

Join ORHRIDN *For Providers, Care Teams & Administrators*

NOTICE: To be considered for program participation, Provider and Clinic/Site Enrollment forms must be submitted by **December 1, 2026**.

The Oklahoma RHTP [Technology Cooperative](#), supported through the Oklahoma Rural Health Research, Innovation and Deployment Network (ORHRIDN), connects rural primary care and behavioral health providers, clinics, care sites, and care teams to a shared technology purchasing and implementation model. By combining statewide needs and solution priorities, ORHRIDN will identify and evaluate practical, innovative technologies, coordinate procurement, and support integration and deployment. Selected technologies may receive direct RHTP investment and be deployed at participating sites to improve care-delivery efficiency, service reach, care coordination, specialty-care access, patient engagement, and local capacity.

To join the network, providers should complete the **Provider Enrollment & Priority Interest Form**, and an appropriate clinic or agency representative should complete the **ORHRIDN Technology Integration and Deployment Readiness Survey (Clinic/Site Enrollment)**. Together, these prioritized forms establish provider and clinic/site enrollment records, capture solution priorities and readiness, and support early solution matching and deployment sequencing. One **Clinic/Site Profile Survey (CPS)** should also be completed for each participating clinic/site. The separate, voluntary **RHTP Statewide Rural Provider & Community Needs Assessment** allows respondents to describe rural care-delivery, clinic/site, and patient/client needs in greater detail. Links to all four forms appear below. Previously completed forms need not be repeated. Registration supports solution matching and deployment planning but does not guarantee funding, technology selection, or deployment.

Please use or share only the applicable approved links ([Click title](#) or [scan QR below](#)):

Provider Enrollment & Priority Interest Form - *Due December 1st*

If any clinic/site providers have not enrolled, please share this link with them. ORHRIDN, managed by the Oklahoma State University Center for Health Systems Innovation (CHSI), uses enrollment to establish or maintain provider records, confirm affiliations, understand program interests, support communication, and guide solution matching, planning, implementation, and evaluation. The Provider Enrollment & Priority Interest Form takes about 5-10 minutes to complete. Please do not enter patient-level protected health information.

RHTP Statewide Rural Provider & Community Needs Assessment - *Response requested by December 1st*

If you or your clinic/site staff have not completed the Needs Assessment, please do so. It captures Primary Care, Behavioral Health, and Consumer-Facing/Community perspectives and may be shared with rural patients/clients or community members. The Oklahoma State Department of Health's RHTP Technology Cooperative and Consumer-Facing Technology programs use this input to identify rural needs and guide solution evaluation, implementation, and priorities. The Needs Assessment takes about 10-15 minutes, and research participation is voluntary. Choosing whether to participate will not affect Rural Oklahoma Network (ROK-NET) or ORHRIDN Provider Network enrollment, RHTP eligibility, funding, services, technology deployment, or other program opportunities. Participation does not guarantee funding, technology, services, or selection for a program activity. Provider Enrollment, the Technology Integration and Deployment Readiness Survey (Clinic/Site Enrollment), and the Clinic/Site Profile Survey are separate program/operational activities and do not constitute research consent. The Needs Assessment begins with research information and an electronic consent option to participate.

Clinic/Site Enrollment

Technology Integration and Deployment Readiness Survey (Clinic/Site Enrollment) - Due December 1st

If the clinic/site has not completed its readiness survey, please share this link with an appropriate clinic/site or authorized system representative. CHSI uses this brief survey to confirm clinic/site enrollment and interest, identify approval and technical contacts, assess EHR/integration and implementation readiness, and support early solution matching and deployment sequencing. The survey takes approximately 10-15 minutes. One response is requested per physical clinic/site; an authorized system representative may use the multiple-site interest option. Please do not enter patient-level protected health information.

Clinic/Site Enrollment

Clinic/Site Profile Survey - Due December 15th

One Clinic/Site Profile Survey (CPS) should be completed for each participating clinic/site. The CPS may be proactively forwarded to and completed by an appropriate site representative. If the clinic/site has not completed its profile, please share this link with an appropriate manager, director, owner/administrator, provider/clinician, or other representative who manages business functions and can access operational information and metrics. CHSI may contact the site when CPS information is incomplete, cannot be linked to the appropriate site, or requires clarification. CHSI uses the CPS to understand clinic/site structure, operations, staffing, technology, access, and other characteristics that guide Technology Cooperative planning, technical assistance, implementation, and deployment. The Clinic/Site Profile Survey can take between 30-45 minutes to complete. It may be partially filled and resumed later if using the same computer and browser to access it, as needed.
