## OKLAHOMA PERSONAL PROPERTY SCHEDULE

### Section I - Introduction

### Section II - Index

### Section III - Valuation and Definitions

### Section IV - Agricultural

Agricultural Products	Livestock
Balers	Livestock, Other
Combines	Mower Conditioners
Cotton Harvesters	Sprayers
Cotton Pickers	Tractors
Forage Harvesters	Windrowers

### Section V - Business Equipment

Computer Systems	Office Machines
Monitors	Safes
Multi-Function Printers/Copiers	Scanners
Office Furniture	

### Section VI - Construction or Industrial Equipment

Air Compressors	Forestry Equipment
Backhoes	Generators
Compaction Equipment	Graders
Concrete Equipment	Lift Truck - Rough Terrain
Cranes-Hydraulic	Lifting Equipment
Cranes-Lattice Boom	Log Loaders
Cranes-Truck Mounting	Pile Driving
Crawler Loaders	Pumps
Crawler Tractors	Road Maintenance Equipment
Crushing & Conveying Equipment	Scrapers-Self Propelled
Excavators	Skid-Steer Loaders
	Trenchers
	Wheel Dozers
	Wheel Loaders

### Section VII - Petroleum

Drilling Rigs	Pipeline
Compressors	Tanks
Meters	

## **Section VIII - Other Equipment**

Billboards  
Carwash Equipment  
Coin Changer  
Food Merchandisers  
Game Machines

# Personal Property Valuation Schedule

## Introduction

This schedule has been prepared by the Ad Valorem Tax Division, pursuant to 68 O.S. 2011, § 2875 A(4), to help achieve equity in the assessment of the personal property of commercial and industrial establishments through uniform application of valuation guidelines. It is the goal of this Division that equity be realized within and between all classes of property throughout all taxing jurisdictions in Oklahoma.

**None of the content of this schedule is intended, in any way, to relieve property owners or assessing officials of their obligations by law to report, value, or assess personal property at its true and full market value. Application of the valuation guidelines, procedures, and rates contained in this publication, together with sound judgment on the part of assessment officials, will help determine the validity of values received from a variety of commercial operations. Methodologies contained herein are intended only to provide the user with an approximation of value for the personalty "typical" for that class, not an absolute value. The replacement cost less normal depreciation tables are provided to determine estimated market value based on adjustments to information obtained from property owners. All forms of depreciation including physical, economic, and functional obsolescence should be considered as applicable to arrive at current fair cash value.**

This Schedule is available on the Oklahoma Tax Commission website. [www.tax.ok.gov](http://www.tax.ok.gov) (select- Ad Valorem, select- Publications, select Business Personal Property Valuation Schedule.)

Questions regarding the schedule, or suggestions for future schedules, may be directed to:

Oklahoma Tax Commission  
Ad Valorem Division  
409 N. E. 28th Street  
Oklahoma City, OK 73105  
(405) 319-8200

## **VALUATION OF PERSONAL PROPERTY**

Although the valuation of personal property differs from that of real property in some ways the same basic appraisal concepts apply.

The International Association of Assessing Officers (IAAO) Standards on Valuation on Personal Property is the general accepted methodology for the appraisal of personal property.

The following is the Valuation Section of the standard that has been provided for the appraiser.

The complete text may be found on the IAAO Website:

<http://www.iaao.org/documents/index.cfm?&Category=23>

It is recommended that these standards be recognized by the appraiser.

## **IAAO Standard on Valuation of Personal Property Section 7**

### **7. Valuation**

#### **7.1 Trade Level**

All approaches to personal property valuation should consider trade level, which refers to the production and distribution stages of a product. The appraiser should recognize three distinct basic levels of trade: the manufacturing level, the wholesale level, and the retail level. Incremental costs (such as freight, overhead, handling, installation, and sales taxes paid on installed costs) are added to a product as it advances from one level of trade to the next, thereby increasing its value as a final, in-service product. Thus the value of goods will differ, depending on their level of trade. The appraiser should value personal property at its current level of trade, theoretically to a buyer within that same trade level. Such considerations are particularly important in inventory valuation.

#### **7.2 Valuation Techniques**

The cost, sales comparison, and income approaches should be considered in the appraisal of personal property as long as the market within the trade level is in equilibrium. If demand exceeds supply or supply exceeds demand, i.e., unbalanced markets, one or more of the three approaches may produce distorted results. The degree of dependence on any one approach could also change with the availability of reliable data. Units of comparison, such as value of personal property per square foot, for comparable properties can be used to check the value estimates derived from the standard appraisal approaches. Such units of comparison can also be used when the data required for other approaches are unavailable. Examples include cost/value per square foot of FF&E in an office building or cost/value per square foot of inventory for a retail business.

The valuation method and techniques employed should be based on the appraiser/assessor's value standards. In most jurisdictions, market value is defined by value-in-exchange, that is, the value to the next buyer as of the lien date, and highest and best use principles. The highest and best use of an asset will likely be as fully installed and operational to its maximum productivity.

##### **7.2.1 Cost Approach**

Costs used in the cost approach can be original construction cost, new or used acquisition cost, replacement, or reproduction costs. Allocated cost can be used if items are purchased in bulk, although often only original or acquisition costs are readily available for personal property assessment purposes. The cost approach provides an estimate of value based on the depreciated cost of the property. In applying the cost approach to personal property, the appraiser must identify make and model number, year acquired, and total acquisition costs, including installation, freight, taxes, and fees. The acquisition costs should then be trended and depreciated as appropriate to reflect current market values. Acquisition costs of equipment obtained pursuant to a lease-purchase agreement should include the total payments, not just the final payment. If financing costs are factored into the lease payments, an adjustment to the "selling price" may be required.

The assessor should recognize that appraisal and accounting practices for depreciating personal property may differ. Accounting practices provide for recovery of the cost of an asset (the return of the asset), whereas appraisal practices strive to estimate a value related to the current market and should consider both return of the asset and return on the asset. A productive asset may continue to have value at the end of its scheduled life or conversely, an asset may lose its value prior to the end of its scheduled life. Appraisal practice must consider accrued depreciation in the forms of physical deterioration, functional obsolescence, and external (economic) obsolescence. The appraiser/auditor

should also be familiar with the purchase accounting methods used by businesses in their jurisdiction. A company's depreciation schedule should provide life tables for various asset categories.

The restoration or modification of machinery or equipment may be treated differently for assessment and accounting purposes. For accounting purposes, the restoration/modification cost may be entered as a different asset, whereas the appraiser/assessor would add the cost to the original item and adjust the effective age of the asset.

Useful guidelines in the form of depreciation schedules or tables are available from state or provincial assessing authorities, professional valuation companies, and appraisal publishing firms. Because the personality of a business normally is acquired throughout the year, acceptable depreciation schedules will permit the full year's depreciation or will consider the average age of six months (half-year convention). Generally, these guides are sufficiently accurate for use in mass appraisal of property. If guides do not exist for specific types of personal property, it is recommended that they be developed. Depreciation schedules can be developed from a study of asset lives and resale prices. The schedules can be asset specific or for general categories such as personal computers or furniture and fixtures. Most schedules base annual depreciation on a percentage of original cost or replacement cost.

However, there can be particular types of property where standard depreciation schedules may not apply and an accurate depreciation estimate can only be made by using an alternate method. One such method is the capitalization of income (rent) loss due to the inefficiency of the property. It is similar to the practice in real estate valuation of calculating the depreciation due to rent loss caused by internal or external forces. An example would be if an existing machine can only run eight hours per day, but a modern replacement can run ten hours per day, the loss in revenue from the two hours of non-production could be capitalized and the amount subtracted from the replacement cost. Whether the obsolescence was functional or economic would depend on whether the forces reducing the production hours were internal or external. The appraiser/assessor's experience and judgment should inform their decision of whether to use a standard schedule, develop a new schedule, or apply an alternate method of calculating depreciation.

### **7.2.2 Sales Comparison Approach**

The sales comparison approach may have limited application for appraising machinery and equipment used in business because sales of used items are generally few and are often liquidation sales, which typically are not at market value, or are bulk asset purchases. In such circumstances, list prices including delivery costs and sales taxes, when supported by the marketplace, can be good indicators of value. Used assets acquired in bulk purchases may have been sold in an arm's-length transaction so market data may be evident. The value of an individual item to the entire sale price (purchase price allocation) may be available in the buyer's records.

Care must be taken to assure that the property is valued at the proper level of trade. Trade and cash discounts should be subtracted from the list prices, particularly if the equipment sold is still at the wholesale level of trade. If reliable sales data are available, the adjustment process can be applied in the same manner as for real property. If an adjustment for time of sale is made, the adjustment may be negative due to additional accrued depreciation of the property or positive due to inflation.

### **7.2.3 Income Approach**

The income approach produces an estimate of the present worth of income to be received in the future. To apply this approach, the appraiser must estimate the income stream over the remaining economic life of the subject property. This is an important concept; the future income-generating capacity of personal property is typically short-lived compared to real estate. The direct capitalization

technique (Income divided by Rate equals Value [ $I/R=V$ ]) can be used if the single-year income applied is indicative of the annual income for the remaining life of the asset and the capitalization rate reflects the recapture period of the asset. Personal property can also be valued using a yield capitalization technique, which values the changing productivity (income) of the asset over its projected remaining life more accurately than  $I/R=V$ . Many industries use gross income multipliers (GIM) or gross rent multipliers (GRM) to value personal property that has typical and similar operating expenses. When applying the income approach to value personal property, it is important to capitalize income from the rental of an asset not the income of the business that owns the asset.

