The investment process will be carried out through competition, proper oversight, and financial safeguards.

2. **Scope:**

This investment policy applies to all funds under the control of the State, unless otherwise authorized or directed by the constitution or state statute. This policy also applies to the investments of state agencies when they request that the State Treasurer act as their agent. 3. **Prudence:**

The standard of prudence to be used by an investment officer shall be the “prudent person” and/or “prudent investor” standard and shall be applied in the context of managing an overall portfolio. An Investment Officer acting in accordance with written policies and procedures approved by the State Treasurer and exercising due diligence shall be relieved of personal responsibility for an individual security's credit risk or market price changes, provided deviations from expectations are reported in a timely fashion and appropriate action is taken to control adverse developments.

4. **Objectives:**

Given the Authorized Investments (Section 9) permitted under law, the primary objectives, in priority order, of the State's active investment program shall be:

4.1 Safety:

Safety of principal is the foremost objective of the investment program. Investments of the State shall be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio. To attain this objective, the State will diversify its investments by investing funds among a variety of securities offering independent returns and among various financial institutions.

4.2 Liquidity:

The State Treasurer's investment portfolio will remain sufficiently liquid to enable the State to meet all operating requirements that might be reasonably anticipated. The Office of the State Treasurer must also manage liquidity to provide for other unforeseen

cash outflows.

4.3 Return on Investment:

The State Treasurer's investment policy shall be designed with the objective of attaining a rate of return throughout budgetary and economic cycles, commensurate with the State's investment risk constraints and the cash flow characteristics of the portfolio.

Securities should generally be held until maturity. Securities may be sold due to liquidity needs of the portfolio; to minimize loss of principal; or to improve the efficiency, quality, yield, or target duration in the portfolio.

5. **Delegation of Authority:**

Authority to manage the State's investment program is derived from 62 O.S. § 89.1a *et seq.* Management responsibility for the investment program is vested with the State Treasurer. The State Treasurer is directed to invest the maximum amount of funds under his control consistent with good business practice.

The authority to perform duties related to the investment of State funds may be delegated by the State Treasurer to an Investment Officer. The Investment Officer shall engage in investment transactions only in accordance with statutes, administrative rules, this policy, and procedures approved by the State Treasurer. The Investment Officer shall not perform or supervise any accounting functions, data processing functions, or duties related to the documentation or settlement of investment transactions. In the absence of the Investment Officer, a staff person designated by the State Treasurer as a backup investment officer may assume responsibility for daily investment of funds. Written authorization to invest by the Investment Officers is forwarded to all authorized dealers and financial institutions. The State Treasurer may, at his discretion, appoint an investment advisory committee.

5.1 Investment Procedures:

The State Treasurer shall establish a separate written investment procedures manual for the operation of the investment program consistent with this policy. The procedures should include reference to: safekeeping, master repurchase agreements, wire transfer agreements, banking service contracts and cash flow forecasting and collateral/depository agreements. Such procedures shall include explicit delegation of authority to persons responsible for investment transactions. No person may engage in investment transactions except as provided under the terms of this policy and the procedures established by the State Treasurer.

6. **Ethics and Conflict of Interest:**

All employees involved in the investment process shall refrain from personal business activity or other activities that could conflict with proper execution of the investment program, or which could impair their ability to make impartial investment decisions. In accordance with the law and internal policies, employees shall disclose any conflict of

interest or potential conflict of interest and shall sign a non-collusion affidavit relating to the performance of functions of the Office of the State Treasurer (OST). See OST Policies and Procedure Manual Chapter 2(A) and Appendix F.
