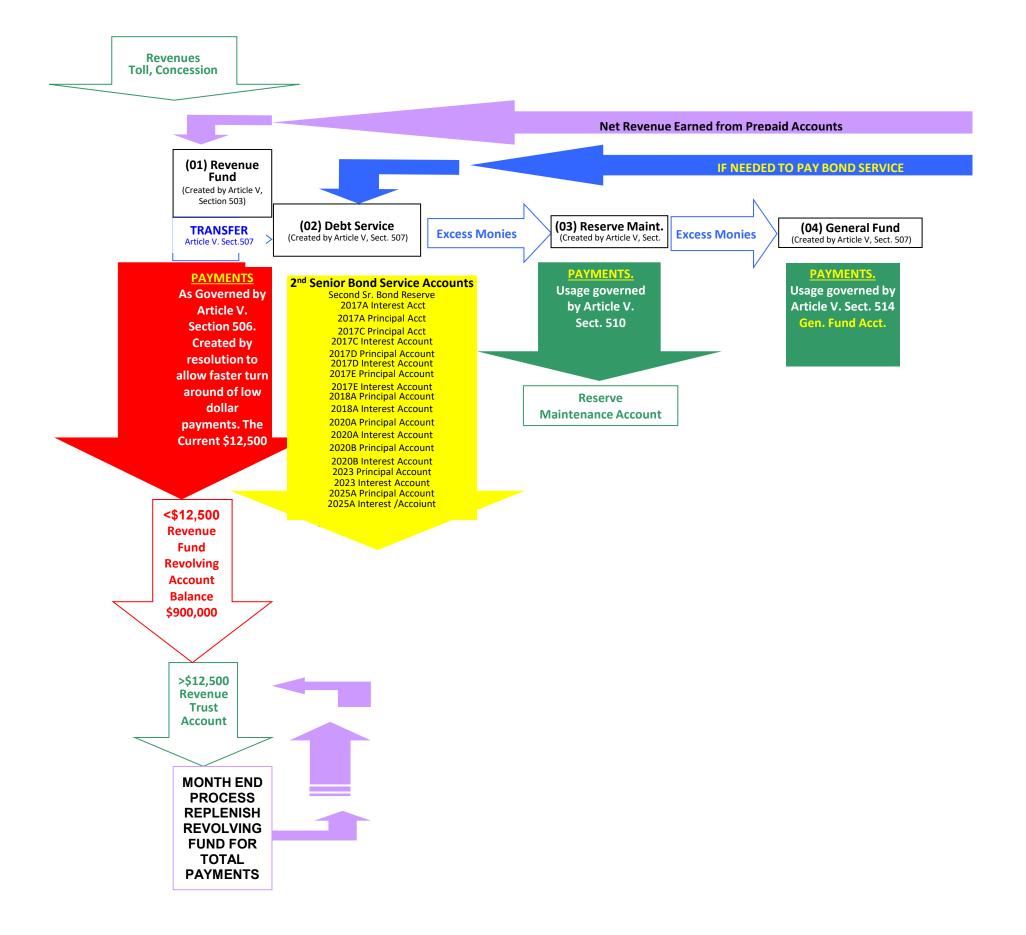

Conclusion

While the state of the national and economies, population and employment growth, specifically along OTA corridors, are critical to the transactions and revenue on OTA System facilities, the following are other critical parameters that could potentially have a material impact on the OTA System T&R:

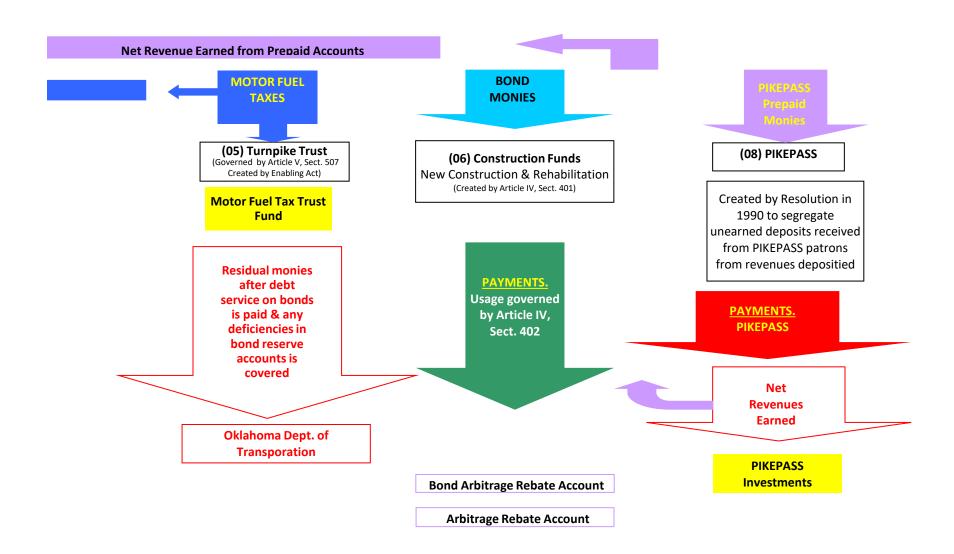

- The implementation of planned toll rate increases in January 2025 and every two years thereafter
- Payment type distributions of both passenger car and commercial vehicle customers
- Revenue collection for PlatePay transactions
- Growth in commercial vehicle traffic
- Construction schedule of the ACCESS projects

⁽¹⁾ Toll Revenue Projections provided by Investment Grade traffic studies from CDM Smith

Future apportionments are projected by the Authority based upon historical information and assumptions of the Authority.

(See "MOTOR FUEL EXCISE TAX")

(4) On October 29, 2020, the Authority closed on the 2020A and 2020B Refunding bonds resulting in a savings of \$65.1 million. To support the liquidity position of the Authority, at closing, the savings were brough forward, with gross savings of approximately \$54.97 million and \$10.12 million in reflected in 2020 and 2021, respectively And 2026 reflects the first debt payment for the ACCESS program from the 2023 Second Senior Revenue Bonds that closed in October 2023

(5)On July 1, 2020, the Authority closed on a \$50.0 Million note structured as a line of credit and deposited to the Reserve Maitnenance Fund to satisfy Trust-required deposits from mid-2020 through mid-2022.

(6) Reserve Fund Loan amortized over the useful life (18 years pursuant to the Trust Agreement), impacts debt ratios only. See "OUTSTANDING OBLIGATIONS OF THE AUTHORITY—Second Senior Bonds and Parity Indebtedness" herein for a description of Reserve Fund Loan. (paid off in late 2020)

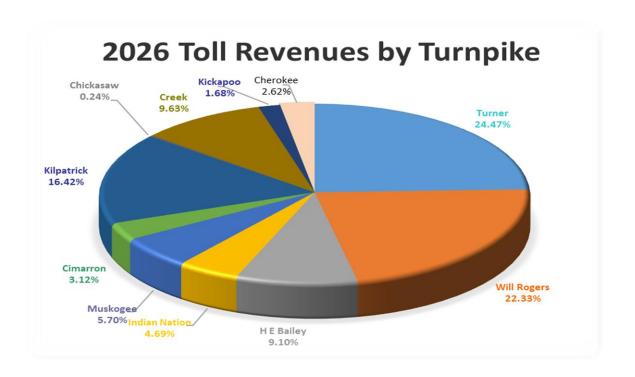

⁽²⁾ Projected by Authority's Consulting Engineer's

⁽³⁾ Motor Fuel Excise Tax Monies are available to the Authority for the purpose of making debt service payments as required.

All Motor Fuel Excise Taxes that are not required by the Authority to pay monthly pro-rata debt service are transferred to ODOT on a monthly basis.

