Nov 12

## The Mason Treat Act Q & A

### **How does the dealer submit the pre-registration information?**

The dealer may use a portal from an Authorized Temporary License Plate Vendor or through Service Oklahoma's OKCARS motor vehicle system.

### **What information will be required during the pre-registration process?**

- VIN
- Year
- Make
- Model
- Vehicle type - blank if it is an auto, M if it is a motorcycle
- Plate type - T for temporary or P for plate
- Plate number
- Date of sale
- Buyer name, address, city, state, zip, email and phone number
- Dealer license number (new or used)

### **What if my customer does not have an email address?**

Service Oklahoma has stated the email address is a required field but the field does not validate if the email address is correct at this time. If a customer does not have an email address, you should be able to enter "no email" into the field.

### **Will dealers still affix paper tags onto vehicles they sell?**

Customers who are not transferring an existing Oklahoma metal plate should receive a temporary paper tag that will be good for ten days. Temporary paper tags should be affixed onto customers' vehicles until they receive their metal license plates and pre-registration decals. The date on the paper tag should be the date that the paper tag expires: ten days from the date of sale.

### **What is the process if the customer has an existing metal plate?**

The dealer will place the metal plate on the vehicle purchased and will pre-register the plate to the vehicle purchased.

### **Will dealers be required to issue metal plates?**

No, metal plates will be issued by Service Oklahoma license operators (tag agents).

## The Mason Treat Act Q & A

### **What is the process if the buyer is from out of state?**

Place a 10 temporary tag on the vehicle and complete the pre-registration process. Service Oklahoma licensed operators (tag agents) will mail them a 60 temporary metal plate.

### **What if the contract is a spot delivery and did not go through or the contract has to be rescinded and the dealer has already pre-registered the vehicle.**

The Authorized Temporary License Plate Vendors Portal or the Service Oklahoma portal will have a button to undo the pre-registration.

### **Will there be a penalty if dealers do not submit pre-registration information within two business days of the sale?**

Delaying the submission of the pre-registration information may result in customers receiving their metal plates and/or pre-registration decals late. Customers would then be unable to affix the plates and decals within the required ten-day window from the date of purchase. This may result in customers facing penalties at the discretion of law enforcement.

### **Can dealers use their old temporary tags after September 1, 2024?**

No, Effective September 1, 2024, all dealers must use the new 10 day temporary tags.

### **What if a customer does not receive their temporary metal plate, can the dealer issue another paper tag?**

No, a dealer may only issue one paper tag. Customers should contact the licensed operator selected by the dealer during the submission of the pre-registration information. The contact details for that licensed operator will be in a confirmation email that the customer receives after the pre-registration information was submitted. Alternatively, customers can contact Service Oklahoma at (405) 522-7000 from 8 a.m. to 5 p.m. Mondays through Fridays.

### **What is the process for Consignment Sales?**

Process consignment sales the same as you would a regular sale. If the customer has a metal plate, place it on the vehicle purchased and complete the pre-registration process. If there is not a metal plate to be transferred, issue a 10 day temporary tag and complete the pre-registration process.

### **What if the customer has a vanity plate?**

The customer should keep the regular metal plate in the vehicle. You will pre-register the regular metal plate.

**Who should customers contact if they do not receive their pre-registration decals and metal license plates within ten days of vehicle purchase?**

Customers should contact the licensed operator selected by the dealer during the submission of the pre-registration information. The contact details for that licensed operator will be in a confirmation email that the customer receives after the pre-registration information was submitted. Alternatively, customers can contact Service Oklahoma at (405) 522-7000 from 8 a.m. to 5 p.m. Mondays through Fridays.

**How long will customers have to complete their full registration after they pre-register their vehicle?**

Oklahomans will still have two months from the date of purchase to complete their vehicle registration and will then replace the pre-registration decals with the standard month and year decals.

**How do dealers contact Service Oklahoma?**

Dealers may email Service Oklahoma at [DealerSupport@serviceok.gov](mailto:DealerSupport@serviceok.gov).

**What if the customer has a tribal plate?**

The pre-registration process applies to all vehicles purchased in the State of Oklahoma on or after September 1, 2024, regardless of whether the vehicle will be registered in another state, jurisdiction or tribe.

**Will Service Oklahoma or the licensed operator mail to a P.O. Box?**

Yes, Service Oklahoma or licensed operators will mail plates to a P.O. Box.

**Is The Mason Treat Act going to change the process of adding liens through licensed operators (tag agents)?**

No, the process is not changing. While the paper process for adding liens with a licensed operator is a viable option, liens can also be added during the initial sale process from dealers' OkCARS portal. However, if a dealer decides to submit pre-registration information through a file transfer, liens will still need to be added through their OkCARS dealer login.