Typical gross incomes may differ under various leasing arrangements; lessors may be able to supply average gross revenues for each type and model. The historical pattern of net income streams, together with an analysis of current leasing patterns, will suggest the likely shape of future income streams. The capitalization technique chosen should be consistent with the anticipated income stream.

When reliable lease data on equipment leases are available, the income approach can provide good value estimates. Lessors should be required to document operating expenses to be deducted from the gross income. These expenses include management expenses directly associated with the production of lease revenue, equipment maintenance expenses, and the like.

Developing an appropriate capitalization rate is a critical step in the capitalization process. Capitalization rates contain provisions for return on the investment (discount rate) and capital recovery (return of the investment), as discussed in the cost approach. In addition, property taxes maybe accounted for as a component of the capitalization rate. (See Standard on Mass Appraisal of Real Property [IAAO 2002].)

Data on the economic lives of various types of personal property can be obtained from a number of sources. Lessors are perhaps the best source, although typical economic lives should be documented with dates of acquisition and disposal of actual items. U.S. federal tax guidelines for modified accelerated cost recovery systems (MACRS) can be helpful as a starting point. Economic life data can also be used to estimate recapture rates. When the income approach is applied, consideration should be given to the salvage or scrap value, if any, when the property has reached the end of its normal life expectancy (remaining economic life equals 0). An analysis of resale values of used equipment can be helpful in determining salvage value.

In cases where property is both sold and leased, gross income multipliers (GIM) should be developed. Gross income multipliers can provide reliable value estimates for personal property items that have similar operating expenses, discount rates, and remaining economic lives.

### **7.3 Valuation Guidelines for Tangible Personal Property**

As discussed in section 7.2, the cost, sales comparison, and income approaches should be considered in the appraisal of tangible personal property. However, certain types of personal property do not readily lend themselves to development of all three generally accepted approaches. If sufficient sales data are available to support use of the sales comparison approach it should receive primary consideration. In many instances, however, sufficient sales data are not available, and in these instances, more reliance should be placed on the cost approach or the income approach. The assessor must always consider the quality and quantity of the available market data.

The following are procedures typically used in the valuation of common types of tangible personal property.

### **7.3.1 Machinery and Equipment**

Machinery and equipment (M&E) are items of personal property used in the normal conduct of business that are not permanently attached to the real estate and, unlike inventory, are not intended to be sold. Utility and ability to produce income are factors that influence the economic life of machinery and equipment. The market value of machinery and equipment typically follows a declining path once the assets are acquired and put into operation due to normal wear and tear and technological changes. Salvage or scrap value should be considered at the end of economic life.

The most common approach for the valuation of machinery and equipment is the cost approach, although the sales comparison approach should receive primary consideration when adequate data are available. In particular, small equipment, for which there is often an active resale market, may lend itself to valuation by the sales comparison approach. Machinery and equipment can be classified as short-lived (computer) or long-lived (drill press) so not all M&E can be grouped together for depreciation purposes.

### **7.3.2 Furniture and Fixtures**

The procedures described for the appraisal of machinery and equipment are generally used in the appraisal of furniture and fixtures (F&F). Because F&F generally have similar lives, they are often grouped into one item for depreciation purposes.

### **7.3.3 Leased Equipment**

Valuation of leased equipment is complicated by such factors as the wide variety of leased equipment, the variety of leasing arrangements, rapidly changing technologies, and changing market conditions. These factors can cause the quality and quantity of available market data to vary.

The income approach is often used in valuing leased equipment because data on sales and rental rates are usually available. When sales data are available, emphasis should be given to income multipliers derived from market data.

The cost approach may be used cautiously in the valuation of leased equipment because markups of cost to list prices vary from one company to another on the same type of equipment and also vary with the level of trade. If manufactured cost is the only information that is reported, the appraiser should obtain more data from the lessor or compare the equipment in question with similar equipment of known cost.

### **7.3.4 Inventories**

The term inventories includes specific categories of goods held for resale in the course of business, goods in the process of production (termed goods in process), and raw materials.

Whether certain types of goods are classified as inventories or as something else will change depending on the trade level at which the appraisal is being made. Machinery and other equipment that remain classified as inventories at the manufacturing, wholesale, and retail levels become machinery and equipment upon reaching the end user.

Inventory valuation, both for goods in process and for finished goods, should include the value of labor, materials, and overhead expended during production.

There are many methods for estimating the value of inventories. Some of the more common ones are: last in, first out (LIFO) first in, first out (FIFO), weighted average lower of cost or market.

The most commonly used method for ad valorem purposes is lower of cost or market. First in, first out (FIFO) is also an acceptable measure of inventory replacement costs. Taxpayers often use last in, first out (LIFO) for income tax purposes, but it does not reflect inventory value for property tax purposes. The weighted average method provides for distribution of inventory costs throughout the year.

Caution should be exercised when inventory values are estimated from the owner's accounting records because most accounting systems use an original acquisition cost basis for pricing inventory and this does not necessarily reflect market value as extracted from the marketplace, which may be more or less than original cost.

### **7.3.5 Supplies**

Supplies are stocks of goods that are intended to be consumed during the production process, but are not part of the raw materials inventory that is processed into the finished product. Examples of supplies include chemicals, clothing, pallets, paper, shipping materials, fuels, and repair parts. Unlike inventory, supplies are not held for resale. Supplies should be valued at their acquisition cost.

### **7.3.6 Consigned Goods**

Consigned goods are personal property in the possession of an agent, held for sale by that agent. They should be valued, at the appropriate level of trade, as part of the consignor's inventory.

### **7.3.7 Imports and Exports**

Assessors should be aware of the legal status of import and export merchandise in order to determine its taxable status. If there is no exemption provided by statute, then the techniques for estimating the value of inventories should be used for valuing imports and exports.

## **7.4 Valuation Guidelines for Intangible Personal Property**

The discovery, reporting, verification, and proper valuation of intangible personal property is difficult and can be expensive. The methods for discovering, reporting, verifying, and auditing intangibles are the same as for tangible personal property. Pertinent information includes type of asset, name of issuer, date of acquisition, legal life, expected useful life, face value or par value, market value, and dividends or other income. Individual research can lead to sources that provide information on the selling prices of intangible personal property.

Statutes should provide concise guidance on the assessment of intangible personal property. The benefit/cost ratio of intangible personal property taxation is such that many states have exempted intangible personal property from taxation. For a listing of state and provincial treatment of intangible property, see Property Tax Policies and Administrative Practices in Canada and the United States (IAAO 2000).

Those states that continue to assess intangible property primarily do so for public utilities by using a unit valuation method. When centrally assessed property is not held by a public utility, the separation of tangible from intangible value may be required. Recent letter rulings and case law should be researched to provide guidance in this area. Careful review should underscore the purpose, use, and how necessary and integral the identified intangible personal property is to the taxable tangible personal property. This review could entail the examination of the taxpayer's books, records, and filings with regulatory agencies.

## **7.5 Compliance with USPAP**

IAAO requires that all appraisal work performed by its members in the United States and Canada be compliant with the Uniform Standards of Professional Appraisal Practice (USPAP) of the Appraisal

### Section III

Foundation (2005 [updated annually]) and the IAAO Code of Ethics and Standards of Professional Conduct 2005). USPAP Standards relevant to the valuation of personal property are Standard 6: Mass Appraisal, Development and Reporting; Standard 7: Personal Property Appraisal, Development; and Standard 8: Personal Property Appraisal, Reporting. Standard 6 defines the appropriate form for developing mass appraisal methods and the structure for reporting the results. Standards 7 and 8 provide guidance on the proper process to follow so that the results are based on sound conclusions and are well documented. USPAP contains adequate jurisdictional exceptions to accommodate the various provisions of state, county, and municipal laws.

# Personal Property Valuation Schedule

## Commodities

### Agricultural Products and Property

This schedule has been prepared by the Ad Valorem Tax Division, pursuant to 68 O.S. 2011, § 2875 D4, to help achieve equity in the assessment of the personal property of commercial and industrial establishments through uniform application of valuation guidelines. It is the goal of this Division that equity be realized within and between all classes of property throughout all taxing jurisdictions in Oklahoma.

**None of the content of this schedule is intended, in any way, to relieve property owners or assessing officials of their obligations by law to report, value, or assess personal property at its true and full market value. Application of the valuation guidelines, procedures, and rates contained in this publication, together with sound judgment on the part of assessment officials, will help determine the validity of values received from a variety of commercial operations. Methodologies contained herein are intended only to provide the user with an approximation of value for the personalty "typical" for that class, not an absolute value. The replacement cost less normal depreciation tables are provided to determine estimated market value based on adjustments to information obtained from property owners. All forms of depreciation including physical, economic, and functional obsolescence should be considered as applicable to arrive at current fair cash value.**

This Schedule is available on the Oklahoma Tax Commission website. [www.tax.ok.gov](http://www.tax.ok.gov) (select- Ad Valorem, select- Publications, select Business Personal Property Valuation Schedule.)

Oklahoma Tax Commission  
Ad Valorem Division  
3700 N. Classen Blvd.  
Oklahoma City, OK 73118  
(405) 319-8200

## AGRICULTURAL PRODUCTS

All unmanufactured farm products shall be assessed and valued as of the preceding May 31. Every person, firm, company, association, or corporation, in making his or its assessment, shall assess all unmanufactured farm products owned by him or it on the preceding May 31, at its fair cash value on that date instead of January 1. 68 O.S. 2011, § 2817.

### LIVESTOCK HORSES

Values for horses should be considered from data provided by taxpayers and sales data from the local livestock market, to determine the values used by the assessor for the various types of horses.