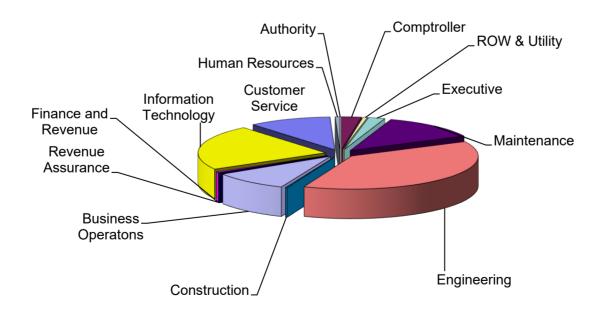

OKLAHOMA TURNPIKE AUTHORITY Detail of Projected Operating Revenue (Dollars in Thousands)

| | 2026 |

| | \$165,056,064 | \$36,975,803 | \$128,044,374 | \$330,076,241 |

Oklahoma Turnpike Authority Five Year Capital Plan

In November 1994, the Authority adopted a five-year Program of Turnpike System improvements and maintenance projects in the amount of \$196,704,554 to cover the years 1995 through 1999. In developing this plan, the Authority identified the maintenance, rehabilitation and improvement needs of its existing system for the next 20 to 30 years and instituted a five-year maintenance and rehabilitation program designed to keep existing turnpikes in good condition thereby maintaining traffic flows and extending the useful life of the turnpikes. The maintenance, rehabilitation and improvement projects included in the five-year program should significantly increase the functionality and condition of the entire turnpike system. The five-year maintenance program is reviewed and updated on an annual basis.

The Capital Plan is prepared as a component of the Oklahoma Turnpike Authority's budget in cooperation with the Engineering Division. A major part of the plan is to identify revenue sources that will be utilized to fund these projects and to ensure that resources are utilized in a manner that is consistent with the Authority's long-term goals. The plan addresses such issues as:

- What revenue sources are available to fund the five-year program?
- What limitations impact the use of these funds for various projects?
- How can resources best be utilized to further the long-range plans and financial goals of the Turnpike Authority?

Integral to the conclusions and recommendations contained in the Plan are the assumptions made concerning the long-term financial and operating goals of the Turnpike Authority. Certain assumptions have been made while preparing the Capital Plan. Assumptions concerning projected revenues, expenditures, and interest earnings of the turnpike system have been provided by in-house staff based upon past experience, the current budget, and revenue studies prepared by our traffic consultants. Assumptions concerning project costs and the timing of project expenditures have been provided by in-house staff based on engineering studies prepared by consultants as well.

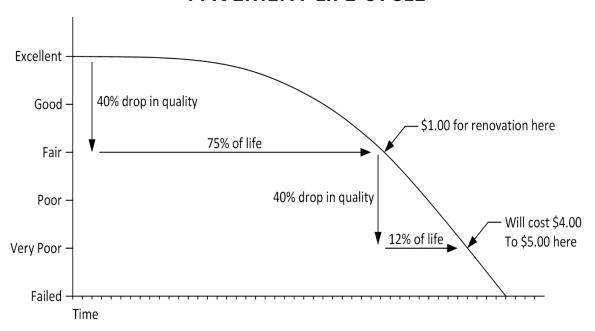

The Capital Plan is based upon the following assumptions:

- An ongoing maintenance and rehabilitation program will extend the useful life of the System.
- Financial resources should be managed to build flexibility for the funding of new projects in the future.
- Financial resources should be managed to maintain a sound financial condition.
- The System must at all times meet the covenants under the Trust Agreement.
- Financial resources should be managed to build and maintain credit rating and investor confidence.

A major basis for having a comprehensive capital plan is because of that first assumption-that an ongoing maintenance and rehabilitation program will extend the useful life of the System. It is indeed a "pay now" or "pay a lot more later" proposition. Engineering studies have confirmed that accelerating capital costs and renovating the system sooner can significantly cut costs from the routine maintenance budget. As can be seen from the Pavement Life Cycle graph below, routine maintenance costs can be reduced from approximately \$4 to \$1 if there is a plan for comprehensive renovation in place.

Oklahoma Turnpike Authority Five Year Capital Plan

PAVEMENT LIFE CYCLE

Along with the cost-savings issue comes a customer service issue. Our patrons are paying a premium to drive on our roads. For that premium paid, they expect a better than average road-a road in good condition that provides some element of time savings. The capital plan rehabilitation should help maintain the system's conditions as well as facilitate traffic flows thereby leading to greater traffic growth and in turn, higher revenues.

The Capital Plan for the years 2026-2030 totals \$808,733,177 and includes \$307.9 million for Paving Rehabilitation, \$40.1 million for DBR Resurfacing, \$121.4 million for Bridge Rehabilitation, \$34.6 million in Shoulder and guardrail improvements, \$12.5 million in Concrete Panel Lifting, \$8.0 million in Safety, Surface treatment and Striping, \$15.0 million in Message Boards and Cameras, \$11.5 million in Maintenance Facility Upgrades, \$12.1 million for Highway Patrol related items, \$13.5 million in Maintenance Equipment, \$27.5 million set aside for the Gilcrease Turnpike, \$9.5 million in Interchange improvements, \$176.5 million in IT and Tolling related items and \$18.6 million in other capital projects.

Details of the 2026-2030 Capital Plan can be found on the following pages.

Oklahoma Turnpike System General Fund

The "Oklahoma Turnpike System General Fund" (also referred to as the "General Fund") was created pursuant to Section 507 of the 1989 Trust Agreement.

Subject to provisions in Section 514 of the 1989 Trust Agreement, the Authority may use monies held to the credit of the General Fund for any lawful purpose of the Authority. It may also from time to time transfer or deposit to the credit of any Fund or Account created under these provisions monies held for the credit of the General Fund as directed in a Resolution duly adopted by the Authority.

For the 2026 Budget, approximately \$128.0 million is expected to be expended from the General Fund. This money is needed for the following expenses:

- 🍀 To provide Bridge and Pavement Rehabilitation for the Oklahoma Turnpike System
- To fund the Authority's Gilcrease Turnpike
- To provide funding for toll collection improvements
- To fund vital equipment purchases for the Oklahoma Highway Patrol who patrol OTA's System

Oklahoma Turnpike Authority Construction Fund

ACCESS Oklahoma Program

The Authority's work on the ACCESS program continues. Following months of study, public input and initial design work, a revised South Extension Turnpike alignment to the west of the 2022 proposed alignment was shared with the public on September 23. OTA scheduled three Homeowner Open Houses in the days following the announcement. Although the OTA has communicated with a wide range of people in the area up to this point, OTA will prioritize its focus to those property owners who may be impacted. As engineering design progresses, property owners will be kept up to date about the parcels needed. The final design that will determine property acquisition is more than a year away, but OTA will continue to be available to those property owners to answer questions throughout the process.

The ACCESS Oklahoma access improvements and expansion program known as "ACCESS Oklahoma: Advancing and Connecting Communities and Economies Safely Statewide" was announced in early 2022. The ACCESS Oklahoma program, to be undertaken in cooperation with ODOT, includes plans to make major investments in the turnpike system in the State to improve traffic safety and facilitate better movement of products and people in urban areas and rural Oklahoma.

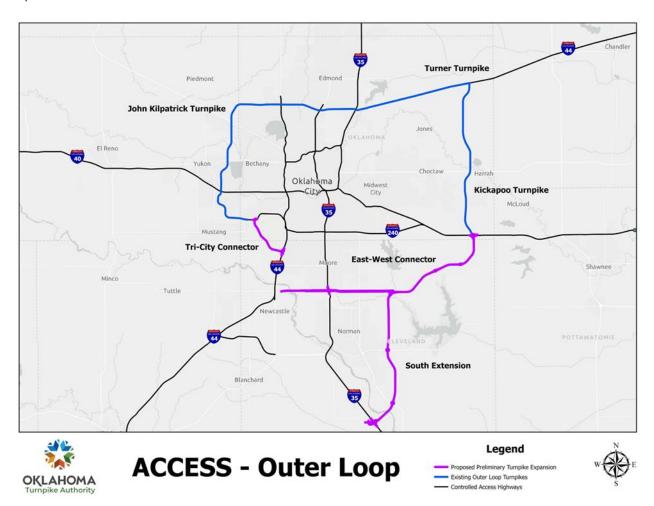

ACCESS Oklahoma focuses on improving highway safety for motorists, increasing travel time reliability, easing congestion in metropolitan areas of the State, moving freight across the State and adding access to communities that previously were not connected to turnpikes. The new turnpike corridors in ACCESS Oklahoma will connect Oklahoma's existing highway system maintained by the State and provide reliever routes for Oklahoma's most congested highways, especially for commercial truck traffic.

