Bridge rehabilitation begins on US-312/Cimarron Turnpike Spur

A bridge rehabilitation project will begin Monday on US-312/Cimarron Turnpike Spur over US-177 (mm 19-20) near Stillwater. The project is expected to be completed this fall.

The eastbound US-312/Cimarron Turnpike Spur ramp above US-177 (mm 19-20) will be narrowed to one lane from 8 a.m. Monday through March for bridge repairs.

This project will have several phases of construction, and the traffic configuration will shift throughout. Notice will be sent prior to new lane closures occurring.

The \$2.4 million bridge rehabilitation project includes partial replacement of the deck, hydro-demolition and bridge deck overlay, raised median removal, approach slabs, repairs to the substructure, shoulder rehabilitation and updating the guardrail. The project was awarded by the OTA Board in December to PBX Corporation.