### CATTLE

<b>Feeder Steers: Medium &amp; Large 1 per 100 lbs</b>		<b>Heifers: Medium &amp; Large 1 per 100 lbs</b>	
<b>Pounds</b>	<b>Avg. Price</b>	<b>Pounds</b>	<b>Avg. Price</b>
345-400	173.45	345-400	156.28
400-450	172.02	400-450	151.50
450-500	166.81	450-500	147.51
500-525	164.28	500-600	148.16
550-600	164.28	600-650	141.87
625-675	153.08	650-700	232.88
700-750	147.45	725-750	141.25
750-800	146.33	750-775	144.46
800-850	145.94	800-850	132.57
850-875	145.94	900-950	128.52
900-950	137.30	950-1,000	123.00
950-1000	139.00		
1,000-1,105	130.75		

### DAIRY CATTLE

Cows & Bulls - use Market Value

## Chicken Houses and Pig Farms

With the specialized nature and varied equipment by company, it is recommended to use Marshall Valuation Services for valuing these industries. Chicken House valuation can be found in Section 17 page 10 of MVS, and Pig Farms can also be found in Section 17 starting on Page 9.

### PIGS

Sows, Boars, Barrows & Gilts per 100lbs		
	POUNDS	Avg. Price
Sow	300-500	18-22
	500-700	25-27
Boar	200-250	20.00
	250 +	7.00
Barrows & Gilts	220-270	50.00

### Poultry

Chickens, value per head \$6.90 per bird (average: includes layers, pullets, rooster, excludes broilers).

Broilers, value of production \$0.50 per pound, or an average of \$3.35 per bird.

Turkeys, price received for the US, \$0.719 per pound.

#### Table Eggs (per dozen)

Large	2.45
Medium	2.16
Small	1.85

## Goats

### Kids Selection 1

<b>Pounds</b>	<b>Avg. Price</b>
31-75	65-143
76-120	173-200

### Nannies

<b>Pounds</b>	<b>Avg. Price</b>
76-120	137-157
121-140	175

### Kids Selection 2

<b>Pounds</b>	<b>Avg. Price</b>
0-50	76-99
51-75	229-165

### Billy

<b>Pounds</b>	<b>Avg. Price</b>
61-120	250-270
141-180	

### Pygmy

<b>Pounds</b>	<b>Avg. Price</b>
0-50	43-71
51-75	82

### Wether

<b>Pounds</b>	<b>Avg. Price</b>
0-60	45-140
61-120	144-225

## SHEEP

### Ram Lamb Choice

<b>Pounds</b>	<b>Avg. Price</b>
31-75	55-131

### Ewe Lamb

<b>Pounds</b>	<b>Avg. Price</b>
31-90	80-185

### Ewe

<b>Pounds</b>	<b>Avg. Price</b>
91-160	80-210

### Ram

<b>Pounds</b>	<b>Avg. Price</b>
76-200	130-175

## Grain Report

### Commodities

	<b>Price</b>		<b>Price</b>
Wheat (per bushel)	4.96-5.34	Corn (per bushel)	3.45-3.80
Milo (per cwt)	6.34-7.64	Soybeans (per bushel)	8.32-8.74

### Hay

Grass Hay Central Oklahoma:

Prairie hay 4 x 5 bales 25.00-35.00 per bale, mostly 29.00-32.00. Good Bermuda 50.00-60.00 per bale in 5 x 6 bales.

Fair quality Bermuda 5 x 6 round bales 40.00-45.00 per bale. Good alfalfa hay 120.00-140.00 large square bales

Good alfalfa round bales 100.00-130.00. Small square bales Bermuda grass 6.00-8.00 per bale.

### Peanuts

	<b>Price Per ton</b>
Runner Peanuts	415.43
Spanish Peanuts	552.53
Valencia Peanuts	481.90
Virginia Peanuts	481.9

The following information from the Oklahoma Department of Agriculture is provided so the Assessor may check local market values as of May 31 of each year.

All business related equipment are shown with Replacement Cost New and are listed with Economic Lives. Depreciation Tables should be applied to determine Fair Market Value.

# Personal Property Valuation Schedule

## Introduction

### Business Related Property

This schedule has been prepared by the Ad Valorem Tax Division, pursuant to 68 O.S. 2011, § 2875 D4, to help achieve equity in the assessment of the personal property of commercial and industrial establishments through uniform application of valuation guidelines. It is the goal of this Division that equity be realized within and between all classes of property throughout all taxing jurisdictions in Oklahoma.

**None of the content of this schedule is intended, in any way, to relieve property owners or assessing officials of their obligations by law to report, value, or assess personal property at its true and full market value. Application of the valuation guidelines, procedures, and rates contained in this publication, together with sound judgment on the part of assessment officials, will help determine the validity of values received from a variety of commercial operations. Methodologies contained herein are intended only to provide the user with an approximation of value for the personalty "typical" for that class, not an absolute value. The replacement cost less normal depreciation tables are provided to determine estimated market value based on adjustments to information obtained from property owners. All forms of depreciation including physical, economic, and functional obsolescence should be considered as applicable to arrive at current fair cash value.**

This Schedule is available on the Oklahoma Tax Commission website. [www.tax.ok.gov](http://www.tax.ok.gov) (select- Ad Valorem, select- Publications, select Business Personal Property Valuation Schedule.)

## COMPUTERS

**Economic Life:** 5 years

Computer Systems are shown with major features listed only. Price is an average of current advertised prices of various retailers.

Components prices are an average of current advertised prices of various retailers.

Please note that in the area of computers, software and calculators, market values for these products have generally shown a downward trend. We would suggest that you do not use cost trending table for these items.

### COMPUTER SYSTEMS

# Personal Property Valuation Schedule

## Introduction

### Construction Equipment

This schedule has been prepared by the Ad Valorem Tax Division, pursuant to 68 O.S. 2011, § 2875

**None of the content of this schedule is intended, in any way, to relieve property owners or assessing officials of their obligations by law to report, value, or assess personal property at its true and full market value. Application of the valuation guidelines, procedures, and rates contained in this publication, together with sound judgment on the part of assessment officials, will help determine the validity of values received from a variety of commercial operations. Methodologies contained herein are intended only to provide the user with an approximation of value for the personalty "typical" for that class, not an absolute value. The replacement cost less normal depreciation tables are provided to determine estimated market value based on adjustments to information obtained from property owners. All forms of depreciation including physical, economic, and functional obsolescence should be considered as applicable to arrive at current fair cash value.**

This Schedule is available on the Oklahoma Tax Commission website. [www.tax.ok.gov](http://www.tax.ok.gov) (select- Ad

## **PETROLEUM RELATED**

### Section VII

- Crude Oil in Storage
- Casing and Tubing
- Drilling Equipment
- Gas Compressor
- Pipeline
- Oil Storage Tanks

All petroleum related items are shown as current market value. Items with Economic Life should have Depreciation Tables applied to determine Fair Cash Value.

Section VII  
January 2020  
**DRILLING RIGS**

**Economic Life:** 20 years

Typical rigs include but are not limited to the following equipment:  
Derrick and substructure, draw works and motors, mud pumps and tanks, generator sets, elevators and rotary table, fuel tanks, blowout preventers, water systems. Ancillary equipment such as top drives, drill pipe, drill collars, slips, tongs, cat walks, etc should be vauded seperately and **are not included in the values listed below.**

**Due to the various components of drilling rigs, requested information should include but not be limited to the following:**

**Rig Type:** depth rating, year, mechanical, SCR, AC, horsepower, etc.

**Ancillary Equipment:** Top Drives, Drill pipe, drill collars, slips, tongs, cat walks, etc.

**Rig Activity:** days stacked vs days utilized.

**REPLACEMENT COST NEW (RCN)**

**THE VALUES LISTED BELOW ARE PER FOOT OF DEPTH RATING:**

<u>DEPTH RATING</u>	<u>MECH</u>	<u>SCR</u>	<u>AC</u>
1 TO 2500	200	320	400
2501 - 5000	200	240	300

# Personal Property Valuation Schedule

## Introduction

### Petroleum Equipment

This schedule has been prepared by the Ad Valorem Tax Division, pursuant to 68 O.S. 2011, § 2875 A(4), to help achieve equity in the assessment of the personal property of commercial and industrial establishments through uniform application of valuation guidelines. It is the goal of this Division that equity be realized within and between all classes of property throughout all taxing jurisdictions in Oklahoma.

**None of the content of this schedule is intended, in any way, to relieve property owners or assessing officials of their obligations by law to report, value, or assess personal property at its true and full market value. Application of the valuation guidelines, procedures, and rates contained in this publication, together with sound judgment on the part of assessment officials, will help determine the validity of values received from a variety of commercial operations. Methodologies contained herein are intended only to provide the user with an approximation of value for the personalty "typical" for that class, not an absolute value. The replacement cost less normal depreciation tables are provided to determine estimated market value based on adjustments to information obtained from property owners. All forms of depreciation including physical, economic, and functional obsolescence should be considered as applicable to arrive at current fair**

This Schedule is available on the Oklahoma Tax Commission website. [www.tax.ok.gov](http://www.tax.ok.gov) (select- Ad Valorem, select- Publications, select Business Personal Property Valuation Schedule.)

Oklahoma Tax Commission  
Ad Valorem Division  
3700 N. Classen Blvd.  
Oklahoma City, OK 73118  
(405) 319-8200

## PETROLEUM PRODUCTS IN STORAGE

The Value of Petroleum Products in Storage is the average of the NYMEX of the previous twelve months.