Studies and preliminary design are underway for the projects currently expected to be included in the ACCESS Oklahoma Program. This \$8.2 Billion program is expected to be financed from a portion of the proceeds of the Series 2023 Bonds that were issued in October of 2023, the Series 2025A Bonds that were issued in early 2025, and a number of additional issuances of Second Senior Bonds.

On Aug. 1, 2023, the Oklahoma Supreme Court affirmed the Oklahoma Turnpike Authority's request for bond validation for the ACCESS Oklahoma long-range plan. This means that the 15-year plan, including three new routes to complete the Oklahoma City Outer Loop and relieve I-35 congestion, are now able to move forward.

This long-range plan has always been about the safety of Oklahoma motorists. OTA's mission is to help facilitate traffic throughout the state by seamlessly connecting with the state highway system, thereby providing a choice for a safe, convenient and efficient user-funded transportation network. Our goal is to provide safe infrastructure while maintaining the lowest toll rate for our customers.

The ACCESS Oklahoma Program includes both new Turnpikes and improvements to existing Turnpikes described on the next few pages. The current planned alignments of the new Turnpike are shown below:

New Turnpikes

Outer Loop - East-West Connector. The East-West Connector is planned as a new high-speed expressway facility constituting the southern section of the "Outer Loop" expressway system that the Authority intends to complete around the Oklahoma City area. The East-West Connector is planned to extend from west to east from I 44 in the Tri-City area (Newcastle, Blanchard and Tuttle) at SH 37, crossing the South Canadian River, east to I 35, then continuing east along the alignment of the existing Indian Hills Road, and then northeast to I 40, connecting to the Kickapoo Turnpike. The project is intended to expand mobility within the south Oklahoma City metropolitan area by providing greater access to the cities of Moore and Norman.

Outer Loop – Tri-City Connector. A high-speed expressway facility constituting a portion of the southwestern section of the planned Outer Loop around the Oklahoma City area. The project is expected to extend from the John Kilpatrick Turnpike terminus at SH-152 (Airport Rd), around the southwestern side of Will Rogers World Airport, to I-44 north of the South Canadian River. The Authority's purpose in constructing the Tri-City Connector is to connect the southwest Oklahoma City area to the rest of the metropolitan area and complete a portion of the Outer Loop. It is intended to increase access and offer an alternative route from I-40 west of Oklahoma City to I-44 and (via I-44 and the East-West Connector) I-35 on the south side of the city.

South Extension Turnpike. The South Extension is planned as a new high-speed expressway facility starting from a point on the East-West Connector near the current intersection of E. Indian Hills Road and between 48th Ave and 60th Ave NE east of Norman and extending south and southwest to I-35 near Purcell. The project is intended to expand mobility within the southeast sector of the Oklahoma City metropolitan area by providing greater access to communities in the area. The South Extension is anticipated to be a vital corridor for the transportation network of central Oklahoma by providing an alternate route connecting I-44 east of Oklahoma City (via the East-West Connector) and I-35 south of Norman, serving traffic between southern, eastern and northeastern Oklahoma.

The ACCESS Oklahoma program is expected to include a north extension of the newly completed Gilcrease Expressway, but like the rest of the Gilcrease Expressway, the new extension is not expected to become part of the Oklahoma Turnpike System.

In addition to the new Turnpikes, the ACCESS Oklahoma Program includes improvements to existing Turnpikes.

Improvements

Turner Turnpike: Projects are expected to consist primarily of reconstruction and safety upgrades, including the continuation and completion of reconstruction and widening of the section between I-35 in Oklahoma City and SH-66, east of Bristow, adding lanes, improving and adding interchanges and completing other safety features. These projects are intended to create an "urban turnpike corridor" allowing for the potential future addition of truck-specific and high-occupancy vehicle (HOV) lanes for quick and safe access through the corridor.

John Kilpatrick Turnpike: Projects are expected to include continuation and completion of planned improvements that began in 2012 between I-40 west of the city and I-35 north of the city, including the addition of new driving lanes, safety enhancements, and greater access on and off the turnpike. In addition, the addition of a new interchange at County Line Road, new eastbound on ramp at Council, and modification of the existing interchange at SH-74 are intended to provide for more efficient mobility between the municipal and State highway systems and the Turnpike System.

Will Rogers Turnpike: Projects include reconstruction and widening to add additional lanes and enhanced safety features for travel between US-412 in Catoosa and SH-20 in Claremore, as well as improved access at Pine Street in Tulsa. The projects are intended to allow for the future creation of truck-specific and HOV lanes for quick and safe access throughout the corridor.

In addition to the preceding improvements, the ACCESS Oklahoma Program is expected to include new and improved interchanges and other facility updates throughout the remainder of the Turnpike System, including new interchanges on the Cimarron Turnpike, the H.E. Bailey Turnpike and the Indian Nation Turnpike, as well as improvements to bridges and interchanges on the Creek Turnpike, the H.E Bailey Turnpike, the Muskogee Turnpike and the Indian Nation Turnpike.

During 2026, the Oklahoma Turnpike Authority will continue to hire consultants and additional professional services to confirm details and continue conceptual design plans for this comprehensive long-range plan. These consultants involve traffic modeling, financial planning, engineering, and working with community partners. More information pertaining to the program are available at www.ACCESSOklahoma.com. The website is updated regularly with new information.

Oklahoma Turnpike System Reserve Maintenance Fund

The "Oklahoma Turnpike System Reserve Maintenance Fund" (also referred to as the "Reserve Maintenance Fund") was created pursuant to Section 507 of the 1989 Trust Agreement.

Section 510 of the 1989 Trust Agreement, "Use of Reserve Maintenance Fund" prescribes the use of the Reserve Maintenance monies. The monies held for the credit of the Reserve Maintenance Fund shall be disbursed by the Depository or, in the case of item (e), set aside in reserve, only for the purpose of paying the cost of:

- (a) resurfacing the Oklahoma Turnpike System or any part thereof,
- (b) unusual or extraordinary maintenance or repairs, maintenance or repairs not recurring annually, and renewals and replacements including major items of equipment,
- (c) repairs or replacements resulting from an emergency caused by some extraordinary occurrence,
- (d) engineering expenses incurred under the provisions of this Section, and
- (e) premiums on purchased insurance carried, or payments to be set aside in reserve for self insurance maintained, under the provisions of the 1989 Trust Agreement.

As a part of the Oklahoma Turnpike Authority's Capital Plan, \$36,070,240 is expected to deposited to the Reserve Maintenance Fund for proposed Road and Bridge rehabilitation to the existing turnpike system in 2026.

Oklahoma Turnpike System Reserve Maintenance Fund (Continued)

With latest Official Statement projecting the amount to be expended in accordance with the restrictions (a) - (e) (on the previous page) was prepared. The planned roadway and bridge improvements in this budget are to be funded from deposits to the Reserve Maintenance Fund during 2026. The \$36,070,240 is to be deposited during 2026 as required and will be deposited according to the following schedule:

| <u>2026 Month</u> | Amount to be Deposited |
|-------------------|------------------------|
| January | \$ 3,005,890 |
| February | 3,005,850 |
| March | 3,005,850 |
| April | 3,005,850 |
| May | 3,005,850 |
| June | 3,005,850 |
| July | 3,005,850 |
| August | 3,005,850 |
| September | 3,005,850 |
| October | 3,005,850 |
| November | 3,005,850 |
| December | <u>3,005,850</u> |
| Total Deposits | <u>\$36,070,240</u> |

In addition, the 2026 Reserve Maintenance Budget includes an additional \$905,563 for roadway and bridge improvements which will be funded from the Reserve Maintenance Balance.

