

**YOUR CAR IS A SOURCE OF  
STORMWATER POLLUTION**

**WHAT CAN YOU DO  
TO HELP?**

**Maintain your vehicle.  
Never dispose of vehicle  
fluids down a storm  
drain.**

*Oil and antifreeze are very toxic*

**Wash your car  
at a commercial  
car wash.**

*Sediment and fluids washed off of cars in  
neighborhoods go directly to storm  
drains*

## **Keep tires properly inflated**

*Properly inflated tires improve mileage and reduce emissions*

## **Drive less and buy low emission vehicles**

*Reduced emissions reduces particles that can settle out on the roadway*

## Don't throw trash from cars

*Litter in storm water systems impacts  
people, animals, fish, and plants.*