### CRUDE OIL IN STORAGE

Sweet : 53.58 per barrel  
Sour: 41.58 per barrel

### GAS COMPRESSORS

**Economic Life:** 20 years

Due to the various components of compressor systems, requested information should include but not be limited to the following:

**Compressor Type:** year, fuel, BHP, stages, discharge pressure, etc.

**Compressor Equip.:** turbine or recipitating, cooling, controls, piping, skids, measurement system, etc.

**Site Preparation:** leveling, gravel, concrete, electrical service, fencing, etc.

### PIPELINE COMPRESSOR

#### VALUES ARE ESTIMATES PER HORSEPOWER

(50-99 h.p.)	(100-399 h.p.)	(400-699 h.p.)	(700-1099 h.p.)	(1100-1699 h.p.)	(1700h.p. & above)
1840	1700	1490	1365	1240	1115

### SMALL PRODUCTION COMPRESSOR

Single stage compressors not included under Gross Production In-Lieu Tax as defined by OTC rule 710-10-8-2. Generally, the lower the horsepower, the higher the cost per horsepower.

#### Small production under 50 horsepower

2,000

### METERS and METER STATIONS, LOW PRESSURE

**Economic Life:** 20 Years

	2"	3"	4"	6"	8"	10"	12"
Manual	6,936	8,949	12,548	24,296	40,576	52,749	65,937
Electronic	9,349	12,598	15,742	29,572	45,398	59,018	73,773
Add for:							
Gas Sampler	1,303	1,303	2,609	2,609	3,915	3,915	5,210
Electric Field Measure	4,788	4,788	4,788	4,788	4,788	4,788	4,788
Building	3,047	3,128	3,505	3,937	4,875	5,118	6,398
Shed	400	400	400	400	500	750	800
Meter Setting:	1,095	1,095	1,848	2,330	2,330	3,500	3,500

### VALVE STATIONS and or LAUNCHERS/RECEIVERS

Are included in typical pipeline cost.

### ENCLOSED AREA for METER STATIONS, METERS and VALVE STATIONS

Are included in typical pipeline cost.

## PIPELINES

Pipelines for ad valorem purposes are generally identified and separated into three categories.

1. Transmission Lines: In general are those larger diameter and are assessed as Public Service
2. Gathering Lines: In general are those pipelines which extend from the production site to a storage facility and or as gas plant. These lines are generally represented as four inch and larger lines, but include all pipeline connected to form a gathering system. This class of pipelines is typically of better quality and require more rigid controls than production lines. Gathering lines are assessed locally.
3. Production Lines: In general are referred to as "Flow Lines" and are typically smaller diameter used on a well site to flow production from the well head to the point of sales or to a point of co-mingling mineral ownership. These lines may be subject to Gross Production Tax, if not they are subject to Ad Valorem Tax.

Valuation will be based on Replacement Cost New, less a 26.5 life year using actual age and condition to determine a loss in value. Evidence of additional depreciation, which may include but not limited to: Federal and/or State financial reports, income and expense statements and journals, impairment studies, and other information that may be required or requested by the county assessor to substantiate additional depreciation.

All information shall be organized in a comprehensive document and provided to the county assessor each year in which additional depreciation is claimed. The assessor may consider additional depreciation upon submission of written documents demonstrating such depreciation by the taxpayer.

## TYPICAL PIPELINE COSTS

**Economic Life:** 26.5 years

### GATHERING PIPELINE INSTALLED

**Typical pipeline components used in a gathering pipeline systems include:**

bare pipe, coating, wrapping, transportation to job site, applicable sales tax, survey fees, x-ray, testing, cathodic protection, tie-ins, in-ground valves and fittings, road and creek crossings, markers, fencing, valve stations, pig launchers, pig receivers, damages, re-seeding, design, engineering, administrative costs, company labor, and lay cost, etc. **Does not include Compressors or Meters.**

Normal operating pressure, long-run (over 5 miles in length), cross-country, welded steel, underground oil and gas transmission lines, not including compressors, pumping stations, bridges, etc. Costs are smoothed averages of contract costs excluding extremes. The cost may increase depending on the length and type of pipe and pipe protection, terrain and geology, climate, location, etc.:e.g., the shorter the run, the more difficult, complex or urbanized the site, the higher the costs. **Right-of-way costs are not included.**

Renditions shall be made on Oklahoma Tax Commission approved forms, and shall contain the minimum following data: size, type, length, situs, year acquired (new or used), and **ACTUAL INVESTMENT COST**. The assessor may request/consider additional information as needed.

**\*Note:** All gathering system pipe must be rendered regardless of size and length or if specific cost data does not appear in this schedule.

Pipe Size	2"	3"	4"	6"	8"	10"	12"	14"	16"	20"	24"	30"
per foot	15.49	23.23	30.98	46.47	49.31	54.34	57.09	68.95	80.80	106.22	131.16	160.08

Cost data is based on Marshall Valuation Service and the Oil and Gas Journal with Oklahoma adjustments applied. Noted \* sizes are interpolated from the same cost data.

**Note:** All forms of depreciation should be properly accounted for, including physical, functional, and economic depreciation. *Physical: Depreciation arising solely from a lowered physical condition of the property or a shortened life span as a result of ordinary use, abuse, and action of elements.*

*Functional: Synonymous with the term obsolescence.*

*Economic: 1) Depreciation due the (a) to an increase in supply of the property under consideration or (b) to a reduction in the monetary demand for properties of this type under consideration unaccompanied by shifts in demand from such properties to other properties and/or personal services. 2) Depreciation of any sort other than physical.*

*Note: A depression is accompanied by economic depreciation of the type indicated in 1(b) because of the general decline in purchasing power. Depressions are also accompanied by obsolescence because of changes in the relative distribution of purchasing power.*

**For poly/pvc type pipe:** Installed in the ground, use 50% of the above schedule.

**For steel pipe in storage:** Use 40% of the above schedule.

**For poly/pvc type pipe in storage:** Use 20% of the above schedule.

#### IDLE PIPE:

**Defined:** Pipe which has not been used in the flow, gathering, transportation or delivery of petroleum based products or any other product or other service, for a period of two (2) consecutive calendar years.

Value of idle pipe may be based on twenty (20%) percent of current replacement cost new.

## DRILLING RIGS and ASSOCIATED EQUIPMENT

OTC Rule 710: 10-2-5(b). **Exploration related equipment.** All taxable personal property used in the exploration of oil, natural gas, or other minerals, including drilling equipment and rigs shall be assessed annually at its fair cash value, based upon the value set by the first *Hadco International* monthly bulletin published for the current tax year **and such other available relevant and reliable market data**, if any, concerning the fair cash value of property of the same kind, using the appropriate depth rating assigned to the drawworks by its manufacturer and actual condition of the rig.

## TANKS UNDERGROUND FUEL STORAGE

**Economic Life:** 20 years

Values are averages for fiberglass and steel tanks, singlewall, completely installed, including fittings, access manway, excavation and backfill. Values do not include piping.

The RCN of the tanks listed below are averages of total costs in place at the site, including necessary foundations and tank fittings, but not pillings, pipe, fencing, site roads, etc.

Nominal Capacity (Gallons)	Feet		Single Wall		
	Diameter	Length	Fiberglass	Steel	Coated Steel
300	3	5	-	5,700	6,300
550	4	6	8,500	6,550	8,500

8,000	8	23	24,500	22,400	24,500
10,000	8	29	29,100	27,000	29,400
12,000	8	34	32,600	30,500	33,800
15,000	10	29	39,800	37,300	41,400
20,000	10	37	52,250	48,600	54,000
25,000	12	33	64,250	60,500	66,250
30,000	12	41	77,000	71,250	79,000
50,000	12	60	127,000	113,000	91,750

### WELDED STEEL TANK (API)

Values are averages for tanks erected on sand or gravel with steel ring curb, and include cone roofs with support as needed, manholes, vents and paint. Catwalks, stairways and platforms are not included.

Capacity (Barrels)	Size	Cost	Capacity (Barrels)	Size	Cost
2,000	30x16	159,000	75,000	120x36	1,244,000
3,000	30x24	180,000	100,000	140x37	1,601,000
4,000	30x32	204,000	125,000	160x35	1,946,000
5,000	38x24	225,000	150,000	180x33	2,279,000
7,500	38x36	260,000	200,000	200x36	2,282,000
10,000	55x24	321,000	250,000	220x36	3,177,000
15,000	55x36	403,000	300,000	240x37	3,730,000
20,000	60x40	477,000	350,000	260x37	4,146,000
30,000	80x34	627,000	400,000	260x42	4,630,000
50,000	90x44	889,000	500,000	280x46	5,519,000

### BOLTED STEEL TANKS (API)

Values include root deck and supports, sand and gravel foundation with retaining ring, painting and typical basic fittings.