O&M Expense Budget

OTA has begun ramping up its work on the ACCESS Oklahoma Program following the issuance of the Series 2025A bonds. Along with additional costs associated with that program, the Authority continues to change its toll collection model, which ultimately will give our customers more choice and convenience. These initiatives and others have increased the 2026 Operating and Maintenance Budget to a level of \$165,056,062, a 5.62% increase over 2025. The most significant changes to the budget are highlighted on the following page:

Significant Impacts to the Operating Budget

Increase due to a change in funding source

\$6.9 million

Regularly, projects are reviewed to determine if they continue to be "in development" and therefore eligible for funding from the General Fund or "in production" where they would more appropriately be funded from O&M. This increase represents a transfer of funding from the General Fund to operations to reflect that certain projects such as cashless tolling were put into production. The entire system became cashless as of November 24, 2024.

Increase funding related to tolling

\$1.7 million

This increase reflects adjustments made as revenue transactions and the Authority's customer base continues to grow. Additional resources are being allocated to manage that expected growth as well as anticipating new partners for interoperability and tag fulfillment. These adjustments are necessary to ensure seamless operations and maintain customer service standards.

Other significant changes

\$0.1 million

This increase reflects funding to meet increased bond market obligations, and expenses related to the oversight and continued implementation of the ACCESS Program and other programs. These investments are necessary to sustain the long-term success of ACCESS Oklahoma and to maintain the safety, efficiency, and reliability of the system.

Authority Division

Division Description

The Authority consists of the Governor (member ex-Officio) and six members serving without pay for eight-year terms from districts established in the State statute. They have full control over all turnpike operations; however, the OTA must operate in strict compliance with the trust agreement, which defines the operating procedures to be followed. The Authority is responsible for establishing policies that are implemented by the Executive Director through the administrative staff.

Division Goals

To provide executive leadership in policy establishment and administrative review.

Division Strategic Initiatives

Provides administrative review of operations and establishment of policies.

2026 Annual Budget

There is no change in the budget for this division.

Comptroller Division

Division Description

The Comptroller division is responsible for maintaining appropriate financial record keeping for the Authority, recording and reconciling all revenue transactions, processing all financial payments, publishing all required financial reports, and assuring compliance with the financial requirements of the OTA's Trust Indenture.

Division Goals

- Continue to prioritize timely and accurate financial reporting.
- Ensure all steps are taken to receive the Governmental and Financial Officers Association (GFOA) financial reporting excellence award.
- Implement a new, updated financial system that provides workflow and process improvement.

Division Strategic Initiatives

- Collaborate with other divisions of OTA and external consultants to identify areas of improvement to establish financial reporting efficiencies.
- Implement and apply new financial reporting requirements as they are applicable to the OTA.

2026 Annual Budget

The Comptroller Division 2026 budget is \$3,214,233, a decrease of 73.24% from 2025. This decrease is primarily attributed to realigning customer-related expenses to the Customer Service division.

Maintenance Division

Division Description

The Maintenance Division is dedicated to ensuring the safety, reliability, and longevity of the turnpike system. This division is responsible for the routine upkeep, repair, and enhancement of all turnpike infrastructure, including roadways, bridges, tolling points, signage, lighting, and landscaping.

Key functions include pavement maintenance, bridge inspections and repairs, drainage system upkeep, snow and ice control, and emergency response to incidents affecting roadway conditions. The division also manages preventive maintenance programs designed to extend the life of critical assets and reduce long-term costs.

By maintaining a high standard of roadway quality and safety, the Maintenance Division supports OTA's mission to provide a seamless and secure travel experience for motorists throughout Oklahoma.

Division Goals

- Maintain Safe Roadways Ensure all turnpike surfaces, shoulders, signage, and barriers meet or exceed safety standards through routine inspections, timely repairs, and proactive hazard mitigation.
- Preserve Infrastructure Extend the life of turnpike assets by implementing costeffective preventive maintenance programs for pavement, bridges, drainage systems, and related facilities.
- Respond Promptly to Emergencies Provide rapid response to weather events, accidents, and other incidents to restore normal traffic flow and ensure traveler safety.
- Support Environmental Stewardship Incorporate environmentally responsible practices in all maintenance activities, including vegetation control, material use, and waste management.
- Ensure Workforce Readiness Provide ongoing training and development for maintenance personnel to maintain high skill levels, safety awareness, and operational readiness.

Division Strategic Initiatives

The Maintenance Division strives to complete work on schedule, maintain a strong safety culture for employees, and continually improve the driving experience for customers. Looking ahead, the Maintenance Division will continue to invest in better tools and technology to track and manage assets, expand training to keep the

workforce skilled and ready, enhance readiness for snow, ice, and severe weather, and strengthen coordination with law enforcement and emergency responders. These efforts ensure the Turnpike System remains safe, efficient, and well-maintained for all who travel.

2026 Annual Budget

The Maintenance Division 2026 budget is \$30,525,912. A decrease of 0.53% in comparison to 2025.

Customer Service Division

Division Description

The Customer Service Division is responsible for enhancing customer service for PIKEPASS and PlatePay users. The Division is friendly, knowledgeable, and trained to support patrons in remarkably helpful ways, whether over the phone, online, or in person.

Division Goals

- Value customer feedback and aim to continuously improve services based on input, improving customer experience for PIKEPASS and PlatePay users.
- Conduct comprehensive training programs for customer service representatives. These programs will focus on enhancing their knowledge of PIKEPASS and PlatePay services, tolling policies and procedures, and effective communication techniques. As well as investing in ongoing professional development opportunities to ensure staff remain up to date with industry trends and best practices in customer service.
- Streamline and enhance customer service operations, including customer relationship management (CRM) systems, interactive voice response (IVR) systems, and online chat platforms.

Division Strategic Initiatives

The Customer Service Division has designed coaching and feedback processes to educate and professionally enable staff to provide the level of customer service customers expect. While OTA sets high standards for quality and service, this is done with the customer experience in mind.

2026 Annual Budget

The Customer Service Division 2026 budget is \$31,625,578, an increase of 54.41% in comparison to 2025. This increase is primarily attributed to realignment of customer-related expenses from Comptroller division.

Highway Patrol Division

Division Goals

To ensure that Oklahoma's turnpikes are as safe as possible for patrons of the OTA. To ensure the preservation of peace by safeguarding the lives and property of motorists driving on Oklahoma Turnpikes against the effects of criminal activity and violations of traffic laws.

Division Responsibilities

The Oklahoma Highway Patrol is responsible for enforcing the traffic laws of the State of Oklahoma, apprehending criminals, and assisting in the preparation of cases for prosecution. Specific activities include patrolling and policing the turnpikes, enforcing laws, regulating and directing traffic movement, helping citizens and the motoring public, and cooperating with other law enforcement officers and public officials to enforce state laws on the Oklahoma Turnpike System.

The Oklahoma Turnpike Authority contracts with the Department of Public Safety to provide this service. The Department of Public Safety is reimbursed for all Turnpike Highway Patrol-related costs.

The administrator, a liaison position for the Department of Public Safety, for this division, reports to the Director of Maintenance for budgetary and purchasing review purposes.

Strategic Initiatives

The OTA troopers have continued to strive for consistent levels of service, utilizing the Special Emphasis Program, SMART trailers, motorcycle troopers, Size and Weights Program, and lasers for speed enforcement. Due to their success, all these programs will be continued in 2026.

- The Special Emphasis Program concentrates on violations that cause accidents. The Special Emphasis shifts are scheduled to coincide with the times and locations of the highest accident numbers.
- Speed Measuring Radar Trailers (SMART) are being used to alert drivers of their speed and to compile speed and traffic data for speed enforcement.
- Light-emitting speed Measurement Devices (Lasers) are being used for speed enforcement to counteract radar detectors and pinpoint specific violator vehicles. Ten of these devices are currently in use on the turnpike system. These Lasers give road troopers the ability to pinpoint speeding vehicles that use trucks as decoys.

- Size and Weight enforcement on the turnpike system is enhanced with five (5) size and weight troopers assigned exclusively to the turnpikes. These troopers are fully certified to inspect and weigh trucks on the turnpikes.
- Troop O (Aircraft Division) will be utilized in 2026 on all Turnpikes. Special emphasis will be placed throughout the year on speed enforcement, following too closely, and erratic driving behavior.

2026 Annual Budget

Expenses paid for this service are considered contractual and, therefore, budgeted and accounted for accordingly. Consequently, the number of employees carried by the Oklahoma Highway Patrol is not included in the calculation of employees of the Oklahoma Turnpike Authority. The 2026 Highway Patrol Division budget is \$22,905,836. This is an increase of 3.40% from 2025.

