Selecting a discipline of engineering does not necessarily indicate competency to practice all aspects of that discipline of engineering. The licensee is required by law to only practice within the discipline of engineering in areas in which the licensee is competent.

As an example, listing "Civil" as your primary discipline does not necessarily mean that you are competent to do all types of civil engineering projects. The civil engineer's specialty may be in wastewater, but not transportation. In this case, the engineer would simply list "Civil".

**The following criteria must be met to designate a discipline of engineering:**

- a. A degree in the discipline of engineering, **or**
- b. An experience record documenting at least 4 years of experience in the discipline of engineering under the supervision of a PE, verified by at least one PE reference provider that has personal knowledge of the license holder's character, reputation, suitability for licensure, and engineering experience, **or**
- c. Verification of successful passage of the examination on the principles and practice of engineering in the discipline of engineering designated.
- d. If you are selecting "SE" as your area of competence, you must meet the qualifications as indicated in the instructions to acquire the P.E., S.E. designation.\*

**Please choose your discipline(s) from the list below.**