Capacity (Barrels)	Size	Cost	Capacity (Barrels)	Size	Cost
100	9X8	12,800	2,000	30X16	123,000
200	9X16	21,000	3,000	30X24	139,000
500	16X16	45,100	5,000	39X24	162,000
750	16X24	59,250	7,500	39X36	198,000
1,000	22X16	73,750	10,000	55X24	240,000
1,500	22X24	101,000	15,000	55X36	312,000

### WELDED STEEL PRESSURE TANKS

Capacity (Gallons)	Size (Feet)	Cost	Capacity (Gallons)	Size (Feet)	Cost
125	2x5.5	1,770	6,500	7x26	63,250
250	2.5x8	2,350	9,000	7x35	76,000
500	3x10	4,250	12,000	7x45	93,500
1,000	3.5x15	7,500	15,000	7x54	114,000
1,500	5x11	11,200	20,000	9x49	143,000
2,000	5x15	14,700	30,000	11x47	200,000
2,500	5x19	18,200	45,000	11x63	286,000
3,000	5x22	19,900	60,000	11x90	371,000
4,000	5x29	26,200	90,000	11x133	545,000

### SPHERE PRESSURE TANKS

Diameter (feet)	Capacity (cu. ft.)	Cost	Diameter (feet)	Capacity (cu. ft.)	Cost
20	4,190	183,000	40	33,510	539,000
25	8,180	260,000	45	47,715	646,000

35	22,450	439,000	60	113,095	1,009,000

### HEMISPHEROID PRESSURE TANKS

Capacity (Gallons)	5 lb. w.p.	10 lb. w.p.	25 lb. w.p.
105,000	256,000	242,832	343,000
210,000	364,000	353,414	518,000
420,000	526,000	515,551	783,000
840,000	751,000	750,911	1,184,000

## VENDING MACHINES

Coffee, Hot Chocolate, Tea, Soup	5,325-6,075
Snack	2,195-4,950
Ice Cream Bar Vendor	5,275-6,975
Cold, All Purpose, Milk, Juice	4,575-4,975
Deli, Salad	2,495-6,295
Video / DVD Vending Machine	4,000-14,000

### **Soft Drink**

6 Selection Bottle / Can	2,825-3,450
8 Selection Bottle / Can	2,995-3,195
10 Selection Bottle / Can	3,265-3,725
12 Selection Bottle / Can	3,675-3,895
30-40 Selection Bottle / Can	4,995-5,125

# **OTHER EQUIPMENT**

## **Section VIII**

- Car Washes
- Coin/Bill Changers
- Game Machines
- Golf Cars
- Pianos
- Organs
- Vending Machines
- Food Merchandisers
- Billboards
- Towers
- Pumps and Dispensers

Equipment are listed with Replacement Cost New. Economic Lives are listed. Depreciation Tables should be applied to determine Fair Market Value.

# Personal Property Valuation Schedule

## Introduction

### Other Equipment

This schedule has been prepared by the Ad Valorem Tax Division, pursuant to 68 O.S. 2011, § 2875 D4, to help achieve equity in the assessment of the personal property of commercial and industrial establishments through uniform application of valuation guidelines. It is the goal of this Division that equity be realized within and between all classes of property throughout all taxing jurisdictions in Oklahoma.

**None of the content of this schedule is intended, in any way, to relieve property owners or assessing officials of their obligations by law to report, value, or assess personal property at its true and full market value. Application of the valuation guidelines, procedures, and rates contained in this publication, together with sound judgment on the part of assessment officials, will help determine the validity of values received from a variety of commercial operations. Methodologies contained herein are intended only to provide the user with an approximation of value for the personalty "typical" for that class, not an absolute value. The replacement cost less normal depreciation tables are provided to determine estimated market value based on adjustments to information obtained from property owners. All forms of depreciation including physical, economic, and functional obsolescence should be considered as applicable to arrive at current fair cash value.**

This Schedule is available on the Oklahoma Tax Commission website. [www.tax.ok.gov](http://www.tax.ok.gov) (select- Ad Valorem, select- Publications, select Business Personal Property Valuation Schedule.)

## CAR WASHES Equipment Costs

<b>Economic Life:</b>	Car Wash Equipment, Automatic 8 years
	Car Wash Equipment, Coin-operated 10 years
	Car Vacuum 10 years
	Carpet Cleaner Equipment 10 years

Equipment costs cover all equipment for standard tunnel-type car washes, but do not include building improvements, service station equipment, paving, signs, ect. Number of cars washed per hour is a function of the length of the wash line and quantity and quality of the equipment. Low Cost classification is for the semi-automatic wash, while the Good car wash is fully automated with personnel only for interior cleaning and before and after service commensurate with the capacity (length) of the line. The 30' to 50' cost range includes self-wash tunnels.

Length of Line	Low Cost	Average	Good
30' (incl.self-console control)	72,000	101,000	14,400
50'	143,000	179,000	226,000
75'	199,000	242,000	295,000
100'	238,000	285,000	341,000
125'	269,000	319,000	378,000
150'	296,000	346,000	408,000

### Unit Costs

	Cost Range	
Vacuum station, complete	13,100	22,600
Conveyor 30'	18,400	28,900
Conveyor 50'	25,200	39,100
Conveyor 75'	31,400	48,600
Conveyor 100'	37,900	57,750
Conveyor 125'	42,700	65,250
Conveyor 150'	47,700	71,250
Tire brush washer	10,400	13,400
Tire solution applicator, inc. pump	4,000	5,050
Prep. hand gun	5,800	10,000
Undercarriage flush	2,525	3,475
Applicator arch (pre-final rinse or wash), each	3,725	5,800
Rinse and wax deluxe arch combo	10,500	13,800
Polish and wax arch combo	15,800	24,500
Mitting curtains	23,300	32,300
Brushes side panel	11,000	17,100
Brushes side and top combo	37,900	42,700
Hydraulic power PAC, each	5,400	9,100
Motor control	13,800	25,100
Computer console	7,550	15,000
Solution feed, pump	6,600	10,400
Water reclamation/filtration	40,100	70,500
Air-dry blower	25,200	47,700
Washing machine extractor	6,600	12,600
Mitting trough, hand wash, each	830	1,670

**CAR WASHES**  
**Equipment Costs**  
**Continued**

**Self-Serve Wash and Drive-Thru**

	<b>Cost Range</b>	
Self-wash assembly equipment base, including hot water	10900	30000
add per bay (including basic soap, wax, rinses)	6500	12600
degreaser-foam brush cleaner, extra waxes, base cost each	2825	3675
add per bay	960	2120
Roll-over-robot, self-drive-thru, equipment base	53,000	82750
deluxe, including brushless (touch-free) system	91750	134000
add arch applicators from table above		
Pay entry, computerized communication system and signage	67000	14000
Heat freeze protection	1670	5050
Air-dryer blower	21600	38300
Water softener	3300	9950
Water reclamation/filtration	8350	45600
Vacuum, per exterior station (interior installations, less 25%)	1980	4500
Change machine/automated pay station	3875	8350
Towel vending machine	640	945

### COIN AND BILL CHANGERS

**Economic Life:** 10 years

\$1-\$5	439-1,095
\$1-\$10	1,149
\$1-\$20	1,459-4,495
Bill-Bill	3,595-7,195
Coin Exchange Machine	10,500-12,500

### ARCADE GAME MACHINES

**Economic Life:** 6 years

Pool Table	910-5,895
Pin Ball	3,895-6,995
Video Game, Electronic	1,200-5,000
Game Tables ( Hockey, Foosball)	500-2,270
Darts	99-3,300
Skee Ball	3,300-7,500

### GOLF CARS

**Economic Life:** 10 years

Electric	4,700-10,100
Gas	2,500-13,500
<b>Accessories:</b>	
Windshield	125-160
Lights	400-500
Enclosure	175-550
Custom Seats	275-450
Custom Wheels	300-950
Rear Seat/Combo Kits	500-950

## Billboard Valuation information

**Economic Life:** 20 years

### Definitions

**Wood sign** - A billboard structure having wooden poles as primary support.

**Steel sign** - A billboard structure having steel I-Beams as primary support.

**Steel monopole** - A billboard structure having a single steel pole as primary support.

**Original construction date (OCD)** - The date that the structure was initially constructed at its present site.

**RCN - Replacement cost new** - The cost to replace the utility of property with new construction using the best available materials and construction methodology.

**Base rate** - The typical price per square foot per class determined by calculating the area of the largest display on a billboard structure and choosing the appropriate class. The base price includes all costs such as direct labor, direct materials and other incidental costs such as engineering, excavation, and design to erect a single face unlighted billboard structure.

### Structural Components

**Vertical supports (uprights)** - wood, metal, or other material used to support the sign in an upright position.

**Platform or Catwalk** - A horizontal walking area at the base of the sign face used when work is being performed on the sign.

**Cross members (stringers)** - Horizontal and/or vertical supporting members across the back of the sign.

**Panels** - The flat area to which the message is pasted or painted.

**Molding** - The decorative frame surrounding the printed message.

**Apron** - Decorative trim at the bottom of the sign.

**Walk rail** - Dimensional lumber or steel across the back of the sign used to walk on while performing work on illumination.

**Posting rail, scaffold rail** - Dimensional lumber or steel across the top of the sign used to support a scaffold when work is being performed on the sign.

**Art and display** - Word copy, message, background, etc., to be displayed on the face of sign.

**Pictorial** - The portions of the copy which have artistic work.

**Cut outs** - The portions of the copy which are reproduced to emphasize a certain figure and draw attention.

## **BILLBOARD VALUATION INFORMATION**

**Illumination** - Fixtures are attached to sign so that the message is visible during the hours of darkness.

**Ballast** - Regulates electricity input to fluorescent and mercury vapor fixtures. Incandescent and quartz illumination will not have this ballast present, whereas fluorescent and mercury vapor will.

**Height above ground level (HAGL)** - Height above ground level is that distance in feet from the ground to the lowest edge of the bottom moulding. Such components as apron and platforms are not considered when measuring HAGL.

**Lease Cost** - Cost which is accrued in order to obtain a lease site.

## BILLBOARD VALUATION INFORMATION

### CLASS 1- WOOD POLE A FRAME CONSTRUCTION

#### BASE SPECIFICATIONS

1. STRUCTURE- Wood support poles or post.
2. FOUNDATION- Embedded in ground or equivalent.
3. PLATFORM OR CATWALK - Included in Base.
4. PANELS- Included in Base.
5. APRON - Included in Base.
6. LIGHTING -Included in Base.
7. ADDITIONAL PANELS - None.