Positions

Executive Division

Description of Division

Serves as a liaison between the Legislature, the Authority, and Administration, and facilitates the development of priorities and goals for divisions and coordinates the accomplishment of those goals.

Division Responsibilities

The Executive Division consists of seven branches: Administration, Chief Financial Officer, OTA Communications & Marketing, General Counsel, Chief Engineer, Chief Security, and Internal Audit. Their responsibilities are as follows:

Administration: The Executive Director and the Deputy Director facilitate the development of policies, which will provide assurances to bondholders, convenience to patrons, and efficiency of operations. The Deputy Director also directly oversees the Human Resources, Customer Service and Information Technology Divisions.

General Counsel: The General Counsel is responsible for acting as legal advisor to the Authority, the Managing Director and division administrators in relation to their duties. The General Counsel attends meetings of the Authority, reviews all agenda items for legality and form, reviews all contracts, and financing for all bond-funded expenditures.

Chief Financial Officer: This branch is listed as Finance & Administration, and it oversees the Finance, Comptroller, Business Operations, Revenue Assurance Divisions, and the staff in the Internal Audit branch of the Executive Division.

Maintenance, Engineering & Construction: This branch includes the Chief Engineer and the Maintenance, Engineering, Construction, ROW & Utilities, and Access Program Manager.

Internal Audit: The Internal Audit Branch is responsible for conducting audit activities of the OTA. This includes both the internal audit and external audit functions. This function evaluates the effectiveness of the organization's system of internal controls and the efficiency of the organization's processes. Internal Audit develops an audit plan addressing the areas of risk and concern within the organization.

Chief Security Branch: This branch is charged with Cybersecurity and Incident Response, Review for compliance and risk, Internal investigations for potential

information and cybersecurity-related events, along with internal OTA information security, compliance and awareness training programs. This branch also does executive-level reporting and collaboration on cyber risk, information security risk, program risk, and current control effectiveness to reduce risk.

Public Relations: The Public Relations Branch works to improve customer and public opinions about the Oklahoma Turnpike Authority. This branch is responsible for providing information to the general public and handles the growing public relations needs for the organization.

2026 Annual Budget

The Executive Division budget decreased to \$5,795,913 in 2026, from \$6,113,679 in 2025, a decrease of 5.20%.

Finance Division

Division Description

The Finance Division consists of two branches, the Budgeting and Financial Analysis Branch and the Debt Administration Branch. Branch responsibilities are discussed below.

The Budgeting and Financial Analysis Branch is responsible for preparing an annual Operating and Maintenance, Reserve Maintenance, General Fund and Construction Fund Budget; periodic review of actual expenses versus budgeted expenditures; estimating potential revenues; analyzing revenue trends and making recommendations for improvements; financial planning; financial management; cash flow projections; investment administration; establishment of toll rates; overseeing the consulting traffic engineers' preparation of traffic and revenue estimates for existing and new projects; and preparation of various reports containing financial information and management used by the Authority and the Director for making policy and operating decisions of the Authority.

The Debt Administration Branch is responsible for payments of principal and interest from tolls and other revenues generated from the operation of the Oklahoma Turnpike System. This branch also works closely with the Financial Advisor and other members of the finance team to access the credit markets with the goal of borrowing at the lowest possible cost.

Division Goals

- Provide the Authority, Executive team, and other accurate financial projections related to both revenue and expenses
- Maximize sources of toll revenues, working closely with the Authority's Traffic and Revenue Engineer
- Oversee the debt program during the ACCESS program, procuring debt at the lowest possible cost of funds.

Division Strategic Initiatives

This division's goal is to work closely with the Program Manager and Financial Team to assist in pulling the information to advise the Authority and the Authority's Executive Team regarding financial projections and the need for new debt, if necessary.

2026 Annual Budget

The Finance and Revenue Division 2026 budget is \$1,100,263, an increase of 14.9% as compared to 2025. Much of this is related to increased costs related to the administration costs of the ACCESS bonding program.

Information Technology Division

Division Description

The Information Technology (IT) Division consists budgetarily of four branches, Data Processing, Telecommunications, Traffic Technology Operations and Document Imaging. For business management purposes, the IT Division has separated these functions into two management teams of Information Business Enterprise Services and Network and Operation Services, with further differentiation under each team.

IT leadership is committed to retaining and growing personnel within the Division. The IT Division strives to provide each individual with a positive and challenging work environment while equipping staff with training opportunities to continuously enhance skillsets. The IT Division is focused on a culture of serving others as we continue to enhance delivery of services to both internal and external customers.

Division Goals

- Deliver enterprise-level services with a focus on promoting a culture of innovation, transformation, and self-service for customers, ensuring they have access to the tools and data they need to support their initiatives.
- Provide efficient collection of tolls and continued assistance to the traveling public while looking for more efficient alternatives in managing toll collection operations.

Division Strategic Initiatives

The specific initiatives for the IT Division are prioritized based on the priorities of the OTA's overall main strategic objectives and the value they bring to the OTA and the State of Oklahoma. With technology as an integral component of nearly all workstreams in today's society, the IT Division participates in multiple crossfunctional teams to ensure success. The IT Division uses an agile approach, which enables continuous improvement. The top three strategic objections are:

- 1. Technology Advancements:
 - Deliver innovation to the Authority by working with the business to identify needs and perform discovery and selection on the optimal solution with a focus on self-service, automation, and efficiency.

- Spearhead process automation and integration by implementing solutions to transform and streamline business processes throughout the organization.
- Evaluate emerging technologies and systems to enhance technology services for both our internal and external customers.
- Continually seeking innovative methods to collect tolls in an efficient and accurate manner.

2. Risk Management:

- Continue to strengthen the OTA's network and infrastructure by creating redundancy and securing optimal performance for both our internal and external customers, assuring we maintain focus on longterm goals and objectives.
- Proactively maintain lifecycles of the Authority's software and hardware solutions, safeguarding these systems from unresolvable vulnerabilities and potential security threats.
- Securely and accurately collect, maintain, and exchange information while protecting privacy to maintain the public's trust.
- Maintain Payment Card Industry (PCI) compliance as per the most recent version of the PCI Data Security Standards (DSS).
- 3. National Interoperability (NIOP):
 - Advance NIOP as the other Hubs are ready to connect.
 - On-board new partners within the existing Central US Interoperability group (CUSIOP), of which the OTA is a member.
 - Extend the OTA's fiber network to support interoperability-related objectives and expansion of the Turnpike system.

2026 Annual Budget

The Information Technology Division 2026 budget is \$30,274,781, an increase of 25.07% compared to 2025. This represents a transfer of funding from the General Fund to operations to reflect that certain IT projects, such as cashless tolling, have been put into production. The entire Turnpike System became cashless as of November 24, 2024.

Human Resources Division

Division Description

The Human Resources Division, consisting of the Personnel and Safety branches, is dedicated to effectively managing its areas of responsibility with professionalism and efficiency. The division's primary goal is to provide timely, reliable, and high-quality services that support both internal divisions of OTA and external stakeholders.

Division Goals

The Human Resources Division delivers comprehensive services that support employees throughout their entire career lifecycle—from recruitment and onboarding through retirement. Key responsibilities for the Personnel Branch include:

- Administering employee benefits and overseeing payroll, timekeeping, and disability claim reporting.
- Developing and implementing personnel policies and programs that ensure compliance with organizational standards and legal requirements.
- Managing the state's Human Resources Information System (Workday) to maintain accurate, efficient, and reliable HR operations.
- Offering guidance and support to employees, supervisors, and leadership on HR matters.

The Safety Branch plays a vital role in ensuring employee health and workplace safety by:

- Designing and implementing programs to meet or exceed federal and state safety regulations.
- Promoting safe work practices that improve employee well-being and productivity.
- Administering the Workers' Compensation program to support injured employees and reduce workplace risks.

Through these combined efforts, the Human Resources Division ensures that employees are well-supported, workplace risks are minimized, and OTA remains positioned to achieve its mission effectively.

