

A scenic waterfall cascading over mossy rocks in a lush green forest. The water flows over several tiers of dark, wet rocks, creating a soft, white mist. The surrounding vegetation is dense and vibrant green, with some leaves showing early autumn colors. The overall atmosphere is peaceful and natural.

# Water for 2060 Excellence Awards

Recognizing exceptional contributions to the promotion and implementation of water conservation, reuse, and efficiency.

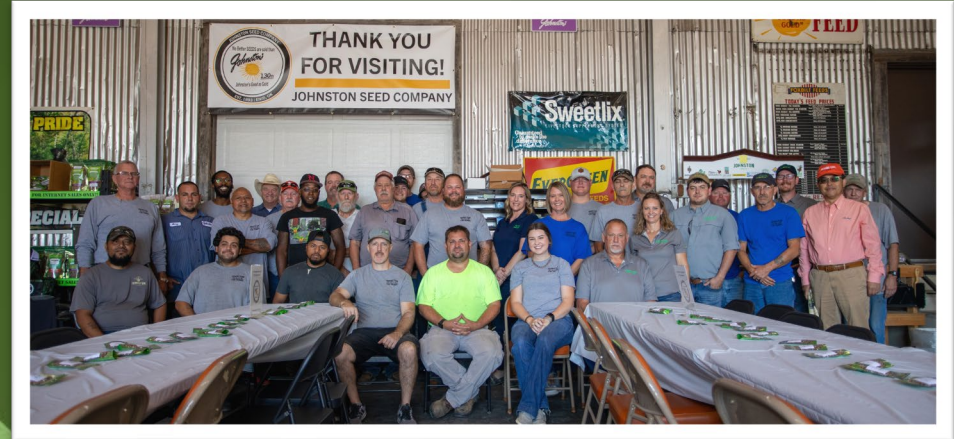

# Master Irrigator's Program, OSU Extension

*For the promotion of water conservation and efficiency through advanced training for agriculture producers on irrigation scheduling, crop management, and the economics of irrigated agriculture.*

# Johnston Seed Company

*For the promotion of cover crops as a conservation tool and significant contributions to sustainable agriculture in Oklahoma.*

**JOHNSTON**