#### TOTAL BASE COST PER STRUCTURE

##### 1A - SINGLE FACE WOOD A FRAME

Size	0-20' HAGL	21-30'HAGL	31-40' HAGL	41-55' HAGL	56-80' HAGL	80+' HAGL

## Digital Sign Faces

**Economic Life:** 7 years

The Valuaton of each digital display face will be determeined by calculating the replacement cost new (RCN) using the cost table below, then deducting depreciation based on an actual age depreciation schedule lsited below. LEDs in the displays have a typical average useful life of about 100,000 hours or 11 years of continous use. The depreciattion schedule is based on a 7-year life for digital sign faces.

<b>SIZE OF DIGITAL FACE</b>	<b>TOTAL COST</b>	<b>COST PER SQ. FT.</b>
10.5 FT X 36 FT	\$105,000	\$278.00
14 FT X 48 FT	\$175,000	\$260.00

### DEPRECIATION SCHEDULE

ACTUAL AGE	REMAINING LIFE %
1	89
2	77
3	66
4	54
5	43
6	31
7	20
8	20
9	20
10	20

## TOWERS

**Economic Life:** 20 years

Included in the costs are concrete footings, erection, painting, guy wires, lighting, platforms, and designers' fees. Antennas and transmission cables are not include . Multiple antenna installations ar mono-poles will tend to be at the high end of the range. These towers will typically have a communication building on site.

### SELF SUSTAINING TOWERS AND GUYED TOWERS

HEIGHT (FEET)	COST RANGE		
	Low \$ per foot	Average \$ per foot	Good \$ per foot
50-74	299	389	480
75-99	404	506	608
100-149	480	591	703
150-199	628	740	851
200-224	644	685	726
225-249	609	643	678
250-299	589	632	676
300-349	522	579	635
350-399	515	572	630
400 plus	505	564	623

### OTHER TOWERS

(Price per linear foot, up to 400 feet high) Tower Only-No Extra Structures

	Low	Average	Good
10" Ham radio, police and fire bands	95	117	139
20" Taxi and public service bands	144	176	207
24" Radio, V>H>F> bands	180	226	271
30" Cellular applications	217	289	361
40" Microwave towers	271	356	440
54" Masters TV systems	440	708	975

Add 22.5% for every 100 feet of height over 400 feet.

Meteorological (MET) Towers	18540	21,630	24720
-----------------------------	-------	--------	-------

## PUMPS AND DISPENSERS Equipment Costs

**Economic Life:** 10 years

	<b>Low Quality</b>	<b>Avg Quality</b>	<b>Good Quality</b>
<b>Mechanical dispenser</b> including vapor recovery, exclusive of submerged pumps:			
Single	4,175	4,788	5,400
Twin	6,250	6,900	7,550
<b>Electronic dispenser</b> including vapor recovery, exclusive of submerged pumps:			
Single	7,100	8,125	9,150
Twin	9,600	10,950	12,300
Three hose	13,400	16,050	18,700
Add for double sided operation	5,050	5,300	5,550
Add to all multiple types for mixed products, per hose	365	463	560
Add for point of purchase, per acceptor (credit card readers, etc)	3,300	3,638	3,975
Add for ticket printer and counter	530	645	760
Submerged pumps, one pump may serve several dispensers			
1/3 HP	1,530	1,630	1,730
3/4 HP	1,790	1,975	2,160
1 1/2 HP	2,240	2,445	2,650
Add for water or air hydrant, per unit	460	510	560
Add for leakage monitoring system, per tank	4,150	5,275	6,400
<b>Piping Costs:</b>			
Add for piping costs, per pump or dispenser per product	1,260	1,465	1,670
Add for piping costs, per tank	431	496	560
Add for piping costs, each air and water stand	412	474	535

Above costs include 10% installation cost on aboveground items, 20% for submerged pumps.  
For tanks, see section VII - Petroleum (underground fuel storage tanks)

# Personal Property Valuation Schedule

## Introduction

### Renewable Energy

This schedule has been prepared by the Ad Valorem Tax Division, pursuant to 68 O.S. 2011, § 2875 A4, to help achieve equity in the assessment of the personal property of commercial and industrial establishments through uniform application of valuation guidelines. It is the goal of this Division that equity be realized within and between all classes of property throughout all taxing jurisdictions in Oklahoma.

**None of the content of this schedule is intended, in any way, to relieve property owners or assessing officials of their obligations by law to report, value, or assess personal property at its true and full market value. Application of the valuation guidelines, procedures, and rates contained in this publication, together with sound judgment on the part of assessment officials, will help determine the validity of values received from a variety of commercial operations. Methodologies contained herein are intended only to provide the user with an approximation of value for the personalty "typical" for that class, not an absolute value. The replacement cost less normal depreciation tables are provided to determine estimated market value based on adjustments to information obtained from property owners.**

This Schedule is available on the Oklahoma Tax Commission website. [www.tax.ok.gov](http://www.tax.ok.gov) (select- Ad Valorem, select- Publications, select Business Personal Property Valuation Schedule.)

## WIND GENERATION COMMERCIAL

Commercial wind generation facilities are defined to have multiple wind turbines that produce electricity for sale and are subject to local ad valorem taxation.

**Addressing Functional Obsolescence as required by the IAAO appraisal standards requires a different valuation process for Wind Generation. Taking the moveable parts section of the Wind Turbine known as the Nacelle and giving it a life year of 12 addresses the Functional Obsolescence issue and maintains the integrity of the Schedule. The remainder of the components will use the 25 year life using actual age and condition to determine loss in value. Addressing Economic Obsolescence may also be required as advances in technology are making the turbines more efficient so as the effective age increases so does the obsolescence factor to be applied. Evidence of additional depreciation which may exist shall be provided by the taxpayer to the county assessor. Evidence may include but not limited to: Federal and/or state financial reports, income and expense statements, balance sheets and journals, impairment studies, and other information that may be required or requested by the county assessor to substantiate additional depreciation.**

	<u>Per Mega Watt</u>	<u>Per Tower</u>
<b>Replacement Cost New</b>	1,576,835	3,126,566

The above replacement cost new values have been derived from the median value of current investment cost of newly installed wind generation parks. The Nacelle customarily represent approximately 60% of RCN and the remainder of the components represents 40% of RCN. The above values should be depreciated based on the assets current effective age using a 12 year life table for the nacelle and a 25 year life table for the remainder of the assets as stated above. (Trending factors do not need to be applied to replacement cost new.)

All information shall be organized in a comprehensive document and provided to the county assessor each year additional depreciation is claimed. The assessor may consider additional depreciation upon submission of written documents demonstrating such depreciation by the tax payer.

# Personal Property Valuation Schedule

## Introduction

### Commercial Personal Property, Economic Lives and Depreciation Tables

This schedule has been prepared by the Ad Valorem Tax Division, pursuant to 68 O.S. 2011, § 2875 A(4), to help achieve equity in the assessment of the personal property of commercial and industrial establishments through uniform application of valuation guidelines. It is the goal of this Division that equity be realized within and between all classes of property throughout all taxing jurisdictions in Oklahoma.

**None of the content of this schedule is intended, in any way, to relieve property owners or assessing officials of their obligations by law to report, value, or assess personal property at its true and full market value. Application of the valuation guidelines, procedures, and rates contained in this publication, together with sound judgment on the part of assessment officials, will help determine the validity of values received from a variety of commercial operations. Methodologies contained herein are intended only to provide the user with an approximation of value for the personality "typical" for that class, not an absolute value. The replacement cost less normal depreciation tables are provided to determine estimated market value based on adjustments to information obtained from property owners. All forms of depreciation including physical, economic, and functional obsolescence should be considered as applicable to arrive at current fair cash value.**

This Schedule is available on the Oklahoma Tax Commission website. [www.tax.ok.gov](http://www.tax.ok.gov) (select- Ad Valorem, select- Publications, select Business Personal Property Valuation Schedule.)

Oklahoma Tax Commission  
Ad Valorem Division  
3700 N. Classen Blvd.  
Oklahoma City, OK 73118  
(405) 319-8200

## COMMERCIAL PERSONAL PROPERTY

The depreciation tables found herein are recommended by the Ad Valorem Division of the Oklahoma Tax Commission for use in conjunction with the Business Personal Property forms approved by the agency.

### ORIGINAL COST TRENDING TABLE

This table should be used to bring established or known original or historical costs up-to-date to determine **Replacement Cost New** values. Select the appropriate industry class and move down the column to the appropriate year acquired. **Enter that factor and multiply by the original or historical cost to determine Replacement Cost New.**

### DEPRECIATION TABLES

The depreciation tables are expressed as **Normal Depreciation - Percentage Good**, with columns across for typical life expectancy in years and columns down for effective age or year of personal property. Selection of the typical life expectancy may be based on overall category, business or industry type, or on a per item basis from the following tables.

Once the appropriate life expectancy is selected, move down the column to the line representing the effective age of the asset or group of assets to determine the percent good. **Multiply the Replacement Cost New (RCN) of the asset or group of assets times the percent good to determine Replacement Cost New Less Normal Depreciation (RCNLD).**

Assets no longer in production but retained by the owner may be shown as salvage value (20% of Replacement Cost New). If such assets are returned to production, values should be calculated accordingly.