Division Strategic Initiatives

The Human Resources Division is focused on advancing initiatives that strengthen organizational effectiveness, employee well-being, and workplace safety. These efforts emphasize compliance, support, and accountability while aligning with OTA's mission and long-term goals.

- Policy and Compliance Continuously update HR policies to reflect organizational priorities and regulatory requirements, ensuring compliance and alignment with best practices.
- Employee Support and Engagement Expand employee services and communication efforts to promote career growth, wellness, and workplace satisfaction.
- Safety and Risk Management Advance safety programs, training, and monitoring to minimize workplace risks and maintain compliance with state and federal standards.
- Performance and Accountability Strengthen performance tracking and reporting to measure HR and safety outcomes and demonstrate alignment with OTA's mission.

2026 Annual Budget

The budget proposed by the Human Resources Division has increased from \$1,695,350 in 2025 to \$1,824,372 for 2026. This increase is primarily due to reclassification of expenses to better align enterprise risk management within the organization, such as tort liability insurance

Engineering Division

Division Description

The Engineering Division is responsible for the prioritization and design of Capital Plan projects as well as providing technical and administrative oversight for Expansion Bond Programs. The division establishes priorities for roadway, bridge, toll, service plazas, maintenance facilities, and safety projects. The division also administers the selection process for professional design services and oversees preliminary and final engineering plan reviews, conducts the bidding process, finalizes as-built plans, and maintains all project records.

Division Goals

- Provide a high-quality transportation infrastructure for customers by ensuring fiscal responsibility and competent design with an emphasis on Safety.
- Continue to strive towards improved solutions to every challenge through diligence in the design process and a thorough, detailed inspection program.
- Administer projects designed to increase service levels of critical locations throughout the turnpike system. This is done in close contact with outside consultants in every phase of design.
- Support internal and external customers with quality service by providing innovative solutions in a timely manner.

Division Strategic Initiatives

Provide a high level of service in 2026 with continuing implementation and oversight of the 5-year Capital Plan and the ACCESS Bond Program, which includes the consultant selections process, scope and fee negotiations, contract execution and management, design process oversight, quality control and quality assurance, advertisement and bidding, quality construction projects, and project close-out.

2026 Annual Budget

The Engineering Division 2026 budget is \$1,364,420, an increase of 6.28% in comparison to 2025.

Construction Division

Division Description

The Construction Division is responsible for the coordination and oversight of OTA construction projects in the Capital Plan and those that are part of the ACCESS Oklahoma bond program. This is accomplished by coordinating activities with other divisions within OTA, including Engineering, Maintenance, Comptroller, and ROW & Utilities, among others. The Construction Division also works closely with the Capital Plan Program, ACCESS Oklahoma Management Consultant, and the OTA General Consultant.

Members of the Construction Division are tasked with overseeing construction projects, reviewing construction plans and attending plan review meetings, assisting with the scheduling of bid lettings, selecting and overseeing Construction Management consultants, as well as processing construction estimates, change orders, and supplemental agreements. The Construction Division is also involved in creating efficient workflow processes, developing effective reporting tools, and asset management tracking to meet the needs of the OTA.

Division Goals

Provide high-quality transportation infrastructure for our customers with efficient, economical construction with an emphasis on safety.

Division Strategic Initiatives

The Construction Division will continue to provide a high level of service in 2026, with full focus on the Capital Program projects along with the ACCESS Oklahoma Program. The staff will work closely with internal Engineering, Maintenance, ROW & Utilities Divisions during the planning and construction phases so that all the projects are consistent in standards and specifications. The Construction Division will also work closely with stakeholders, such as Cities, County Commissioners, and other State Agencies, to ensure high-quality Oklahoma Infrastructure.

The Construction Division provides oversight for the ACCESS Oklahoma bond program and Capital Plan projects. The staff in the Construction Division provides a variety of knowledge to support the design and construction of future projects for the Capital Plan and ACCESS programs. The Division works closely with the Engineering Division to assist in the execution of pre-construction planning and specifications, the ROW & Utilities Division to help facilitate relocations and right-of-way acquisitions, and partners with other entities during construction.

2026 Annual Budget

The overall 2026 budget request for the Construction Division is \$689,042, which represents a decrease of 0.99% compared to 2025.

ROW & Utilities Division

Division Description

The Right-of-Way (ROW) & Utilities Division is responsible for the acquisition of right-of-way, the coordination of efforts needed to relocate utilities throughout OTA's right-of-way, as well as the management of concession facilities within the OTA right-of-way, and the management and maintenance of OTA-owned facilities. The staff diligently works in tandem with the Construction, Engineering, Comptroller, and Maintenance Divisions to provide project coordination across the Turnpike System.

To better manage OTA assets, the management of the maintenance of the OTA-owned customer service buildings was added to the ROW and Utilities Division in the 3rd quarter of 2025.

Division Goals

- Deliver conscientious and diligent property negotiations, which keep condemnation rates to a minimum, while continuing to help advance the construction process to meet project deadlines.
- Verify that all required utility relocations are appropriate and financially responsible.
- Oversee all concessions on the Turnpike system to ensure that the vendors in the concession area provide customers with acceptable facilities for gas, food, and restrooms.

Division Strategic Initiatives

The ROW & Utilities Division is responsible for overseeing the delivery of right-of-way projects to meet construction schedules, funding agreements, and administration of professional service contracts, eminent domain process, the coordination of utility adjustments, and the conveyance of surplus property no longer needed for turnpike projects. Collaborating with other divisions helps ensure construction begins on schedule, which in turn keeps project estimates on track. The Division will purchase the right-of-way needed and manage extensive reviews and approval processes for timely utility relocations.

The ROW & Utilities Division manages the Headquarters and Concession areas to ensure proper maintenance and operation to the high standard OTA requires across the system.

2026 Annual Budget

The budget proposed by the ROW & Utilities Division is \$1,711,215 for 2026. A total overall decrease of 0.71%.

Business Operations Division

Division Description

The Business Operations Division establishes and maintains strategic partnerships with OTA vendors, ensuring improved operational efficiency, transparency, and innovation.

The division is made up of two branches:

Business Operations: Manages all business contracts, including contracts for printing and mail services, manual image review, toll apps, registered owner of vehicle look-ups, and collections, along with any other contracts that affect costs associated with tolls collected via PIKEPASS and PlatePay.

Procurement: Provides support to the entire organization to obtain goods, services, or works from external sources. This includes procurement policy development, conducting bids, supplier evaluation, compliance, and ensuring purchases remain within budget.

Division Goals

Enhance operational efficiency through vendor partnerships and innovative contract management.

- Strengthen financial recovery efforts by diversifying collection strategies.
- Drive cost savings and sustainability in postage, printing, and procurement processes.
- Implement a 3rd Manual Image Review (MIR) partner to ensure the imaging review process continues when another MIR is unavailable to provide services.
- Increase transparency and accountability in procurement through centralized practices and the implementation of the P-Card Program.
- Use data-driven insights to inform strategic decisions and optimize performance across operations.

Division KPIs

- Percentage increase in successful collections and recovery rates.
- Cost savings realized from improved mailhouse operations and bulk purchasing.
- MIR images are properly identified.

- Registered Owner of the Vehicle (ROV) vendors are able to increase the number of identified registered owners.
- Number of purchase orders (POs) created and number of invoices processed through the Procurement branch.
- Analytics-driven reporting on procurement efficiency and vendor performance.

2026 Annual Budget

The 2026 Business Operations Division budget is \$29,195,692, which reflects a 1.83% decrease from 2025.

Revenue Assurance Division

Division Description

The Revenue Assurance Division is committed to the identification and implementation of financial and operational procedures and programs necessary or useful to ensure that the conversion of the Turnpike System to cashless tolling does not adversely affect the Oklahoma Turnpike's net revenues.

Division Goals

- Establish a data-driven focus on revenue assurance. Maintain a revenue assurance plan detailing each initiative and the associated progress to ensure revenue is collected and reported in the most costeffective manner.
- Oversee the revenue assurance plan, including transponder penetration, pursuable PlatePay transactions, and revenue collection. Elevate analytics capabilities to predictive and prescriptive.
- Gain an understanding of the OTA customer and gain visibility into potential new areas of revenue leakage and proactively define activities to mitigate the risk.

