

Uniform Building Code Commission Technical Code Review Committee

Public Comment Form

NOTE: This form and any attachments hereto are subject to the Oklahoma Open Records Act and may be disbursed, upon request, without further notice to the submitter.

INSTRUCTIONS:

- 1. Please type or print clearly.
- 2. Form must be signed. Any forms that are not signed or filled out completely, may not be considered.
- 3. Each requested change must be on a separate form.
- 4. If the space to show the proposed change or supporting information is not big enough to show the entire change, write the words "See Attached" in the space provided and submit the change on a separate page.

Code Change Information:			
Will this change increase the cost of construction? Yes ☐ No ✓			
Which code needs to be revised? IFC			
Which section of the code needs to be revised?			
Section <u>3314.1</u> Table	Figure	Page	

Show the proposed new, revised, or deleted text in Legislative format. Line through tex to be deleted and underline text to be added or revised.
3314.1 Where required. In buildings required to have standpipes by Section 905.3.1, not less than one standpipe shall be provided for use during construction. Such standpipes shall be installed prior to construction exceeding 430 feet in height above the lowest level of fire department vehicle access. Such standpipes shall be provided with fire department hose connections at locations adjacent to stairways complying with Section 3312.1. As construction progresses, such standpipes shall be extended to within one floor of the highest point of construction secured decking or flooring.
Supporting Information: State the purpose and reason for the change and provide substantiation to support the proposed change.
Requiring the standpipe to be operational sooner during the construction process could help immensely during the response to a fire on an active construction site.
Many large construction site fires have occurred in the state over the last 15 years or so. This would help cut down on response time.
This would need to be reflected in the IBC and potentially the IEBC as well.

Proposed Change:

Bryant