Example:

Assets of a 10 year old bakery, with original cost of \$10,000

Original cost		10,000
Cost Trending Table	x	1.2127
Equals RCN		12,127

Normal Depreciation - Percentage Good

Bakery Economic Life = 12 years		
Percentage Good	x	0.29
Equals RCNLD		<u>3,516.83</u>

## ORIGINAL COST TRENDING FACTORS 2020

The purpose of the trending factor is to adjust previously established cost (original or historical) to a current date for estimating **REPLACEMENT COST NEW** values. The original cost trending factors represent a composite average of all equipment costs.

The following cost trending factors may be used to estimate the current replacement cost new of an item when the original cost and acquisition date is known. The purchase price and details of the purchase should be verified to establish the original cost. If the reliability of the original cost is doubtful, multiplying by a cost trending factor will not improve the reliability.

Calculation process:

Original cost of the item should be cost new or, in the case of used items, cost at the time of acquisition. Enter the factor for the appropriate year and multiply times the original cost to estimate replacement cost new.

Due to constant changes in value of desk top computers, printers, fax machines, adding machines, calculators, copiers, and other office electronic equipment, no trending factor required on original cost.

Year Acquired	Factor	Year Acquired	Factor
2019	1.0000	2004	1.5474
2018	1.0736	2003	1.5735
2017	1.0949	2002	1.5830
2016	1.0861	2001	1.5963
2015	1.0963	2000	1.6253
2014	1.1105	1999	1.6302
2013	1.1197	1998	1.6442
2012	1.1515	1997	1.6708
2011	1.1877	1996	1.7129
2010	1.1786	1995	1.7573
2009	1.2127	Prior to	1.7985
2008	1.2604	1994	
2007	1.3291		
2006	1.3908		
2005	1.4956

**Select: AD VALOREM**

**Select: FORMS**

**Select: GENERAL AD VALOREM FORMS**

**GLOSSARY**

**OF**

**TERMS**

**-A-**

**ACCOUNT** – A record of a particular type of transaction expressed in money and kept in the books of original entry.

**ACCOUNTANCY** – The theory and practice of accounting, its professional responsibilities, standards, and generally associated activities.

**ACCOUNTANT** – One skilled in accounting.

**ACCOUNTING RECORDS** – The formal journals and ledgers, vouchers, invoices, correspondences, contracts and other sources or support for such records = Books of Account.

**ACCOUNTING VALUATION** – The historical money amount attaching to any asset or expense, generally representing cost.

**ACQUISITION COST** – The cost used in accounting to represent the purchase price of an asset. If installation and other associated costs are included, this cost should be referred to as *total* acquisition cost.

**AD VALOREM** – Designating a property tax or import or other duty computed as a percentage (rate) of the value of the property.

**APPRAISE** – To make an estimate of value, particularly of the value of property. Note: If the property is valued for purposes of taxation, the less inclusive term “assess” (q.v.) is substituted for the above term.

**APPRAISER** – One who appraises property, an owner, a prospective buyer, or, more commonly, a group of professionally skilled persons holding themselves out as experts on valuation.

**ASSESS** – To value property officially for the purpose of taxation.

**ASSESSED VALUATION** – A valuation set upon real estate and personal property government as a basis for levying taxes.

**ASSET** – Any owned physical object (tangible) or right (intangible) having value; a source of wealth, expressed in terms of its cost, depreciated cost or, less frequently, some other value.

**ASSOCIATED GAS** – Natural gas which is in contact with crude oil in the reservoir.

**AUDIT** – An audit is a systematic investigation or appraisal of procedures or operations for the purpose of determining conformity with specifically prescribed criteria.

**AUDIT PROGRAM** – The procedures undertaken or particular work done by an accountant in conducting an examination.

**-B-**

**BALANCE SHEET** – A statement of financial position of any economic units, disclosing of a given moment of time its asset, liabilities and equity.

**BARREL (BBL)** – 42 (US) gallons at 60 degrees Fahrenheit at atmospheric pressure.

**BATTERY (TANK BATTERY)** – The production handling equipment on the lease.

**-B-**

**BOOK VALUE** – Book value is the amount appearing in an asset account, while net book value is the gross book value less any accumulated depreciation.

**-C-**

**CAPITAL** – The amount invested in an owner or owners. This amount so invested plus retained income is commonly referred to as net worth, net assets, or stockholder's equity.

**CASING HEAD GAS** – Associated and dissolved gas produced with crude oil; oil well gas.

**CERTIFIED PUBLIC ACCOUNTANT** – Accountants who, having met the statutory requirements of a state, have been registered or licensed to practice public accounting are permitted by the state to call themselves "certified public accountants" and to use the initials "CPA" after their names.

**CHART OF ACCOUNTANT** – A list of accounts systematically arranged, applicable to a specific concern, giving account names and numbers.

**CHRISTMAS TREE** – The assembly of valves, pipes and fittings used to control flow of oil and gas from the

**COMBINATION SEPARATOR-DEHYDRATORS** – Used to remove water vapor from raw natural gas.

**COMMON TANK BATTERY** – The equipment used to separate and store the production from multiple wells.

**COMPRESSOR** – A device that raises the pressure of compressible liquids and/or gases.

**COMPUTER PRODUCTION CONTROL** – An operation wherein field conditions and activities are monitored and/or controlled automatically by a computer system.

**CONDENSATE** – Hydrocarbons which are in the gaseous state under reservoir conditions but which become liquid either in passage up the hole or in the surface equipment.

**CONSIGNED GOODS** – A type of inventory in the possession of a selling agent but owned by another party. The seller has no equity, no control of price or sale, and receives none of the profit (as such) from sale of the property (but may receive a sales commission).

**CONSTRUCTION-IN-PROGRESS** – Property that is in a process of change from one state to another, such as the conversion of personal property from inventory to fixed asset by installation or the conversion of personal to real by becoming a fixture.

**CONTRA ACCOUNT** – One or more accounts which partially or wholly offset other accounts on financial statements may either be merged or appear together.

**CONTROL PANEL** – Switches and devices to start, stop, measure, monitor or signal what is taking place.

**CORPORATION** – A legal entity (business organization form) operating under a grant of authority from a state or other political autonomy in the form of a charter and articles of incorporation.

**-C-**

**CREDIT** – An accounting entry recording the reduction or elimination of an asset or expense or the creation of or addition to a liability or item of new worth or revenue.

**CURRENT ASSET** – Unrestricted cash or other asset held for conversion, within a relatively short period, into cash or other similar asset or useful goods or services. Usually the period is one year or less but for some items, such as accounts receivable in installments, the period may be longer (by contract).

**CURRENT LIABILITY** – A short-term debt regardless of its sources, including any liability accrued and deferred, and unearned revenue that is paid out of current assets or is transferred to income within a relatively short period, usually one year or less.

**CRUDE OIL** – A mixture of hydrocarbons that exists in the liquid phase in the underground reservoir and remains liquid at atmospheric pressure after passing through surface separating facilities.

**CUBIC FOOT OF GAS** – Defined as the volume of gas contained in one cubic foot of space at a standard pressure base and a standard temperature base. The standard temperature base is 60 degrees Fahrenheit.

**-D-**

**DATE OF ACQUISITION** – The effective purchase date of an asset. From the date of acquisition, the asset must appear in the accounts and in financial statements and depreciation, if any, must be recorded.

**DEBIT** – An accounting entry or posting recording the creation of or addition of an asset or an expense, or the reduction or elimination of a liability, credit valuation account or item or net worth or revenue.

**DEPRECIATION** – Lost usefulness; expired; the diminution of service yield from a fixed asset or grouping of assets that cannot or will not be restored by repairs, caused by wear and tear from use, disuse, poor maintenance, obsolescence and inadequacy to the particular enterprise.

**DEPRECIATION RESERVE** – Accumulated depreciation.

**DEHYDRATOR** – Removes water vapors from raw natural gas.

**DISCOVERY** – The process whereby the assessor identifies all taxable property in the jurisdiction and ensures that it is included on the assessment roll.

**DISPOSAL WELL** – A well through which water (usually salt water) is returned to subsurface formations.

**DRY GAS** – Natural gas that is produced without liquid hydrocarbons. Also gas that has been dehydrated to remove water (Pipeline gas).

**DUMP VALVE** – The discharge valve through which oil and water are discharged from separators, treaters, etc.

**-E-**

**EARNINGS** – A general term embracing revenue, profit or net income.

**EARNINGS STATEMENT** – Income (profit and loss) statement.

**ECONOMIC LIFE** – The period of time over which an asset's operation is economically feasible. The economic life may or may not be equivalent to physical life of the asset.

**EFFECTIVE AGE** – An age assigned to an asset based on a combination of its actual age and condition.

**EXAMINATION** – A limited audit qualified by words or phrases indicating the character of the limitation.

**EXAMINE** – To prove records or inspect documents, procedures and scope, for the purpose of arriving at opinions of accuracy, propriety, sufficiency, etc.

**EXPENSE** – An expired cost.

**EXPENSE ACCOUNT** – Any account maintained for particular expenses.

**EXTERNAL (economic) OBSOLESCENCE** – The loss of appraisal value (relative to the cost of replacing a property with property of equal utility) resulting from causes outside the property that suffers the loss. Usually locational in nature in the depreciation of real estate, it is more commonly market wide in personal property and is generally considered to be economically unfeasible to cure.

**-F-**

**FIBERGLASS TANKS** – Fiberglass tanks store water for disposal. The tank performs the same function as a cement pit. Water disposal trucks drain the tanks on a regular basis. In some cases, the tank is partially submerged in the ground.

**FIELD** – An area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same geological structural feature and/or stratigraphic condition. The field name refers to the surface area, although at times it may refer to both the surface and the underground productive formations.