Division KPIs

With the conversion to cashless tolling, Oklahoma Turnpike toll collection is composed of Transponder (PIKEPASS) and Video Toll (PlatePay). The Revenue Assurance Division is responsible for working with all Divisions to ensure cashless tolling results in positive net revenue.

2026 Annual Budget

The Revenue Assurance Division 2026 budget is \$798,049, which represents an increase of 13.97% in comparison to 2025. This increase is primarily due to adjustments in staffing levels for new hires.

BUDGETARY POLICIES

Introduction

Budgetary decisions are based on several factors which influence the decisions contained within this document. These factors include parameters set within the Trust Agreement, the Official Statement, and the policies and practices set by the organization. All of these factors, combined together shape the direction of the organization and therefore the budgetary document. This section is intended to provide some of the guidelines which contribute to this process.

Trust Agreement Requirements

The Oklahoma Turnpike Authority Budget is prepared according to the following schedule which is mandated by the 1989 Trust Agreement.

The Authority covenants that on or before the 10th day of October in each fiscal year it will prepare a preliminary budget of Current Expenses and of monthly deposits to the credit of the Reserve Maintenance Fund for the ensuing fiscal year and the amounts and purposes for which monies held for the credit of the Reserve Maintenance Fund will be disbursed. On or before the 20th day of October in such fiscal year, copies of each such preliminary budget shall be filed with the Trustee and each Depository and mailed by the Authority to the Consulting Engineers, the Traffic Engineers and all bondholders who shall have filed their names and addresses with the Secretary and Treasurer of the Authority for such purpose. The Authority further covenants that it will comply with any reasonable request of the Trustee, each Depository or the Consulting Engineers as to the classifications in which such budget shall be prepared, particularly with respect to the divisions into which such budget shall be divided.

If the Trustee or the owners of five percent (5%) in aggregate principal amount of the bonds then outstanding shall so request the Authority in writing on or before the 1st day of November in any fiscal year, the Authority shall hold a public hearing on or before the 20th day of November in such a fiscal year at which the Trustee or any bondholder may appear in person or by agent or attorney and present any objections he may have to the final adoption of such budget. Notice of the time and place of such hearing shall be mailed by the Authority at least ten (10) days prior to the date fixed by the Authority for the hearing to the Trustee, the Consulting Engineers, the Traffic Engineers and all bondholders who shall have filed their names and addresses with the Secretary and Treasurer of the Authority for such purpose.

The Authority further covenants that on or before the 1st day of December in such fiscal year it will finally adopt the budget of Current Expenses and of monthly deposits to the credit of the Reserve Maintenance Fund for the ensuing fiscal year and the amounts and purposes for which monies held for the credit of the Reserve Maintenance Fund will be disbursed (herein sometimes called the "Annual Budget") and that the total appropriations in any division thereof will not exceed the total appropriations in the corresponding division in the preliminary budget.

On or before the 10th day of December in such fiscal year, copies of the Annual Budget shall be filed with the Trustee and each Depository and mailed by the Authority to the Consulting Engineers, the Traffic Engineers and all bondholders who shall have filed their names and addresses with the Secretary and Treasurer of the Authority for such purpose.

If for any reason the Authority shall not have adopted the Annual Budget before the first day of any fiscal year, the preliminary budget for such fiscal year, if approved by the Consulting Engineers, or if there is none so approved, the budget for the preceding fiscal year shall, until the adoption of the Annual Budget, be deemed to be in force and shall be treated as the Annual Budget under the provisions of this Article.

BUDGETARY POLICIES (Continued)

Trust Agreement Requirements (Continued)

The Authority may at any time adopt an amended or supplemental Annual Budget for the remainder of the then current fiscal year, but no such amended or supplemental Annual Budget shall be effective until it shall be approved by the Consulting Engineers, and when so approved, the Annual Budget so amended or supplemented shall be treated as the Annual Budget under the provisions of this Article. At least thirty (30) days prior to the adoption of any amended or supplemental Annual Budget, the Authority shall cause a notice of the proposed adoption of such amended or supplemental Annual Budget to be filed with the Trustee and each Depository and to be mailed to the Consulting Engineers, the Traffic Engineers and all bondholders who shall have filed their names and addresses with the Secretary and Treasurer of the Authority for such purpose. Such notice shall briefly set forth the nature of the proposed, amended or supplemental Annual Budget and shall state the copies thereof are on file at the principal office of the Trustee for inspection by all bondholders. Copies of any such amended or supplemental Annual Budget shall be filed with the Trustee and each Depository and mailed by the Authority to the Consulting Engineers, the Traffic Engineers and all bondholders who shall have filed their names and addresses with the Secretary and Treasurer of the Authority for such purpose.

The Authority further covenants that the Current Expenses incurred in any fiscal year will not exceed the reasonable and necessary amount therefore, and that it will not expend any amount or incur any obligations for maintenance, repair and operation of the Oklahoma Turnpike Authority System in excess of the amounts provided for Current Expenses in the Annual Budget, except amounts that may be paid from the Reserve Maintenance Fund. Nothing in this Section contained shall limit the amount the Authority may expend for Current Expenses in any fiscal year provided any amounts expended therefore in excess of the amounts provided for Current Expenses in the Annual Budget shall be received by the Authority from some source other than the revenues of the Oklahoma Turnpike System, and the Authority shall not make any reimbursement therefore from such revenues.

Accounting Basis

The 1989 Oklahoma Turnpike Authority Trust Agreement requires OTA accounts and records to be reported in accordance with generally accepted accounting principals (GAAP) for governmental entities. The Oklahoma Turnpike Authority is considered an instrumentality of the State of Oklahoma and is accounted for as an enterprise fund in accordance with GAAP. The Authority has adopted the accrual basis of accounting in conformity with GAAP. Revenues are recognized when they are earned, and expenses are recognized when they are incurred.

Budgets are adopted and maintained on a modified accrual (non-GAAP) basis of accounting whereas purchase orders are recognized as expenditures when issued and depreciation is not budgeted as an expenditure. All unexpended budget amounts lapse at calendar year end. Project-length financial plans are established for construction projects. Outstanding purchase orders are recognized as expenditures for budgetary control purposes. Depreciation is not recognized as an expenditure, but capital outlays are recognized as expenditures for budgetary control purposes. These expenditures are reclassified for the purpose of preparing financial reports on GAAP basis.

BUDGETARY POLICIES (Continued)

Budgetary Control

Budgets are controlled at the division level and the object of the budgetary controls is to ensure compliance with the provisions of the Trust Agreement. The Director may approve changes within the budget at any level, but an increase in the total budget must be approved by the Authority and comply with the Enabling Act and the Trust Agreement. Monthly reports of actual expenses versus budgeted expenses are provided to the Authority members and management.

Each division appoints a budget administrator who is responsible for budget analysis and the explanation for budget to actual variances. In addition the Finance Division performs concurrent budget to actual analysis to ensure appropriate adherence to the adopted budget. These analyses are used to evaluate possible expenditure trends which may require current year or future budgetary adjustments. They are also used by the Authority, Director and staff as a management decision making tool.

Other Budgetary Policies

- The Oklahoma Turnpike Authority's Financial Chart of Accounts is the basis for the budgetary expenditure categories used throughout the budget document.
- Within the Oklahoma Turnpike Authority's Financial Chart of Accounts the capitalization policies for various asset groups are stated. These asset groups currently include: land; roads and bridges and improvements; office furniture and equipment; data processing equipment; communication equipment; vehicles; machinery; new construction. Specific parameters and exceptions of asset capitalization treatment are defined within the Financial Chart of Accounts.
- Calculation of number of employees is based upon full time equivalent positions using a 40 hour work week. The number of full time equivalent (FTE) positions is displayed throughout the budget document and detailed within each department and division. Those departments and/or divisions which do not employ any FTE's do not display a position summary.
- Allocation of budgeted funds and number of employees to the turnpikes as the accounting cost centers is determined by the revenues generated by each turnpike.
- Expenses which are a function of a specific division which may benefit the entire organization are budgeted within that division. For example, data processing supplies and computers are used by the entire organization but are budgeted and charged to the Information and Communication Services Division.
- All charges to a division must be approved by the appropriate division head, or their designee, prior to payment for the expense.
- All expenses of the Reserve Maintenance Fund and the General Fund must have approval from the fund administrator prior to any charges being made to the fund. The fund administrator for the Reserve Maintenance Fund and General Fund is the Director of Finance.

- Uses of contingency funds must be approved by the Director of Finance prior to any payment of the expense. The use of contingency funds are only approved if the expense could not have been anticipated at the time the budget was prepared and if the expense is essential to the operations of the division.
- Funds are encumbered for the commitments of contracts related to the major construction projects of the Capital Plan.

2026 BUDGET CALENDAR

| June 23, 2025 | Budget packets distributed to divisions for use in their budget preparation. |
|------------------|--|
| July 21, 2025 | Divisions submit budget requests to Finance Division. |
| October 2, 2025 | Director submits draft budget to Authority for review. |
| October 7, 2025 | Presentation of the 2026 Preliminary budget to the Authority for consideration of approval. If approved, copies of the preliminary budget will be filed with the Trustee, Depository, Consulting Engineers, Traffic Engineers and all bondholders who have filed their names for such purpose. |
| November 4, 2025 | Presentation of the 2026 Final budget to the Authority for consideration of adoption. |
| December 5, 2025 | If approved, copies of the 2026 Annual budget will be filed with the Trustee, Depository, Consulting Engineers, Traffic Engineers and all bondholders who have filed their names for such purpose. |

Glossary of Terms

All-Electronic Tolling (AET) – Technology which enables cashless toll collection, either through transponders and/or license plate readers, eliminating the necessity of stopping the vehicle to pay the toll. AET is sometimes referred to as "cashless" tolling.

Assets - Properties or economic resources owned by the Authority.

Attendants (Toll) - Personnel that collect tolls on the Oklahoma Turnpike System.

Authority - The Oklahoma Turnpike Authority, an instrumentality of the State of Oklahoma.

Automated Coin Machine (ACM) – Unattended machines used for toll payment by coinage.

Automatic Toll Collections (ATC) System - A computerized base system, which an attendant uses to account for vehicles and toll fares and report results.

Automatic Vehicle Identification (AVI) System - An advanced toll collections system. This system, called *PIKEPASS*, collects tolls electronically enabling vehicles to travel on Oklahoma Turnpikes without stopping.

Barrier System Turnpikes - A configuration of toll gates whereby a patron pays the fare each time they go through a toll plaza. Toll Collection with a barrier system is not based on miles traveled, but rather tolls are charged for traveling through a certain point on the turnpike.

Bonds - A written promise to pay a specified sum of money, at a specified date in the future, together with periodic interest payments also at specified dates. These are referred to as the senior bonds and the subordinate bonds issued under the 1989 Trust Agreement.

Branch - Identifies the second level in the formal Oklahoma Turnpike Authority organization in which a specific activity is carried out; several branches may comprise a single division.

Budget - See General Fund Budget, Construction Budget, Reserve Maintenance Budget or Operating and Maintenance Budget.

Capital Project Enhancements - Capital projects that result in the acquisition of or addition to the Authority's general fixed assets.

Classification - A basis for distinguishing types of vehicles in order to assess the proper fare.

Closed System Turnpikes - A configuration of toll gates whereby a patron pays the toll as they leave the turnpike based on the point of entry and exit to the Oklahoma Turnpike System.

Commodities - Expenses that are incurred for supplies and expendable items.

Component Unit Financial Report (CUFR) - The official annual report of a governmental entity, which is a unit of the state.

Construction Budget - The construction budget is the primary means by which any New Turnpike Project, other Turnpike Project or Improvement costs are funded.

Glossary of Terms (Continued)

Concessions - Restaurants, service stations, and wrecker services that are authorized by the Oklahoma Turnpike Authority to conduct business on the Oklahoma Turnpike System.

Contingencies - Estimated amounts set aside for expenses that are uncertain.

Contractual Services - Those services that are provided to the Authority from outside firms or companies.

Division - Identifies the highest level in the formal Oklahoma Turnpike Authority internal organization in which a specific activity is carried out.

Electronic Systems Network - A means by which to connect personal computers together through a common file server.

Encumbrance - The "ear-marking" of funds to be set aside for commitments related to unperformed contracts for goods or services.

Enterprise Fund - An accounting fund in which the services provided are financed and operated similarly to that of a private business enterprise. The Authority intends that costs, expenses and depreciation, are to be financed or recovered primarily through tolls.

Expenses - Outflows or other uses of assets or incurrence of liabilities (or combination of both) from delivering or producing goods, rendering services or carrying out other activities that constitute the entity's ongoing major or central operations.

Fare - See Toll.

GAAP - Generally Accepted Accounting Principles.

Goal - The aim or standard of a program that is meant to be achieved.

General Fund - The fund in which expenses that are not accounted for in any other special fund are accounted for.

General Fund Budget - The general fund budget is the primary means by which projects that do not fall within the boundaries of other funds are funded.

Interoperability – A cooperative arrangement established between public and/or commercial entities (Authorities, parking lot operators, etc.) wherein tags issued by one entity will be accepted at facilities belonging to all other entities without degradation in service performance.

Investments - Securities that are held for the production of revenues in the form of interest or dividends.

Nationwide Electronic Tolling Interoperability (NIOP) - Is the establishment of a system in which customers have the choice of opting into and are able to pay tolls on any participating toll facility in the country using a single account.

Glossary of Terms (Continued)

Open Road Tolling (ORT) - An electronic Toll Collection System without toll plazas, where drivers will get charged the toll without having to stop, slow down, or stay in a given lane.

Operating and Maintenance Budget - The annual operating and maintenance budget is the primary means by which the general operating costs of the organization are funded.

Glossary of Terms (Continued)

Platepay - All-electronic tolling replaces the cash collection method at the toll plaza and uses an invoice mailed to the customer for payment.

PIKEPASS - An electronic device about the size of a credit card attached inside the windshield of a vehicle. When the vehicle travels through the designated *PIKEPASS* lane, the identification number is read, and the patron's toll is automatically deducted from their prepaid *PIKEPASS* account.

Personnel Services - Costs associated with the employment of permanent and temporary personnel of the Oklahoma Turnpike Authority.

Reserve Maintenance Budget - The reserve maintenance budget is the primary means by which monies shall be applied or held in reserve to pay the cost of resurfacing or rebuilding the Oklahoma Turnpike System, extraordinary maintenance or repairs, engineering expenses and insurance premiums, or self-insurance reserves.

Revenue - Funds that the Oklahoma Turnpike Authority receives as income. This includes such items as tolls paid by turnpike patrons, concessions revenues, and interest income.

Revenue Fund - A fund that accounts for all tolls and other revenues derived from the operation or ownership of the Oklahoma Turnpike System.

Risk Management - The ways and means used to avoid loss or to reduce its consequences in the event of a catastrophic occurrence.

Trust Agreement (Indenture) - An agreement dated the 1st day of February 1989, between the Authority and its bondholders to account for funds, and its reporting thereof, and conduct business in a specified manner.

Trustee - A fiduciary, which holds the bond proceeds on behalf of the bondholders for the Authority.

Turnpike - A highway or a superhighway where a toll is charged for its use. Toll revenues are used to pay all operating and maintenance costs for the turnpikes and to pay off the bonds issued to finance their construction.

Turnpikes, Existing - Refers to Turnpikes sections that are currently fully operational and not the new sections extending the turnpike. Turnpikes with existing sections and new extensions are the H.E. Bailey, Kilpatrick and Creek. Other existing turnpikes without new extensions are the Turner, Will Rogers, Indian Nation, Muskogee, Cherokee, Chickasaw and Cimarron Turnpikes.

Glossary of Terms (Continued)

Turnpikes, New Extensions - Refers to Turnpikes which started new extensions in 1999. These include the Kilpatrick, Creek, and H. E. Bailey Turnpikes.

Turnpike System - Refers to Turnpikes Existing and New.

Toll - A fee charged for passage along a turnpike.