**FINISHED GOODS** – Inventory at the end stage of a manufacturing process. Finished goods are the result of combining raw materials with labor, capital, machine time, and other components of production.

**FIRST IN, FIRST OUT (FIFO)** – An inventory cost-accounting procedure whereby unsold inventory, including inventory carried over from prior years, is valued at the prices most recently paid for inventory purchases.

**FISCAL YEAR** – A 12-month period of time to which the annual budget applies and at the end of which a government unit determines its financial position and results of its operation.

**FIXED ASSETS** – Personal property that has been brought to the point of highest and best use, that is, it is fully installed and used to produce income in an economically feasible manner. In a business: Permanent assets required for the normal conduct of a business.

**FIXED LIABILITY** – Long-term (over one year's duration) debts.

**FIXTURE** – Generally, an asset that has become part of real estate through attachment in such a manner that

**-F-**

**FREIGHT-IN** – Freight paid on incoming shipments treated as an element of cost of goods received.

**-G-**

**GAS** – All natural gases and all hydrocarbons not defined as oil.

**GAS INJECTION** – Natural gas injected under high pressure into a producing reservoir through an INPUT or INJECTION WELL as part of an enhanced recovery operation.

**GATHERING LINE** - A pipeline used to gather gas from the field to a central point.

**GATHERING SYSTEM** – a series of gathering lines used to deliver gas to a gas processing plant. The system is typically managed by one entity.

**GENERAL JOURNAL** – The journal which has recorded transactions not provided for in specialized journals.

**GENERAL LEDGER** – A ledger (book) containing accounts which are classified in detail or, in summary, all the transactions of a business enterprise.

**GENERALLY ACCEPTED** – Given authoritative recognition by professional bodies such as the American Institute of Certified Public Accountants and the American Accounting Association.

**GOODS HELD FOR SALE OR RESALE** – Any inventory held for sale by a wholesaler, distributor, or retailer after having passed through one or more other levels of trade.

**GOODS-IN-PROCESS** – Inventory, formerly raw materials, that has begun to undergo the manufacturing process, resulting in finished goods.

**GOODWILL** – The present value of expected future income in excess of a normal return of the investment in tangible assets.

**-H-**

**HEATER-TREATER** – Is used to separate oil, water and gas.

**HISTORICAL COST** – Cost to the present owner at the time of acquisition.

**-I-**

**IMPROVEMENTS** – Buildings, other structures and attachments or annexations to land which are intended to remain so attached or annexed, such as sidewalks, trees, drives, tunnels, drains, and sewers. Note: Sidewalks, curbing, sewer and highways are sometimes referred to as “Betterment,” but the term “Improvements” is preferred.

**IMPROVEMENTS OTHER THAN BUILDINGS** – A fixed asset account which reflects the acquisition value of permanent improvements, other than buildings, which add value to land. Examples of such improvements are fences, retaining walls, sidewalks, pavements, gutters, tunnels, and this account contains the purchase or contract price. If improvements are obtained by gift, it reflects the appraised value at time of acquisition.

**INJECTED GAS** – High pressure gas injected into a formation to maintain or restore reservoir pressure or

**-I-**

**INJECTED GAS** – High pressure gas injected into a formation to maintain or restore reservoir pressure or otherwise enhance recovery. Also, gas injected for gas lift.

**INVENTORY** – The group of personal property items whose value is exhibited by value in exchange; that is, ownership is solely for the purpose of sale rather than use.

**IN-TRANSIT GOODS** – Personal property in movement from one jurisdiction to another. In-transit goods are not assessable because they lack situs.

**-L-**

**LAST IN, FIRST OUT (LIFO)** – An inventory cost-accounting procedure whereby unsold inventory, including inventory carried over from the prior year, is valued at the prices paid for the earliest inventory purchases.

**LEASE** – A tract of land, where the producing wells and production equipment are located.

**LEASE AUTOMATIC CUSTODY TRANSFER (LACT OR ACT)** – Metering equipment that automatically measures, samples and transfers oil or gas from a lease into a pipeline.

**LEASEHOLD** – An interest in real property under the terms of a lease or contract for a specified period of time, in return for rent or other compensation.

**LEASEHOLD IMPROVEMENTS** – Items of personal property, such as furniture and fixtures associated with a lessee (the tenant), that have been affixed to the real property owned by a lessor.

**LIABILITY** – An amount owed by one person (a debtor) to another (a creditor), payable in money, goods or services.

**LOWER OF COST OR MARKET** – An inventory accounting concept which states the present value of inventory is based on the lower of either historic cost or current selling price (example: obsolete inventory items).

**LUBRICATOR** – A specially fabricated length of pipe that is usually placed above a valve on top of the Christmas tree. Lubricators are used to run special tools into a well.

**-M-**

**MASTER VALVE** – A large valve located on the Christmas tree used to shut in a well.

**MCF** – The abbreviation for 1,000 cubic feet (usually applied to natural gas).

**MMCF** – The abbreviation for 1,000,000 cubic feet (usually applied to natural gas).

**-N-**

**NATURAL GAS** - A mixture of hydrocarbons and varying quantities of non-hydrocarbons that exists either in the gaseous phase or in solution with crude oil in natural underground reservoirs.

**NATURAL GAS LIQUIDS** – Those portions of the reservoir gas which are liquefied at the surface in separators, field facilities or gas processing plants. Oilant products are also known as LIQUEFIED PETROLEUM GAS (LPG).

**NET PROFIT** – Excess of revenue over operating expenses.

**-N-**

**NET WORTH** – The aggregate of the equities representing proprietary interest; the excess of the going-concern value of assets over liabilities to outsiders; in the case of a corporation, the total of paid-in capital and retained earnings; in a sole proprietorship, the owner's capital account; in a partnership, the sum of the partner's capital accounts.

**NON-ASSOCIATED GAS** – Natural gas which is in reservoirs that does not contain significant quantities of crude oil.

**-P-**

**POSTING** – The act of transferring to an account in a ledger the date, either detailed or summarized, contained in a book or document of original entry.

**PLUG AND ABANDON** - Often abbreviated "P&A", referring to the act of placing plugs in a depleted well, then abandoning it.

**PRE-AUDIT** – An examination for the purpose of determining the propriety of proposed financial transactions and financial transactions which have already taken place but which have not yet been recorded, or, if such approval is required, before the approval of the financial transactions by designated officials for recording.

**PUMP** – A device used to increase the pressure of or move liquids.

**PUMPING UNIT** – The surface pumping unit is the equipment that is used to artificially lift oil and water from the reservoir through the well bore to the surface.

**-R-**

**RADIO TELEMETRY UNIT (RTU)** – Telemetry is a system for the electronic transmission of oil field data.

**RAW MATERIALS** – Goods purchased for use as an ingredient or component part of a finished product.

**REAL ESTATE** – Land and land improvements, including buildings and appurtenances, standing timber and orchard trees.

**REMAINING ECONOMIC LIFE (REL)** - The number of years in the future over which the operation of an asset is anticipated to be economically feasible, often expressed as a percentage of the total economic life (REL%).

**-S-**

**SALTWATER DISPOSAL** – The method and the system for the disposal of salt water produced with crude oil.

**SCRUBBER** – A vessel through which gas is passed to remove liquid and foreign matter.

**SEPARATOR** – Separates natural gas from crude oil and water.

**SITUS** – The taxable location of an asset. For personal property, situs may be the physical location of the property or, in the instance of highly mobile property, the more-or-less permanent location of the property owner.

**-S-**

**SOLE PROPRIETORSHIP** – A business enterprise net worth which belongs entirely to one individual.

**STEEL TANK** – Steel tanks store oil for sale or water for disposal. Tanks may be welded or bolted.

**SUPPLIES** – A type of personal property, usually treated as inventory, that is consumed as part of the process of bringing other assets to a saleable condition.

**-T-**

**TANGIBLE PROPERTY** – Property whose value is measured in accordance with its actual physical presence.

**TAX** – A compulsory charge levied by a government unit against the income or property of a person, natural or corporate, for the common benefit of all citizens. The term does not include specific charges made against particular person or property for current or permanent benefits and privileges accruing only to those paying such charges, such as licenses, permits, and specific assessments.

**TRADE LEVEL** – Refers to the production and distribution stages of a product. Appraisers recognize three distinct levels of trade; the manufacturing level, the wholesale level, and the retail level. Personal property should be assessed at the trade level at which it is found. The valuation of the inventory of one owner should be based on the price for which it would be exchanged with a similar business at the same trade level, for example; from one manufacturer to another. Value-in-exchange increases as a property moves from manufacturing through retail levels of trade.

**TRENDING FACTOR** – A figure representing the increase in selling price over a period of time. Trending accounts for the relative difference in the value of a dollar between two periods.

**-U-**

**UNIT COST** – A valuation guideline expressing the relationship between cost or value of inventory or fixed assets and some unit of measure; for example, cost per square foot or per employee

**USEFUL LIFE** – Estimated normal operating life in terms of utility to the owner of a fixed asset or group of assets.

**-V-**

**VALUATION** – A judgment expressing or implying preference, or relative approval or disapproval, most often expressed in money, after a careful weighing of evidence, related experience, training, native shrewdness and other factors.

**-W-**

**WEIGHTED AVERAGE** – a method of inventory cost accounting whereby inventory is valued according to the unit price of all units owned throughout the year; calculated by dividing total acquisition cost of all inventory by the number of units owned.

**WELLHEAD** – The wellhead is used to maintain surface control of the well. It is formed by the combination of parts including the casing head, tubing head, Christmas tree, stuffing box and pressure gauges.
